[as amended by all amendments that commenced on or before 6 July 2001]

CHAPTER 1—PRELIMINARY

PART 1—INTRODUCTION

1 Short title

This management plan may be cited as the *Fisheries (East Coast Trawl) Management Plan 1999*.

2 Commencement

(1) Section 11 commences on 1 January 2000.

(2) Section 28(2)(b) commences on 2 January 2000.

(3) Section 159(2)(b) and (c) commences on 1 March 2000.

(4) Sections 142, 154 and 167 commence on 1 July 2000.¹

(5) The remaining provisions of this plan commence on the notification day.

3 The fishery—sch 1

(1) This plan applies in relation to the east coast trawl fishery (the “fishery”).

(2) This plan applies only to—

1 Sections 11 (Annual southern closures—sch 3, pt 1, div 1), 28 (Saucer scallops—regulated by time), 159 (Requirement to use TED) and 142, 154 and 167 (Use of ground chains for net)

- (a) fishing for trade or commerce in the fishery by the use of trawl nets (“**trawling**”); or
 - (b) the possession of permitted fish taken under this plan from the fishery.
- (3) The fishery is described in schedule 1, part 1.
- (4) Unless otherwise stated in schedule 1, part 1, the description is as the fishery was immediately before the notification day.
- (5) The fishery’s known status, as at 31 December 1997, is stated in schedule 1, part 2.

PART 2—OBJECTIVES OF PLAN AND THEIR ACHIEVEMENT

4 Objectives

The objectives of this plan are to—

- (a) manage the fishery in a way that gives optimal, but sustainable, community benefit; and
- (b) ensure fisheries resources taken in the fishery are taken in an ecologically sustainable way; and
- (c) ensure the sustainability of the fishery’s ecological systems; and
- (d) provide for an economically viable, but ecologically sustainable, trawl fishery; and
- (e) ensure fair access to fisheries resources taken in the fishery, on a sustainable basis, among the following groups and persons in the groups—
 - (i) commercial fishers;
 - (ii) recreational fishers;
 - (iii) Aboriginal and Torres Strait Islander fishers;²
 - (iv) other users of the fisheries resources.

Example of ‘other users’—

Divers who view or photograph fish, but do not take them.

5 How objectives are to be achieved—sch 2

- (1) Schedule 2 states how the objectives are to be achieved.
- (2) The achievement of each objective must be—
- (a) measured only in the way stated in schedule 2; and
 - (b) reviewed by the chief executive under section 230³ if a review event stated in schedule 2 for the objective happens.

PART 3—INTERPRETATION*Division 1—Interpretation aids and dictionary***6 Aids to interpretation and definitions—sch 7**

(1) Schedule 7, part 1 contains provisions that aid the interpretation of this plan.

10 Closure for VMS equipment and manual reporting conditions

(1) For this section, all waters in the fishery are closed waters.

(2) The waters are closed every year, all year.

(3) The possession or use of a boat under a 'T1', 'T2' or 'T3' fishery symbol is prohibited in the closed waters unless the conditions of the licence for the boat under chapter 3, part 5⁵ have been complied with.

Division 2—Specific closures

Subdivision 1—Annual southern and northern closures

11 Annual southern closures—sch 3, pt 1, div 1

(1) The waters mentioned in schedule 3, section 1 are closed waters.

4 See chapter 4 (Specific licence conditions) for the relevant fishery symbols for particular waters in the fishery.

5 Chapter 3, part 5 (VMS equipment and manual reporting conditions)

(2) The waters are closed to the use of a boat under a fishery symbol from midday on 20 September to midday on 1 November (“**first closure period**”).

(3) Also, the waters are closed to the use of a boat under a fishery symbol from midday on 1 November to midday on 12 December (“**second closure period**”) unless—

- (a) the boat is used under a ‘T5’, ‘T6’, ‘T7’ or ‘T8’ fishery symbol; or

(2) The holder may, by notice to the chief executive (“**withdrawal notice**”), withdraw the sit-out notice.

(3) A sit-out or withdrawal notice may be given by telephone to a telecommunications service provider for the chief executive appointed by gazette notice.

(4) However, the withdrawal does not take effect until the withdrawal notice is received by the chief executive.

12B Sit-out applications

(1) The holder of an ‘M1’, ‘T1’, ‘T2’ or ‘T3’ licence may apply for a decision by the chief executive that the boat identified in the licence was not, or was not up to the time the decision is made, used for trawling during a stated first closure period under section 11 or 12.

(2) The application must be in writing and supported by enough information to enable the chief executive to decide the application.

(6) Evidence under chapter 3, part 6, division 7 that the boat was used on a fishing or steaming day during the first closure period is evidence that the boat was used for trawling during the period.

(7) The chief executive must, as soon as practicable after making the decision, give the applicant—

- (a) if the decision is to grant the application—notice of the decision; or

Examples of 'other fishing apparatus' normally used with an otter trawl net—

- the net's otter boards
- any ground chains or ropes.

(2) For subsection (1), the net and other fishing apparatus are stowed and secured—

- (a) during the daytime only if—
 - (i) they are drawn up to a boat and are visible from an aircraft or another boat; and
 - (ii) the net's cod ends are open; and

- (b) at night only if—
 - (i) the boat carrying them is at anchor in an area marked as an anchorage or boat harbour on a navigational chart; or
 - (ii) they are inboard a boat and are stored or suspended from a mast or boom.

21 Fishing apparatus testing

(1) If the prohibited activity is using or possessing a trawl net, it is an exemption for a person to use or possess the net if—

- (a) the use or possession is only for testing the net or other fishing apparatus normally used with the net; and
- (b) the person in control of the boat used for the testing has given the nearest Queensland Boating and Fisheries Patrol oral or written notice of the testing under subsection (2); and
- (c) the net's cod ends are open; and
- (d) no fish are taken during the test.

9 Division 2, subdivision 2 (Scallop replenishment closures)

(2) The notice must—

- (a) be given at least 24 hours before the testing starts; and
- (b) state—
 - (i) an area of no more than 1 square n mile where the testing is to happen; and
 - (ii) when the testing is to start and end.

(i) the person holds a licence for the fishery; or

(ii) the holder of a licence for the fishery has allowed the person to take or possess fish under the licence; and

¹¹ For relevant general provisions of the regulation about fishery symbols, see part 7, division 4 (Fishery symbols on authorities) of the regulation.

- (b) the person is a commercial or assistant fisher or is acting under a crew licence.

(2) Also, a person may fish under a ‘T1’ or ‘T2’ licence in an effort year only if the holder of the licence holds unused effort units for the licence for the year.¹²

33 Assistant fishers and persons acting under a crew licence

(1) A crew member may, under this plan, use or possess commercial fishing apparatus and take fish for trade or commerce only if the crew member and a commercial fisher are—

- (a) on the same boat; or
 (b) on different boats but the crew member is on a tender boat that is not a trawler.

(2) In this section—

“**crew member**” means an assistant fisher or a person acting under a crew licence.

Division 2—Obtaining an ‘M1’ or ‘M2’ fishery symbol

34 Applying for ‘M1’ or ‘M2’ fishery symbol

(1) An eligible person who holds a ‘T1’ licence may apply to the chief executive for an ‘M1’ or ‘M2’ fishery symbol to be written on the licence.

(2) However, the application must be written and may be made only on or before 1 March 2001.

35 Deciding application

(1) On or before 1 April 2001, the chief executive must consider and decide to grant or refuse an application for an ‘M1’ or ‘M2’ fishery symbol.

(2) The chief executive must not grant the application unless the chief executive is satisfied a boat identified on any of the following was used

¹² See section 98 (When effort unit entitlement is “used” for an effort year).

under a ‘T1’ fishery symbol in the Moreton Bay logbook area from 1 January 1988 to 30 November 2000—

- (a) the licence the subject of the application (the “**subject licence**”);
- (b) a former licence for the subject licence;
- (c) a surrendered former licence for the subject licence.

(3) Also, if the application is for an ‘M2’ fishery symbol, the chief executive—

- (a) must not grant it unless the applicant gives the chief executive notice that the applicant surrenders—
 - (i) the ‘T1’ fishery symbol written on the subject licence; and
 - (ii) all effort units for the subject licence; and
- (b) must refuse it if—
 - (i) the applicant has ever transferred effort units for the subject licence; or
 - (ii) the boat identified in the subject licence has, since 1 January 2001, been replaced or been modified in a way mentioned in section 132(2)(a).¹³

(4) In this section—

“**Moreton Bay logbook area**” means waters within the following boundary—

- from latitude 27° south, longitude 153° east to latitude 28° south, longitude 153° east
- to latitude 28° south, longitude 153°30' east
- to latitude 27° south, longitude 153°30' east
- to latitude 27° south, longitude 153° east.

36 Steps after making decision

(1) If an application for an ‘M1’ or ‘M2’ fishery symbol is granted, the chief executive must—

13 Section 132 (Restrictions for ‘M1’, ‘T1’ or ‘T2’ licences)

See also section 43 (Restrictions on writing fishery symbols on authorities allowing the use of boats of certain lengths in commercial fisheries) of the regulation.

- (a) write the symbol applied for on the licence; and
- (b) if the application was for an 'M2' fishery symbol—remove the 'T1' fishery symbol from the licence the subject of the application.

(2) If the chief executive decides to refuse the application, the chief executive must, as soon as practicable after making the decision, give the applicant an information notice about the decision.

Division 3—Restrictions on writing fishery symbols on licences

37 Restrictions

(1) The chief executive may write a fishery symbol on a primary licence only if—

- (a) for an 'M1', 'M2' fishery symbol—the symbol is written under section 36(1); or
- (b) for a 'T5', 'T6', 'T7', 'T8' or 'T9' licence—the symbol is written under a written approval by the chief executive for it to be written on the licence; or
- (c) the licence is a replacement licence; or
- (d) the chief executive renews the licence.

(2) However, the chief executive must not write a symbol as follows on a primary licence if it has the following written on it—

- (a) for an 'M1' fishery symbol—a 'T2' fishery symbol;
- (b) for an 'M2' fishery symbol—an 'M1', 'T1' or 'T2' fishery symbol;
- (c) for a 'T1' fishery symbol—an 'M2' or 'T2' fishery symbol;
- (d) for a 'T2' fishery symbol—a 'T1' fishery symbol.

(3) Also, the chief executive must not write an 'M1' fishery symbol on a primary licence unless it already has a 'T1' fishery symbol written on it.

PART 2—FISH THAT MAY BE TAKEN

38 Condition that only permitted fish may be taken

Each licence for the fishery is subject to a condition that only permitted fish may be taken under the licence.

39 Condition applies to everyone acting under licence

The condition under section 38 also applies to anyone acting under a licence for the fishery.

PART 3—USE OF BRDs

Division 1—Preliminary

40 Application and purpose of pt 3

This part—

- (a) applies if, under chapter 4, a BRD must be used with a net used under a provision of that chapter; and
- (b) prescribes an additional condition to which the licence under which the net is used is subject.

41 Purpose of BRD

The purpose of a BRD is to reduce the level of bycatch taken by the use of the net to the lowest level that allows the economically viable use of the net, having regard to the sustainability of the fishery's ecological systems.

*Division 2—BRD use condition***42 Requirement to achieve purpose**

(1) The licence under which the net is used is subject to a condition (the “**BRD use condition**”) that the use of the net must achieve the purpose of a BRD.

(2) The BRD use condition also applies to anyone acting under the licence.

*Division 3—Compliance with BRD use condition**Subdivision 1—General***43 How to comply**

(1) The BRD use condition is taken to have been complied with if a device that complies with subdivision 2 (a “**recognised BRD**”) is used with the net.

(2) The condition may also be complied with by using another device with the net if the use achieves the purpose of a BRD.

*Subdivision 2—Recognised BRDs***44 Square mesh cod end**

The net’s cod end is a recognised BRD if—

- (c) the edges of the opening do not overlap by more than 28.5 cm; and
- (d) nothing covers any part of the opening during trawling.

48 Radial escape section

(1) A combination of a funnel, hoops and openings in the net are a recognised BRD if—

- (a) they comply with subsections (2) to (4); and

Subdivision 3—BRD guidelines

49 Chief executive may make guidelines

The chief executive may make guidelines (**“BRD guidelines”**) for devices, other than recognised BRDs, that may be used with a trawl net to achieve the purpose of a BRD.

50 Compliance with BRD use condition from BRD guidelines

A person to whom the BRD use condition applies is taken to have complied with the condition if, to the extent they are relevant, the BRD guidelines are complied with.

PART 4—USE OF TEDs*Division 1—Preliminary***51 Application and purpose of pt 4**

This part—

- (a) applies if, under chapter 4, a TED must be used with a net used under a provision of that chapter; and
- (b) prescribes an additional condition to which the licence under which the net is used is subject.

52 Purpose of TED

The purpose of a TED is to allow turtles to escape immediately after being taken in the net.

*Division 2—TED use condition***53 Requirement to achieve purpose**

(1) The licence under which the net is used is subject to a condition (the “**TED use condition**”) that the use of the net must achieve the purpose of a TED.

(2) The TED use condition also applies to anyone acting under the licence.

Division 3—Compliance with TED use condition

Subdivision 1—General

54 How to comply

(1) The TED use condition is taken to have been complied with if a device that complies with section 55 (a “**recognised TED**”) is used with the net.

(2) The condition may also be complied with by using another device with the net if the use achieves the purpose of a TED.

55 Requirements for recognised TED

(1) A recognised TED must consist of a barrier and an opening that allows turtles to escape immediately after being taken in the net.

(2) The barrier must consist of a rigid or semirigid inclined barrier of bars attached to the net’s circumference that acts to steer turtles through the opening.

(3) The bars must be no more than 12 cm apart.

(4) The opening must—

(a) be immediately forward of the top of the barrier; and

(b) have a minimum taut measurement of—

(i) 76 cm across the widest part of the net; and

(ii) 38 cm across the perpendicular to the measurement under subparagraph (i) at its midpoint.

Subdivision 2—TED guidelines

56 Chief executive may make guidelines

The chief executive may make guidelines (“**TED guidelines**”) for devices, other than recognised TEDs, that may be used with a trawl net to achieve the purpose of a TED.

57 Compliance with TED use condition from TED guidelines

A person to whom the TED use condition applies is taken to have complied with the condition if, to the extent they are relevant, the TED guidelines are complied with.

PART 5—VMS EQUIPMENT AND MANUAL REPORTING CONDITIONS*Division 1—Preliminary***58 Purpose and application of pt 5**

(1) This part prescribes additional conditions to which an ‘M1’, ‘T1’, ‘T2’ or ‘T3’ licence is subject.

(2) If this part imposes an obligation on the person in control, it is a condition of the licence that the obligation must be complied with.

*Division 2—VMS equipment obligations***59 Obligation to install and register VMS equipment**

(1) The holder of the licence must have an approved person install approved VMS equipment on the boat identified in the licence.

(2) The equipment and the installer must be included in the particulars about the licence in the register of authorities the chief executive keeps under section 73 of the Act.

60 Obligation to maintain and use VMS equipment

(1) The person in control of the boat identified in the licence must ensure VMS equipment installed on the boat is—

- (a) maintained in a condition that allows it to perform the functions of VMS equipment; and

- (b) used in a way that, at all times, allows the boat to be detected by VMS wherever the boat is located.

(2) However, the obligations do not apply during a period if—

- (a) the boat is not used for fishing during the period; and
- (b) before the period started the chief executive received notice from the holder of the licence that the boat would not be used for fishing during the period because, during the whole of the period—

- (i) the boat will be incapable of being used for fishing; or

Examples for subparagraph (i)—

During the whole of the period, the boat will not be carrying a trawl net or will be in dry dock or on a slip.

- (ii) the VMS equipment will be disconnected from its power source because of a stated maintenance reason.

(3) However, if the notice is given because of a maintenance reason, the period can not be more than 6 hours.

(4) The notice may be given to the chief executive by—

- (a) telephone to a telecommunications service provider for the chief executive appointed by gazette notice; or
- (b) using VMS equipment in a way that ensures—
 - (i) the notice is given to, and received by, the chief executive instantaneously; and
 - (ii) the chief executive can readily access the information in the notice.

61 Obligation to modify or replace installed VMS if required

(1) The chief executive may, by notice, require the holder of the licence to modify or replace VMS equipment installed on the boat identified in the licence.

(2) The notice must—

- (a) identify the holder, the licence and the boat; and
- (b) state the required modification or replacement; and

- (c) state a reasonable period of at least 3 months for the holder to comply with the notice; and
 - (d) be accompanied by, or include, an information notice about the decision to make the requirement.
- (3) The holder must, within the stated period, make the required modification or replacement.

Division 3—Obligations if VMS equipment malfunctions

Subdivision 1—Preliminary

62 Application and purpose of div 3

This division—

- (a) applies if VMS equipment installed on the boat identified in the licence malfunctions; and
- (b) imposes obligations on the person in control of the boat when the person becomes aware of the malfunction.

63 Meaning of “malfunction” for div 3

In this division, “**malfunction**”, for VMS equipment, means a failure to work at all and a failure to work in a way so as to perform the functions of VMS equipment.¹⁴

64 When person is taken to be aware of malfunction

(1) A person in control is taken to be aware of the malfunction if the person receives notice from the chief executive or an inspector that the equipment is malfunctioning.

(2) The notice may be given—

¹⁴ Under section 4 (Definitions) of the Act, definition “VMS equipment”, VMS equipment means ‘equipment used as part of a system that monitors the position and operation of a vessel’.

- (a) orally in person; or
- (b) by a nominated communication mode for the boat.

Subdivision 2—Obligations

65 Obligation to give notice of malfunction

(1) The person in control must immediately notify the chief executive of the malfunction, unless the person has a reasonable excuse.

(2) The notice may be given to the chief executive by—

- (a) telephone to a telecommunications service provider for the chief executive appointed by gazette notice; or
- (b) using VMS equipment in a way that ensures—
 - (i) the notice is given to, and received by, the chief executive instantaneously; and
 - (ii) the chief executive can readily access the information in the notice.

66 Manual reporting obligation

(1) The person in control must notify the boat's position and operation to the chief executive by radio, telephone or another form of instantaneous electronic communication at intervals that, in all the circumstances, reasonably acts as a substitute for VMS equipment.

(2) The obligation under subsection (1) is called the “**manual reporting obligation**”.

(3) The manual reporting obligation continues to apply to the person in control until the VMS maintenance and use obligations are complied with for the boat.

(4) If notice is given about a boat under the manual reporting obligation the boat is “**manually reported**”.

67 Further obligations for malfunction in major scallop area

(1) This section applies, as well as the manual reporting obligation, if the malfunction happened inside the area within the following boundary (the “**major scallop area**”)—

- from latitude 22°10.80' south, longitude 149°48' east to latitude 22°13.20' south, longitude 152° east
- to latitude 24°13.80' south, longitude 153°33' east
- to latitude 24°42' south, longitude 153°16.20' east
- to latitude 25°06' south, longitude 153°12' east
- to latitude 25°18' south, longitude 152°43.20' east
- to latitude 22°10.80' south, longitude 149°48' east.

(2) The person in control must—

- (a) stop the use of fishing apparatus from the boat; and
- (b) immediately cause the boat to travel as soon as practicable to the defined port area nearest the boat, unless the person has a reasonable excuse.

(3) If the person in control starts to comply with the VMS maintenance and use obligations for the boat, the obligations under subsection (2)—

- (a) continue to apply; but
- (b) cease to apply if the chief executive or an inspector gives the person notice that the obligations need not be complied with.

(4) Notice under subsection (3)(b) may be given—

- (a) orally in person; or
- (b) by a nominated communication mode for the boat.

(5) If the boat travels to a port, the person in control must not cause or allow the boat to be used for fishing unless an approved person gives the chief executive or an inspector notice that VMS equipment installed on the boat is in a condition that allows it to perform the functions of VMS equipment.

68 Further obligations for malfunction outside major scallop area

(1) This section applies, as well as the manual reporting obligation, if the malfunction happened outside the major scallop area.

(2) The person in control must cause the boat to travel to a defined port area within 5 days, unless the person has a reasonable excuse.

(3) However, if the boat moves into the major scallop area, the person in control must—

- (a) stop the use of fishing apparatus from the boat; and
- (b) immediately cause the boat to travel as soon as practicable to the defined port area nearest the boat, unless the person has a reasonable excuse.

(4) If the person in control starts to comply with the VMS maintenance and use obligations for the boat, the obligations under subsections (2) and (3)—

- (a) cease to apply; but
- (b) resume if the chief executive or an inspector gives the person notice that the obligations must be complied with.

(5) Notice under subsection (4)(b) may be given—

- (a) orally in person; or
- (b) by a nominated communication mode for the boat.

(6) If the boat travels to a port, the person in control must not cause or allow the boat to be used for fishing unless an approved person gives the chief executive or an inspector notice that VMS equipment installed on the boat is in a condition that allows it to perform the functions of VMS equipment.

Subdivision 3—Manual reporting guidelines

69 Chief executive may make guidelines

The chief executive may make guidelines (“**manual reporting guidelines**”) for compliance with the manual reporting obligation.

70 Compliance with manual reporting obligation

A person to whom the manual obligation applies is taken to have complied with the obligation if, to the extent they are relevant, the manual reporting guidelines are complied with.

Division 4—Notice guidelines

71 Chief executive may make guidelines

The chief executive may make guidelines (“**notice guidelines**”) about how to give a notice to the chief executive under this part.

72 Compliance with notice guidelines

A person is taken to have given a notice under this part if, to the extent they are relevant, the notice guidelines are complied with.

PART 6—EFFORT UNITS

Division 1—Introduction

73 Simplified outline of pt 6

(1) This part provides for the issue of effort units, their entitlement and for conditions for their transfer.

(2) Effort units must be issued as follows for each licence that is, or is a replacement or renewal of, a ‘T1’ or ‘T2’ licence in force at midday on 15 December 2000 (an “**eligible licence**”)—

- (a) under division 3, by an issue on or before 1 January 2001, based on allocated days;
- (b) under division 4, by an issue on or before 1 August 2001, based on supplementary days decided under that division.¹⁵

(3) Under divisions 3 and 4, the total of all allocated and supplementary days can not be more than 102 929.

(4) Division 5 allows the chief executive to make a rateable issue of additional effort units for ‘T1’ or ‘T2’ fishery symbols if the total mentioned in subsection (3) is not exceeded.

¹⁵ See section 81(2) and (3) (Making allocation decision).

(5) Divisions 6 and 7 provide for the entitlement of effort units and for working out when they are used.

(6) Divisions 8 and 9 prescribe conditions for the transfer of effort units and provide for the entitlement under transferred effort units.

Division 2—General provisions about effort units

74 Nature of an effort unit

Each effort unit is—

- (a) an authority, the entitlement for which is provided for under division 6; and
- (b) a quota for the fishery.

75 General condition for issue of effort units

An effort unit may be issued only under this part.

76 When effort unit is “issued”

An effort unit is “issued” when—

- (a) an effort unit certificate that includes the unit is issued; or
- (b) an effort unit certificate is amended under this part to include the unit.

Division 3—Initial effort units

Subdivision 1—General provisions

77 Obligation to issue

On or before 1 January 2001 the chief executive must—

- (a) work out, under this division, the number of effort units that must be issued for each eligible licence; and
- (b) issue an effort unit certificate for the units for the first effort year.

78 Effort unit formula

(1) To work out the number of effort units that must be issued for each eligible licence under this division, the chief executive must apply the following formula—

$$\text{EU} = \text{EUCF} \times \text{AD}$$

where—

“**EU**” means the number of effort units worked out by applying the formula.

“**EUCF**” means the effort unit conversion factor for—

- (a) the boat identified in the eligible licence; or
- (b) if no boat is identified in the eligible licence—the boat last identified in the licence.

“**AD**” means the number of allocated days for the eligible licence.

(2) If after applying the formula the number of effort units worked out is not a whole number, the number of effort units that must be issued for the eligible licence is the nearest whole number to the amount worked out, rounded up.

*Subdivision 2—Allocated days***79 Purpose of sdiv 2**

This subdivision provides for how the chief executive must decide the number of allocated days for each eligible licence (the “**allocation decision**”).

80 Deciding recorded fishing days

(1) The chief executive must decide the higher of the following number of days for each eligible licence for each year from 1988 to 1998—

- (a) the number of days on which a boat as follows (a “**relevant boat**”) was used, other than under a surrendered former licence—
 - (i) a boat identified in the eligible licence;
 - (ii) a boat identified in a former licence for the eligible licence;

- (b) if a relevant boat was, in the year, used under a surrendered former licence—an adjusted number of days on which a relevant boat was used in the year under the surrendered former licence worked out by applying the following formula—

$$\text{AD} = \frac{(\text{FD} \times \text{EUCF 1})}{\text{EUCF 2}}$$

where—

“AD” means the adjusted number of recorded fishing days worked out by applying the formula.

“FD” means the number of days on which relevant boats were used in the year under the surrendered former licence.

“EUCF 1” means the effort unit conversion factor for the boat identified in the surrendered former licence.

“EUCF 2” means the effort unit conversion factor for—

- (a) the boat identified in the eligible licence; or
- (b) if no boat is identified in the eligible licence—the boat last identified in the licence.

(2) The higher number of days for a year decided under subsection (1) is called the “**recorded fishing days**” for the year.

(3) In making the decision, the chief executive must consider—

- (a) any relevant logbook returns given before 1 May 1999; and
- (b) records held by the chief executive about the returns.

(4) In this section—

“**day**”, for the use of a relevant boat, means any period 24 hours from when the use started, whether or not the period is included in more than 1 of the 7 named days of the week.

Example—

A relevant boat is used from 7 p.m. on a Sunday to 6 a.m. on the following Monday and again on the Monday from 5 p.m. to 6 p.m. For this section, the boat is only used for 1 day.

“**use**”, a relevant boat, means use a trawl net from the boat under a ‘T1’ or ‘T2’ licence.

81 Making allocation decision

(1) This section provides for formulae to make the allocation decision, after deciding recorded fishing days.

(2) For a 'T1' licence, the formula is—

$$AD = \frac{(\mathbf{HRD}_1 + \mathbf{HRD}_2 + \mathbf{HRD}_3 + \mathbf{HRD}_4)/4}{(\Sigma \mathbf{HRD}_1 + \Sigma \mathbf{HRD}_2 + \Sigma \mathbf{HRD}_3 + \Sigma \mathbf{HRD}_4)/4} \times 94\,080$$

(3) For a 'T2' licence, the formula is—

$$AD = \frac{(\mathbf{HRD}_1 + \mathbf{HRD}_2 + \mathbf{HRD}_3 + \mathbf{HRD}_4)/4}{(\Sigma \mathbf{HRD}_1 + \Sigma \mathbf{HRD}_2 + \Sigma \mathbf{HRD}_3 + \Sigma \mathbf{HRD}_4)/4} \times 1\,920$$

(4) In the formulae—

“AD” means the number of allocated days.

“**HRD₁**” means the highest number of recorded fishing days in any year from 1988 to 1998 for the eligible licence.

“**HRD₂**” means the second highest number of recorded fishing days in any year from 1988 to 1998 for the eligible licence.

“**HRD₃**” means the third highest number of recorded fishing days in any year from 1988 to 1998 for the eligible licence.

“**HRD₄**” means the fourth highest number of recorded fishing days in any year from 1988 to 1998 for the eligible licence.

“²**HRD₁**” means the sum of the highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

“²**HRD₂**” means the sum of the second highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

“²**HRD₃**” means the sum of the third highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

“²**HRD₄**” means the sum of the fourth highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

Subdivision 3—Provisions for giving effect to appeal decisions**81A Application of sdiv 3**

This subdivision applies if the following events happen—

- (a) an eligible licence holder appeals to the tribunal against the allocation decision for the licence;
- (b) recorded fishing days for 1 or more years used to make the allocation decision are, or must be, changed because the tribunal decides to set aside that decision and—
 - (i) substitute another decision; or
 - (ii) return the matter to the chief executive with directions;
- (c) the substituted decision, or a decision by the chief executive made under the directions, (the **“new recorded fishing days decision”**) will require the reapplication of the formula under section 81 (the **“allocation decision formula”**) to remake the allocation decision;
- (d) the total fishing days for all eligible licences are less than 102 929.

81B Effect of new recorded fishing days decision

Subject to any decision or direction by the tribunal, the making of the new recorded fishing days decision does not—

- (a) require the reapplication of the allocation decision formula for an eligible licence holder other than the appellant; or
- (b) invalidate or otherwise affect effort units issued to another eligible licence holder.

81C Adjustment to allocation decision formula

(1) The chief executive may, instead of reapplying section 81, remake the allocation decision by reapplying the allocation decision formula using—

- (a) the same denominators that were used for the allocation decision appealed against; and

- (b) the numerators used for the decision, as changed by the new recorded fishing days decision.

(2) If, under subsection (1), the chief executive remakes the decision, the chief executive must—

- (a) work out whether any further effort units must be issued to the appellant by applying the effort unit formula under section 78, using the allocated days worked out by reapplying the allocation decision formula under subsection (1); and
- (b) issue the further effort units; and
- (c) take steps to amend the relevant effort unit certificate to include the further effort units and the fishing days for which they were issued.

Division 4—Further effort units issued on basis of supplementary days

Subdivision 1—Preliminary

82 Purpose of div 4

The purpose of this division is to allow further effort units to be issued to eligible persons to attempt to remedy hardship or disadvantage because of the allocation decision.

83 Meaning of “small operator” for div 4

For this division, a “**small operator**” means an eligible person who—

- (a) holds only 1 ‘T1’ or ‘T2’ licence; and
- (b) owns the boat identified in the licence; and
- (c) is a person as follows—
 - (i) the person who usually is the person in control of the boat when it is used for trawling (the “**usual person in control**”);
 - (ii) a close relative of the usual person in control;
 - (iii) a corporation, a director or shareholder of which is, or is a close relative of, the usual person in control; and

- (d) in the 2 financial years immediately before the application was made, derived at least 80% of the person's gross income from fishing under the licence by trawling; and
- (e) received less than 123 allocated days.

Subdivision 2—Applications for effort units

84 Requirements for application

(1) An eligible person may, on or before 31 March 2001, apply to the chief executive to be issued with further effort units for the person's eligible licence (an **“effort unit application”**).

(2) The application must—

- (a) be made to the chief executive, in the approved form; and
- (b) include, or be accompanied by, all documents or information on which the applicant relies to support the application.

85 Deciding application

Subject to sections 88 and 89A, the chief executive must decide each effort unit application on or before 1 August 2001.

86 Grounds for issuing effort units

(1) The chief executive may, under subdivision 3, work out a number of effort units to be issued to an effort unit applicant if the applicant has reasonably satisfied the chief executive that the applicant is a small operator.

(2) The chief executive may, under subdivision 4, work out a number of effort units to be issued to an effort unit applicant if the applicant has reasonably satisfied the chief executive that the applicant is not a small operator and that—

- (a) logbook returns show that from 1988 to 1998 a trawl net was used from a boat identified in a licence as follows (a **“relevant licence”**) on a day other than a recorded fishing day—
 - (i) the eligible licence the subject of the application;

- (ii) a former licence or surrendered former licence for the eligible licence; or
 - (b) because of an exceptional circumstance mentioned in subsection (4), the 4 highest years used, under section 81, to make the allocation decision for the applicant do not reflect the applicant's representative level of participation in the fishery.
- (3) However, if an applicant is issued effort units worked out under subdivision 3, the chief executive must not issue the applicant effort units worked out under subdivision 4.
- (4) For subsection (2)(b), the exceptional circumstances are each of the following—
- (a) the applicant first acquired, or obtained an approval from a former fisheries agency for, a relevant licence between 1 January 1995 and 13 November 1998;
 - (b) the applicant acquired the eligible licence the subject of the application after 13 November 1998 and, when it was acquired, the applicant—
 - (i) had no actual or constructive knowledge of the Queensland Fisheries Management Authority media release called 'Investment Advice for Queensland East Coast Trawl Fishery', published on 13 November 1998; or
 - (ii) did not understand the nature or significance of the media release, after having taken all reasonable steps in the circumstances to understand it;
 - (c) the applicant did not hold a relevant licence for the whole of the period from 1988 to 1998 and during the period that the applicant held a relevant licence—
 - (i) the applicant or a close relative of the applicant suffered illness or injury; or
 - (ii) the boat identified in the licence could not be used for trawling.

88 Priority of deciding effort unit applications

In deciding effort unit applications, the chief executive must, as much as practicable, give priority to applicants who—

- (a) claim to be small operators; or
- (b) hold the fewest effort units.

89 Steps after making decision

(1) If effort units are worked out for an effort unit applicant under subdivision 3 or 4, the chief executive must, as soon as practicable, take steps to amend the applicant's effort unit certificate to include the effort units and the fishing days for which they were issued.

(2) The effort units take effect when the amendment is made.

Subdivision 3—Further effort units for small operators

89A Restriction on granting application by small operator

The chief executive must refuse an effort unit application if—

- (a) the chief executive is satisfied the applicant is a small operator; and
- (b) the total of supplementary days already worked out for small operators exceeds 5 000.

90 Effort unit formula

(1) This section provides for how the chief executive must decide the number of effort units if the chief executive is satisfied the applicant is a small operator.

(2) To work out the number of effort units, the chief executive must apply the following formula—

$$\text{EU} = \text{EUCF} \times \text{SD}$$

where—

“EU” means the number of effort units worked out by applying the formula.

“EUCF” means the effort unit conversion factor for—

- (a) the boat identified in the eligible licence; or

- (b) if no boat is identified in the eligible licence—the boat last identified in the licence.

“SD” means the number of supplementary days for the eligible licence, worked out under section 91.

91 Working out supplementary days

(1) For section 90(2), the supplementary days are worked out by applying the following formula—

$$SD = \frac{HD_1 + HD_2 + HD_3 + HD_4}{4} - AD$$

(2) In the formula—

“SD” means the number of supplementary days.

“HD₁” means the highest number of any recorded and logbook days in any year from 1988 to 1998 for the eligible licence.

“HD₂” means the second highest number of any recorded and logbook days in any year from 1988 to 1998 for the eligible licence.

“HD₃” means the third highest number of any recorded and logbook days in any year from 1988 to 1998 for the eligible licence.

“HD₄” means the fourth highest number of any recorded and logbook days in any year from 1988 to 1998 for the eligible licence.

“AD” means the number of allocated days for the eligible licence.

(3) If the total of the supplementary days worked out by applying the formula and all other supplementary days already worked out under this section for small operators would, other than this subsection, exceed 5 000, the number of supplementary days for the eligible licence is the difference between 5000 and the other supplementary days.

(4) In this section—

“logbook days”, for a year, means the days, other than recorded fishing days, shown in logbook returns on which a trawl net was used from a boat identified in—

- (a) the eligible licence; or
- (b) a former licence or surrendered former licence for the eligible licence.

Subdivision 4—Further effort units on other grounds**92 Effort unit formula**

(1) This section provides for how the chief executive must decide the number of effort units other than on the ground that the applicant is a small operator.

(2) To work out the number of effort units, the chief executive must apply the following formula—

$$\text{EU} = \text{EUCF} \times \text{SD}$$

where—

“EU” means the number of effort units worked out by applying the formula.

“EUCF” means the effort unit conversion factor for—

- (a) the boat identified in the eligible licence; or
- (b) if no boat is identified in the eligible licence—the boat last identified in the licence.

“SD” means the number of supplementary days for the eligible licence, worked out under section 93.

93 Working out supplementary days

(1) This section provides for formulae to work out the number of supplementary days for section 92(2).

(2) For a ‘T1’ licence, the formula is—

$$\text{SD} = \left(\frac{(\text{HD}_1 + \text{HD}_2 + \text{HD}_3 + \text{HD}_4)/4}{(\sum \text{HD}_1 + \sum \text{HD}_2 + \sum \text{HD}_3 + \sum \text{HD}_4)/4} \times 94\,080 \right) - \text{AD}$$

(3) For a ‘T2’ licence, the formula is—

$$\text{SD} = \left(\frac{(\text{HD}_1 + \text{HD}_2 + \text{HD}_3 + \text{HD}_4)/4}{(\sum \text{HD}_1 + \sum \text{HD}_2 + \sum \text{HD}_3 + \sum \text{HD}_4)/4} \times 1\,920 \right) - \text{AD}$$

(4) In the formulae—

“AD” means the number of allocated days for the eligible licence.

“SD” means the number of supplementary days.

“**HD₁**” means the highest number of any recorded days and the extra days in any year from 1988 to 1998 for the eligible licence.

“**HD₂**” means the second highest number of any recorded days and the extra days in any year from 1988 to 1998 for the eligible licence.

“**HD₃**” means the third highest number of any recorded days and the extra days in any year from 1988 to 1998 for the eligible licence.

“**HD₄**” means the fourth highest number of any recorded days and the extra days in any year from 1988 to 1998 for the eligible licence.

“**²HRD₁**” means the sum of the highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

“**²HRD₂**” means the sum of the second highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

“**²HRD₃**” means the sum of the third highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

“**²HRD₄**” means the sum of the fourth highest number of recorded fishing days in any year from 1988 to 1998 for each eligible licence of the same type as the eligible licence.

(5) For subsection (4), the extra days for a year are—

- (a) all days for the year shown in logbook returns under section 86(2)(a);¹⁶ and
- (b) a number of other days the chief executive decides that best achieves the purpose of this part.

(6) For subsection (5)(b), the chief executive must not decide a number that places the applicant in a position as if the applicant had more than an average annual participation in the fishery.

16 Section 86 (Grounds for issuing effort units)

Division 5—Additional effort units**94 Decision to issue for ‘T2’ licences**

(1) This section applies if the total allocated and supplementary days for all eligible licences is less than 102 929.

(2) Subject to division 5A, the chief executive must, on or before 24 August 2001, issue additional effort units to each holder of a ‘T2’ licence who has not been issued effort units under division 4, subdivision 3.

(3) The number of additional effort units that must be issued to each holder is worked out by applying the following formula—

$$\text{AEU} = ((\text{AD} + \text{SD}) \times 0.330729167) \times \text{EUCF}$$

where—

“AEU” means the number of additional effort units worked out by applying the formula.

“AD” means the number of allocated days for the licence.

“SD” means the number of supplementary days for the licence.

“EUCF” means the effort unit conversion factor for—

- (a) the boat identified in the licence; or
- (b) if no boat is identified in the licence—the boat last identified in the licence.

(4) If after applying the formula, the number of effort units to be issued is not a whole number, the number of effort units that must be issued is the nearest whole number, rounded up.

95 Decision to issue additional effort units for all eligible licences

(1) This section applies if, after all additional effort units have been issued under section 94, the total fishing days for all effort units is still less than 102 929.

(2) The chief executive may issue further additional effort units to each eligible licence holder.

(3) However, the chief executive must not issue the additional units before—

- (a) the end of the period to appeal against all decisions about effort unit applications (“**effort unit appeals**”); and
- (b) all effort unit appeals are ended or finally decided; and
- (c) if, in deciding an effort unit appeal, the tribunal gave the chief executive directions—the directions have been complied with.

(4) The number of effort units that must be issued is worked out by applying the following formula—

where—

$$\text{EU} = \text{EUCF} \times \left(\frac{\text{RD}}{\text{TEL}} \right)$$

“**EU**” means the number of effort units worked out by applying the formula.

“**EUCF**” means the effort unit conversion factor for—

- (a) the boat identified in the eligible licence; or
- (b) if no boat is identified in the eligible licence—the boat last identified in the licence.

“**RD**” means 102 929, less the total number of fishing days for all effort units when each of the effort units were issued.

“**TEL**” means the total number of eligible licences.

(5) If after applying the formula the number of effort units worked out is not a whole number, the number of effort units that must be issued for the eligible licence is the nearest whole number to the amount worked out, rounded down.

96 Issue of effort units

(1) As soon as practicable after working out, under section 94, the number of effort units to be issued, the chief executive must take steps to amend the relevant effort unit certificates to include the effort units and the days for which they were issued.

(2) The effort units take effect when the amendment is made.

Division 5A—Limit on effort units**96A Application of div 5A**

This division applies if—

- (a) after all effort unit applications have been decided, the total allocated and supplementary days for all eligible licences, would, other than for this division, be more than 102 929; or
- (b) additional effort units must be issued under section 94(2) and, because of the additional effort unit issue, the fishing days for all effort units when each of the effort units were issued, other than for this division, be more than 102 929.

96B Automatic rateable effort unit cancellations

(1) The number of effort units for each eligible licence is, by cancellation, reduced by applying the following formula—

$$\text{REU} = \text{EU} \times (\text{EFD} / \text{TFD})$$

where—

“**REU**” means the number of effort units for the licence by which the total number of effort units for the licence must be reduced, worked out by applying the formula.

“**EU**” means the existing number of effort units for the eligible licence.

“**EFD**” means the number of fishing days that, other than for this section, would have exceeded 102 929.

“**TFD**” means the total number of fishing days for all effort units.

(2) If after applying the formula, the number of effort units to be cancelled for the licence is not a whole number, the number of effort units that must be cancelled is the nearest whole number, rounded up.

96C Notice and taking of effect of cancellation

(1) The chief executive must, as soon as practicable after the cancellation of effort units and reduction of fishing days under section 96B, give each eligible licence holder a replacement effort unit certificate that reflects the cancellation and reduction.

(2) The cancellation for the holder takes effect when the holder is given the replacement effort unit certificate.

Division 6—Effort unit entitlement and use

97 Meaning of “entitlement” of effort unit holder

(1) The effort units held by a person authorise the holder, in an effort year to use the boat identified in the holder’s effort unit certificate for the year for the number of whole fishing days for the units—

- (a) if the units relate to a ‘T1’ licence—
 - (i) generally—the ‘T1’ and ‘T3’ area; and
 - (ii) if the licence also has an ‘M1’ fishery symbol written on it—the ‘M1’ and ‘M2’ area; or
- (b) if the units relate to a ‘T2’ licence—the ‘T2’ area.

(2) Also, if the boat is used for the number of fishing days for the year, the holder is also authorised to use the boat for 14 additional days (“steaming days”).

(3) If the boat is, under this section, used on an allocated or steaming day, the holder has “used” the boat for the allocated or steaming day.

(4) The authorisation under this section is subject to division 9.¹⁷

(5) The authorisation under this section for an effort year is the holder’s “entitlement” under the holder’s effort units for the year.

(6) However, the entitlement applies only while the person holds a ‘T1’ or ‘T2’ licence.

98 When effort unit entitlement is “used” for an effort year

(1) The entitlement of the effort units held by a person is “used” for an effort year—

- (a) when the unit holder has, in that year, used the boat for—
 - (i) the number of whole fishing days for the units; and
 - (ii) 14 steaming days; or

¹⁷ Division 9 (Entitlement of transferee under transferred effort units)

(b) if section 100(2) applies.

(2) The “**unused entitlement**” of a person’s effort units for an effort year is the number of whole fishing and steaming days for the units for the year, for which the boat has not been used.

99 Provisions for working out use of entitlement

(1) This section provides for rules to work out whether the boat identified in an effort unit certificate has been used on a fishing or steaming day to decide whether the entitlement of an effort unit holder has been used.

(2) The period of each fishing and steaming day for the effort units is from midday to midday.

(3) However, if the holder has given the chief executive notice of 24 hours or more that the period of the days is to be—

- (a) from midnight to midnight—the period is from midnight to midnight; or
- (b) from 6 p.m. to 6 p.m.—the period from 6 p.m. to 6 p.m.

(4) Subsection (3)(b) applies only if the eligible licence is also an ‘M1’ licence.

(5) If the holder uses the boat in any part of a fishing or steaming day, the holder is taken to have used the boat for the whole of the day.

(6) Despite subsections (3) to (5)—

- (a) the use of the boat for the whole or part of the first 12 hours of an effort year is not included in the working out of whether the boat has been used on a fishing or steaming day if—
 - (i) under subsection (3)(a), the period of the fishing or steaming day is from midnight to midnight; and
 - (ii) the boat has, in the preceding 12 hours, been used under a fishery symbol; and
- (b) the use of the boat for the whole or part of the first 6 hours of an effort year is not included in the working out of whether the boat has been used on a fishing or steaming day if—
 - (i) under subsection (3)(b), the period of the fishing or steaming day is from 6 p.m. to 6 p.m.; and

- (ii) the boat has, in the preceding 18 hours, been used under a fishery symbol.

(7) In this section—

“**notice**” includes a notice given by facsimile, radio or telephone.

100 No carrying forward of unused entitlement

(1) This section applies if, in an effort year, an effort unit holder fishes on fewer days than the total entitlements under the effort units held by the holder.

(2) The holder is taken, at the end of the effort year, to have used all the entitlements under the effort units held by the holder for the year.

101 Effort unit certificates

(1) The chief executive must, for each effort year, issue a single certificate (an “**effort unit certificate**”) for all effort units for each eligible licence.

(2) The certificate must state the following—

- (a) the holder’s name;
- (b) the following details about the boat identified in the licence—
 - (i) its mark under section 103 of the regulation;
 - (ii) its hull units;
 - (iii) its beam, depth and length;
 - (iv) its effort unit conversion factor;
 - (v) its main engine power in maximum continuous brake kW;
- (c) the effort year to which the certificate applies;
- (d) how many effort units the holder has;
- (e) the number of whole fishing days for the effort units;
- (f) if the chief executive has imposed conditions on the effort units—the conditions.

Division 7—Evidentiary aids for use of entitlement***Subdivision 1—Evidentiary aids for when a fishing or steaming day is used*****102 VMS detection or manual reporting**

(1) This section applies if the boat identified in an effort unit certificate is detected by VMS or manually reported at any time during a day (the “**relevant day**”) within the area stated in section 97(1)¹⁸ for the effort units.

(2) The detection or manual report is evidence that the holder of the units has used the boat for a whole fishing or steaming day for the units.

(3) However, subsection (2) does not apply if—

- (a) an exception for this section stated in subdivision 2 applies for the relevant day; or
- (b) the holder satisfies the chief executive the boat was not used on the relevant day.

102A Absence of VMS detection or reporting

(1) This section applies if at any time during a day (the “**relevant time**”)—

- (a) the VMS maintenance and use obligations applied to a person in control of a boat identified in a ‘T1’ or ‘T2’ licence; and
- (b) the boat is not detected by VMS anywhere; and
- (c) at that time the manual reporting obligation—
 - (i) applied to the person in control of the boat; and
 - (ii) was not being complied with for the boat.

(2) The absence of the detection is evidence that the boat was used for a whole fishing or steaming day in the area stated in section 97(1) for the effort units for the licence.

18 Section 97 (Meaning of “entitlement” of effort unit holder)

(3) However, subsection (2) does not apply if the holder of the effort units satisfies the chief executive that the boat was not being used at the relevant time.

Subdivision 2—Exceptions

103 Exception—movement only at travelling speed

(1) It is an exception for section 102 if, during the whole of the day, the boat is detected by VMS or manually reported as—

- (a) not having moved; or
- (b) having moved at a speed of no less than 5.5 knots.

(2) For subsection (1)(b), if a boat is detected by VMS or manually reported as having moved continuously during a period, the first or last time the boat is detected or manually reported during the period must be disregarded if, at the time, the boat is detected or manually reported as moving at a speed of less than 5.5 knots.

(3) This section does not limit sections 105 and 106.

104 Exception—minimum boat movement

(1) It is an exception for section 102 if, during the whole of the day, the boat is detected by VMS or manually reported as—

- (a) not having moved; or
- (b) having moved no more than the following distance from where the boat was first detected on the day—
 - (i) if the boat is detected or manually reported as being in the deep water net area during any part of the day—1000 m;
 - (ii) otherwise—250 m.

(2) This section does not limit sections 105 and 106.

105 Exception—moving boat without fishing

(1) It is an exception for section 102 if—

- (a) the boat is detected by VMS or manually reported as having moved during a day; and

(b) the conditions mentioned in subsection (2) have been complied with.

(2) For subsection (1)(b), the conditions are as follows—

- (a) the movement is, or is part of, any of the following journeys—
 - (i) from a defined port area to another defined port area;
 - (ii) a defined port area to a place outside the fishery;
 - (iii) a place outside the fishery to a defined port area;
 - (iv) a place outside the fishery to another place outside the fishery;
- (b) the holder or person in control of the boat gave the chief executive notice of the following about the journey before it started—
 - (i) the date and time it will start;
 - (ii) the place it will start;
 - (iii) the proposed destination;
 - (iv) the estimated date and time of arrival at the destination;
 - (v) if the movement involves entering or leaving the fishery's area—each entry or leaving;
 - (vi) the reason for the journey;
- (c) if any fish taken outside the fishery's area are on board the boat—the holder or person in control of the boat gave the chief executive notice of the number or weight of each species of permitted fish before the fish were brought into the area;
- (d) the journey complies, or substantially complies, with the journey stated in the notice;
- (e) during the whole of the journey—
 - (i) no fish taken by the use of a trawl net in the fishery's area are on board the boat; and
 - (ii) the VMS maintenance and use obligations or the manual reporting obligation are complied with for the boat; and
 - (iii) all trawl nets on board the boat are stored inboard the boat and are not suspended from a mast or boom.

(3) However, the trawl nets may be suspended from a mast or boom if the journey is from a defined port area to the nearest northerly or southerly defined port area.

(4) The holder or person in control may, during the journey, by notice to the chief executive (“**amendment notice**”), amend a detail given under subsection (2)(b)(iii), (iv) or (v).

(5) From the giving of the amendment notice, the condition mentioned in subsection (2)(d) is complied with if the rest of the journey complies, or substantially complies with, the notice given under subsection (2)(b), as amended under the amendment notice.

106 Exception—fishing exclusively under fishery symbol for another fishery

(1) It is an exception for section 102 if—

- (a) the boat is detected by VMS or manually reported as having moved during a day; and
- (b) the conditions mentioned in subsection (2) have been complied with.

(2) For subsection (1)(b), the conditions are as follows—

- (a) the movement is, or is part of, a fishing trip that started from a defined port area;
- (b) the holder or person in control of the boat gave the chief executive notice of the following about the fishing trip before it started—
 - (i) the date and time it will start;
 - (ii) where it will start;
 - (iii) the proposed destination;
 - (iv) the estimated date and time of arrival at the destination;
 - (v) each fishery symbol, other than a fishery symbol for the fishery, under which the boat will be used to take fish during the trip;
 - (vi) the date and time the use of the boat to take fish under a fishery symbol mentioned in subparagraph (v) will stop;

- (c) the fishing trip complies, or substantially complies, with the fishing trip stated in the notice;
- (d) during the whole of the fishing trip—
 - (i) there are no trawl nets on board the boat; and
 - (ii) no fish taken by the use of a trawl net in the fishery's area are on board the boat; and
 - (iii) the VMS maintenance and use obligations or the manual reporting obligation are complied with for the boat.

(3) The holder or person in control may, during the fishing trip, by notice to the chief executive (“**amendment notice**”), amend a detail given under subsection (2)(b)(iii) to (vi).

(4) From the giving of the amendment notice, the condition mentioned in subsection (2)(c) is complied with if the rest of the fishing trip complies, or substantially complies, with the notice given under subsection (2)(b), as amended under the amendment notice.

107 Exception—VMS detection in certain closed waters

It is an exception for section 102 if the detection by VMS or manually reporting is within 1 or more of closed waters under the following—

- (a) the first closure periods under sections 11 and 12 and schedule 3, part 1;
- (b) a provision of schedule 3 as follows—
 - section 19
 - section 31
 - section 52
 - section 55
 - section 60 to 62
 - section 71
 - section 87 to 89
 - section 94
 - section 97
 - section 99

- section 103
- section 106
- section 108
- section 112
- section 116
- section 117
- sections 123 to 129
- section 132
- section 136
- section 137
- section 140
- section 141
- section 143
- sections 149 to 152
- sections 154 to 158.

108 Notices to chief executive under sdiv 2

(1) This section applies for a notice to the chief executive under this subdivision.

(2) The notice may relate to a continuous period of more than 1 day.

(3) The notice may be given to the chief executive by—

- (a) telephone to a telecommunications service provider for the chief executive appointed by gazette notice; or
- (b) using VMS equipment in a way that ensures—
 - (i) the notice is given to, and received by, the chief executive instantaneously; and
 - (ii) the chief executive can readily access the information in the notice.

(4) The chief executive may make guidelines for how to give the notice under subsection (3)(b).

(5) The notice is taken to have been given under subsection (3)(b) if, to the extent they are relevant, the guidelines are complied with.

Division 8—Transfer conditions for effort units

111 Purpose of div 8

This division prescribes, for section 65(4)(a)¹⁹ of the Act, conditions for the granting, by the chief executive, of an application to transfer effort units.

112 No transfer applications before first effort year

The application must not be granted if it was made before the start of the first effort year.

113 Only whole effort units may be transferred

A part of an effort unit can not be transferred.

114 Special conditions for effort units for ‘T1’ licence

(1) If the effort units proposed to be transferred are for a ‘T1’ licence, the units may only be transferred to another ‘T1’ licence.

(2) Despite subsection (1), the chief executive may approve a transfer to a ‘T1’ licence of half the effort units for a ‘T2’ licence if the transferor gives the chief executive notice that the transferor surrenders—

- (a) the ‘T2’ licence; and
- (b) the other half of the transferor’s effort units for the ‘T2’ licence.

115 Application for effort unit certificate changes required

(1) The proposed transferor and proposed transferee must apply to the chief executive for effort unit certificate changes that reflect the proposed transfer of the effort units, and their entitlement, to the transferee.

¹⁹ Section 65 (Transfer of authority (other than permit)) of the Act

(2) In this section—

“effort unit certificate changes” means amending, cancelling or issuing effort unit certificates.

116 Required minimum number of fishing days after transfer

(1) The chief executive must not approve the application if, were the transfer to be made, the fishing days for effort units for all eligible licences held by the transferor after the transfer would be less than 50.

- (a) the number that equals 5% of the number of effort units to be transferred (the **“5% number”**);
- (b) if the 5% number is not a whole number—the nearest whole number to the 5% number, rounded up.

(4) A notice can not be given under subsection (3) for an effort unit if notice of the surrender of the unit has already been given for an application to transfer effort units.

(4) A notice can not be given under subsection (3) for an effort unit if notice of the surrender of the unit has already been given for an application to transfer effort units.

Division 9—Entitlement of transferee under transferred effort units

119 Entitlement

(1) The entitlement of the transferee under transferred effort units is the unused entitlement of the transferor under the units immediately before the chief executive approved the transfer.

(2) However, the transferred entitlement only includes an entitlement of the transferor to use a boat on a steaming day if the transferor’s former licence to which the effort units related was also transferred to the transferee.

(3) Subsection (2) does not affect the transferee’s entitlement to use a boat on a steaming day under other effort units.

31 Section 154 (Seizure of fisheries resources in heap etc.) of the Act. Under section 100 (Declared fisheries resources) of the regulation, fish of a species of regulated fish are “declared fisheries resources” for section 154(1) of the Act.

- (d) from midday on 1 November to midday on 20 December—10% of saucer scallops that are less than 9.5 cm;
- (e) from midday on 20 December to midday on 1 January—nil.

225 Other declared fisheries resources

The threshold percentage for declared fisheries resources, other than saucer scallops, is 5%.

PART 2—REVIEW, AMENDMENT OR REPEAL OF PLAN

Division 1—Reviews

226 Review of permitted fish, other than principal fish

The chief executive must, before 1 January 2002, review the fish regulated by number under section 24 to decide—

- (a) whether each species of permitted fish, other than principal fish, should also be regulated by number; and
- (b) if the chief executive decides, under paragraph (a), a species should be regulated by number—the number.

227 General fishing effort review

(1) Before 2004, the chief executive must review this plan to decide whether fishing effort in the fishery is ecologically sustainable.

(2) If the review shows fishing effort in the fishery is not ecologically sustainable, the chief executive must amend this plan before 2006 to reduce fishing effort to—

- (a) achieve ecological sustainability of the fishery; and
- (b) reduce the fishery's impact on the environment.

227A Ecological sustainability action for reef world heritage area

(1) This section applies if, in the reef world heritage area during an effort year as follows, all of the fishing and steaming days are used for the following total number of notional effort units for the year—

- (a) for 2001—2 119 080;
- (b) for 2002—2 055 508;
- (c) for 2003—1 993 843.

(2) The chief executive must amend this plan to include a closed waters declaration that limits effort in the fishery during the year so that no more than the following number of fishing and steaming days are used for the following number of notional effort units for the year—

- (a) for 2001—2 648 849;
- (b) for 2002—2 569 384;

(4) This section does not limit section 227.

(5) In this section—

“notional effort units”, for an effort year, means effort units that would have been worked out under section 78 for each eligible licence had the number of allocated days for the licences been increased by 14.

- (e) the address to which the comments may be made;
- (f) the period (the “**comment period**”) during which any comments must be made to the chief executive.

(3) The comment period must end at least 28 days after the notice is given.

(4) After considering any comments made in the comment period, the chief executive must give notice of where the results of the review can be obtained.

34 Section 103 (Exception—movement only at travelling speed)

(5) A notice under this section may be given only by publication in the gazette and a newspaper circulating generally throughout the State.

Division 3—Amendment or repeal

231 How plan may be amended

36 Section 108 (Serious fisheries offences) of the regulation, also prescribes offences under this plan as serious fisheries offences.

37 See section 77 (Closed season and closed waters offences) of the Act.

Example for subsection (2)—

A holds a commercial fishing boat licence and effort units for the licence. A is convicted of a serious scallop offence. It is A's first conviction. The prescribed criteria is suspension of a number of the effort units that entitles A to use the boat identified in A's effort unit certificate for the licence for 1 to 3 months.

(1) Information from the commercial logbook program for the fishery program is the primary basis for working out the fishery's current status.

(2) The program records—

- (a) actual, but not potential, fishing effort; and
- (b) the location of fishing effort.

(3) The program aids the estimation of—

- (a) fluctuations in catch over seasons and between locations; and
- (b) changes in CPUE.

8 Markets

(1) Most of the fish species taken in the fishery by trawling are for export.

(2) Some fish species taken in the fishery by trawling are sold on the domestic market.

SCHEDULE 1, part 2—Known status (continued)

9 **Aborigines' and Torres Strait Islanders' fishery**

The chief executive does not have reliable information about the taking or use of fish species in the fishery by Aboriginal or Torres Strait Island fishers for tradition or custom.

10 **Catch levels—tables 1–3**

The tables at the end of this part state best estimates of the total of the following data reported by trawler operators fishing in the fishery from 1994 to 1997 under the logbook program for all species and certain stated species—

- (c) the requirements under this plan for using a BRD or TED.

SCHEDULE 2, part 3—Ensuring the sustainability of ecological systems
(continued)

11 How achievement is to be measured

Achievement of the objective may be measured only by surveys or studies, accepted by the chief executive, of commercial fishing for principal fish by trawling in the fishery.

12 Review events

(1) Each of the following is a review event for the achievement of the objective—

- (a) a scientific study, showing levels accepted by the chief executive, shows the amount for any of the following is not, by 1 January 2005, reduced by the following percentage compared with an amount reported in a scientific study showing the levels before the notification day—

PART 1—AIDS TO INTERPRETATION

Division 1—Geographical references

1 References to latitudes and longitudes

(1) Latitudes and longitudes mentioned in this management plan are worked out using the system called the ‘World Geodetic System 1984’ or ‘WGS 84’.

(2) Under the system, the earth is taken to be spheroid with the following characteristics—

- (a) an equatorial (major) radius of 6, 378, 137 m;
- (b) a relationship between its equatorial radius and its polar radius or ‘flattening’ of 298.257223563.

2 References to boundaries, lines, shores and other points

Unless otherwise stated in this plan, the following apply—

- (a) a boundary or line along a shore follows high water mark;
- (b) a boundary or line along a shore intersected by a waterway crosses the waterway by the shortest line between its banks;

- (d) a reference to a shore is a reference to the shore at high water mark;
- (e) reference to a point, the tip of an island or other geographical feature, is a reference to the feature on the shore at high water mark.

SCHEDULE 7, part 1—Aids to interpretation (continued)

3 References to waterways

Unless otherwise stated in this plan, a reference to a waterway is a reference to—

- (a) the waterway upstream of the shortest line between its banks at their junction, at low water, with the body of water into which the waterway finally flows; and
- (b) the foreshores of the waterway.

4 References to banks of waterway

Unless otherwise stated in this plan, a reference to a bank of a waterway is a reference to the bank at its junction, at high water, with the body of water into which it finally flows.

*Division 2—Time periods***5 Start and end of time periods**

SCHEDULE 7—Aids to interpretation and definitions (continued)

PART 3—OTHER EXTENDED DEFINITIONS**34 Working out “hull units” for a boat**

The “**hull units**”, for a boat, must be worked out by applying the following formula—

$$\text{HU} = \frac{\text{L} \times \text{B} \times \text{D} \times 0.6}{2.83}$$

where—

- HU** means the number of hull units for the boat;
- L** means the length of the boat;
- B** means the beam of the boat;
- D** means the depth of the boat.⁵²

35 Meaning of “beam” of a boat

The “**beam**”, of a boat, means the maximum breadth, in metres, amidships between—

- (a) if the boat has a metal shell—the moulded lines of its frame; or
- (b) if the boat does not have a metal shell—the outer surfaces of its hull, excluding sponsons, fenders and rubbing strips.

36 Meaning of “depth” of a boat

(1) The “**depth**”, of the boat, means the vertical distance, measured in metres, from its keel datum to—

- (a) if the boat is, after 15 December 2000, modified or replaced under chapter 3, part 8—a point amidships that is level with the highest point of its uppermost continuous deck; or
- (b) otherwise—

52 The figure of 0.6 represents a block coefficient to standardise variations in boat design and the figure of 2.83 represents a constant which converts cubic metres to units of 100 cubic feet.

SCHEDULE 7, part 3—Other extended definitions (continued)

- (i) for a boat with a stepped uppermost continuous deck the raised part of which extends over amidships—a line of reference extending from the lower part of the deck along a parallel line to the raised part; or
- (ii) if subparagraph (i) does not apply—the underside of its uppermost continuous deck at the side amidships.

(2) In this section—

“amidships”, of a boat, means the vertical plane at the middle of its length at a right angle to its centre-line plane.

“keel datum” means—

- (a) for a composite or wooden boat—the lower edge of its keel rabbet; or
- (b) for a boat in which the form at the lower part of midship section is of a hollow nature or if thick or horizontal garboards are fitted—the point where the line of the hull bottom shell continued inwards cuts the boat’s centre-line; or
- (c) if, because of the boat’s shape, the keel datum can not be worked out under paragraph (a) or (b)—the tangent providing the greatest depth measurement.

The following provisions are not incorporated in this reprint because they had not commenced before the reprint date (see Reprints Act 1992, s 5(c)).

Fisheries (East Coast Trawl) Amendment Management Plan (No. 1) 2001 SL No. 81 s 12 reads as follows—

12 Insertion of new ch 3, pt 4A

Chapter 3—

insert—

‘PART 4A—COMMUNICATION CONDITIONS

‘57A Purpose and application of pt 4A

‘This part prescribes additional conditions to which an ‘M1’, ‘M2’, ‘T1’, ‘T2’ or ‘T3’ licence is subject.

‘57B Obligation to nominate communication mode for boat

‘(1) The holder of the licence must, by notice to the chief executive, nominate a mode by which the chief executive or an inspector may communicate with the person in control of the boat identified in the licence whenever the person is on the boat.

‘(2) The mode—

- (a) can not be by the use of VMS equipment; and
- (b) must be able to be received on the boat instantaneously after the communication is sent by the chief executive or inspector.

Examples of ways that may be nominated—

- A radio on the boat, tuned to a stated radio frequency.
- The number for a facsimile, mobile phone, radiophone or satellite phone on the boat.

‘(3) More than 1 mode may be nominated.

‘(4) The nomination may be changed by notice to the chief executive.

‘57C Obligation to ensure communication with person in control

‘The holder of the licence and the person in control of the boat identified in the licence must take all reasonable steps to ensure the chief executive or an inspector is, whenever the person is on the boat, able to communicate with the person by using a nominated communication mode for the boat.

Example of ‘all reasonable steps’ for section—

The only nominated communication mode for the boat is a radio on the boat, at a stated radio frequency. The holder and the person in control must, when the person is on the boat, ensure the radio is—

- (a) on the boat; and
- (b) in working condition; and
- (c) connected to an appropriate power source and turned on; and
- (d) tuned to the stated frequency; and
- (e) set at a volume that allows the person in control to receive communications from the chief executive or an inspector.’
