## Information about this reprint

This regulation is reprinted as at 12 September 2005. The reprint shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes. Also see list of legislation for any uncommenced amendments.

This page is specific to this reprint. See previous reprints for information about earlier changes made under the Reprints Act 1992. A table of reprints is included in the endnotes.

**Also see endnotes for information about—**

- **when provisions commenced**
- **editorial changes made in earlier reprints.**

### **Dates shown on reprints**

**Reprints dated at last amendment** All reprints produced on or after 1 July 2002, hard copy and electronic, are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If a hard copy reprint is dated earlier than an electronic version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of a hard copy reprint is the same as the date shown for an electronic version previously published, it merely means that the electronic version was published before the hard copy version. Also, any revised edition of the previously published electronic version will have the same date as that version.

**Replacement reprint date** If the date of a hard copy reprint is the same as the date shown on another hard copy reprint it means that one is the replacement of the other.

  - (b) if section 19C applies, before making the plan—
    - (i) make reasonable attempts to consult with the petroleum lease holder about the plan; and
    - (ii) subject to section 19C(3), have regard to any reasonable provisions for the plan proposed by the petroleum lease holder; and
  - (c) implement and maintain the plan.
- (3) A principal hazard management plan made by the mining lease holder may also relate to another coal mining lease—
- (a) that is held by the same holder; and
  - (b) under which coal mining operations are carried out in or adjacent to the area of the petroleum lease.
- (4) The condition of the holder's mining lease mentioned in subsection (2) is taken to have been complied with if—
- (a) a principal hazard management plan (a *mine's principal hazard management plan*) has been implemented under the *Coal Mining Safety and Health Act 1999* for each coal mine operated under the lease at which coal mining operations mentioned in subsection (1) are carried out; and
  - (b) the mine's principal hazard management plan contains all of the matters mentioned in section 19D; and
  - (c) before the mine's principal hazard management plan was made, the consultation requirements under subsection (2)(b) were complied with to the extent the plan was proposed to contain the matters mentioned in section 19D.
- (5) If the holder's mining lease is in force immediately before this section commences, the condition in subsection (2) does not apply for the lease until 6 months after the day this section commences.

**19C Consultation requirement for principal hazard management plan**

  - (3) The guide is intended to help the mining lease holder identify and assess the effects mentioned in subsection (1)(a).

## **19E Resolving disputes about provision proposed by petroleum lease holder**

- (1) This section applies if there is a dispute between the holder of the mining lease and a petroleum lease holder about the reasonableness of a provision proposed by the petroleum lease holder for the mining lease holder's proposed principal hazard management plan for the mining lease.
- (2) Either party may refer the dispute to the chief inspector of coal mines to decide whether the proposed provision is reasonable.
- (3) The referral must be—
  - (a) written; and
  - (b) lodged at the following office (the *relevant office*)—

- (i) the office of the department for lodging the referral, as stated in gazette notice by the chief inspector of coal mines;

- (2) No royalty is payable on the first \$30000 of the combined value of the minerals sold, disposed of or used in a year.
- (3) A person must elect to apply the exemption mentioned in subsection (2) to the first \$30000 of value of only 1 of the minerals, mentioned in subsection (1), sold, disposed of or used in the year.
- (4) However, if less than \$30000 of value of the mineral elected for subsection (3) is sold, disposed of or used in the year, the person may apply the unused part for the mineral to another mineral mentioned in subsection (1).
- (5) In this section—

***unused part***, in relation to a mineral, means the difference between \$30000 and the value of the mineral sold, disposed of or used in a year.

<sup>22</sup> Schedule 4 (Royalty payable for minerals), part 2 (Royalty rates for minerals other than prescribed minerals), section 10 (Other minerals)

**35 Threshold exemption for processed oil shale**

- (1) This section applies to oil shale mined under mining lease 80003.
- (2) No royalty is payable for the oil shale on the value of the first 1600000 barrels of oil processed, from the oil shale, in a calendar year.
- (3) If less than 1600000 barrels are processed from the oil shale in a calendar year—
  - (a) the shortfall for the calendar year may be carried forward to the following calendar year; and
  - (b) if the shortfall is carried forward to the following calendar year—no royalty is payable for the oil shale on the value of the first exempt number of barrels of oil processed, from the oil shale, in the calendar year.
- (4) However, any unused shortfall for a calendar year can not be carried forward beyond the calendar year immediately following the calendar year in which there was a shortfall.
- (5) In this section—

*exempt number*, for a calendar year, means the sum of 1600000 and the shortfall carried forward, under subsection (3)(a), to that year.

*shortfall*, for a calendar year, means the difference between 1600000 and the number of barrels actually processed in the year.

*unused shortfall*, for a calendar year, means any shortfall that was carried forward, under subsection (3)(a), to the year but was not used in the year.

- (6) This section expires on 1 January 2006.

*Example—*

For the years 2002 to 2004, the barrels of oil processed from oil shale mined under mining lease 80003 are as follows—

- 2002—1300000 barrels
- 2003—1700000 barrels
- 2004—2000000 barrels

In 2002, no royalty is payable for the oil shale because the number of barrels of oil processed from the oil shale is below 1600000. Under

subsection (3), the shortfall of 300000 (i.e. 1600000 less 1300000) is carried forward to 2003 so that the exempt number for 2003 is 1900000 (i.e. 1600000 plus 300000).

In 2003, no royalty is payable for the oil shale because the number of barrels of oil processed from the oil shale is below 1900000 (the exempt number). There is no shortfall from 2003 to carry forward because the number of barrels of oil processed from the oil shale (i.e. 1700000) is above 1600000. Also, under subsection (4), the unused shortfall of 200000 (i.e. 1900000 less 1700000) from 2002 can not be carried forward to 2004.

In 2004, royalty is payable for the oil shale on the value of 400000 barrels of oil (i.e. 2000000 less 1600000) and there is no shortfall to be carried forward to 2005.

  - (b) the royalty payable for all minerals, other than base prescribed minerals, sold, disposed of or used in the year or quarter, worked out by adding the royalty payable for each mineral sold, disposed of or used in the year or quarter at the rate stated in schedule 4 for the mineral.

- (2) However, for working out, under subsection (1), the royalty payable for a mineral, any value or amount of the mineral sold, disposed of or used that is exempt under section 34 or 35 must be disregarded.

**38 Adjustment for concessions for particular prescribed minerals—quarterly returns**

- (1) This section applies if—

  - (b) the royalty payable for the quarters to which the royalty returns relate are worked out under section 37; and
  - (c) either—
    - (i) the total combined value of the base prescribed minerals sold, disposed of or used in the year, under the mining operation, for which the royalty payable is worked out at the concessional royalty rate mentioned in section 37 is less than \$4000000; or
    - (ii) the mining operation started or ended in the year.
- (2) The last royalty return for the year must include an adjustment so that—

### **Subdivision 2        Coal seam gas**

#### **41            Value of coal seam gas**

The value of coal seam gas must be worked out in the same way as the value of petroleum is worked out for the Petroleum and Gas (Production and Safety) Act, section 590(3).<sup>23</sup>

### **Subdivision 3        Minerals other than coal seam gas**

#### **42            Meaning of *gross value* of a mineral**

(1) The *gross value* of a mineral is the amount—

- (a) for oil shale if it is processed—for which the oil processed from the oil shale could reasonably have been

---

<sup>23</sup> Petroleum and Gas (Production and Safety) Act, section 590 (Imposition of petroleum royalty on petroleum producers)

- expected to be realised on sale to an arm's length buyer;  
or
- (b) for a prescribed mineral—for which the mineral could, disregarding any cost relating to the processing of the mineral, reasonably have been expected to be realised on sale to an arm's length buyer; or
  - (c) for another mineral—for which the mineral could reasonably have been expected to be realised on sale to an arm's length buyer.
- (2) However, if the mineral was sold and the producer of the mineral has recovered an amount in relation to the royalty payable for the mineral from a buyer, the **gross value** of the mineral is the sum of the amount worked out under subsection (1) and the amount recovered.

#### **43 Working out value of minerals other than coal seam gas**

- (1) The value of a mineral other than coal seam gas must be worked out by—
- (a) working out the gross value of the mineral; and
  - (b) if the mineral is coal—adding, to the gross value, any amount relating to an early despatch of the coal from a port; and
  - (c) subtracting the following amounts from the gross value or, if paragraph (b) applies, the amount worked out by adding the gross value and the amount mentioned in paragraph (b)—
    - (i) any marine cost for the mineral;
    - (ii) if the mineral is a prescribed mineral—the amount the Minister has decided, on reasonable grounds, is the amount that should be subtracted from the gross value to allow for the loss of metal content in the processing of the particular prescribed mineral;
    - (iii) any other cost the Minister has decided, on reasonable grounds, is a type of cost that should be subtracted from the gross value.

- (2) Also, in working out the value of a mineral that is sold, regard must be had to any change in the exchange rate from the time the mineral was sold and the time any payment for the sale is received by the producer.
- (3) In this section—
- marine cost* means—
- (a) for coal—
- (i) a cost relating to a late despatch of the coal from a port; or
- (ii) a freight or an insurance cost relating to the transport of the coal by water to a port outside the State; or
- (b) for another mineral—a freight or an insurance cost relating to the transport, by water, of the mineral or, if the mineral is oil shale that has been processed, the oil processed from the oil shale, to a port outside the State.

sections 31, 32 and 37

### Part 1                      Royalty rates for prescribed minerals

#### 1            Definitions for pt 1

In this part—

*average market price*, for a prescribed mineral, means the average for a return period of the following price, converted to Australian dollars at the hedge settlement rate for each day of the return period—

- (a) for cobalt—the warehouse spot price published in the Metal Bulletin;
- (b) for copper, lead, nickel or zinc—the spot price quoted on the London Metal Exchange;
- (c) for gold—the p.m. fix price quoted on the London Bullion Market;
- (d) for silver—the fix price quoted on the London Bullion Market.

*reference price 1*, for a prescribed mineral, means—

- (a) for cobalt—\$15 for each pound; or
- (b) for copper—\$2640 for each tonne; or
- (c) for gold—\$430 for each troy ounce; or
- (d) for lead—\$740 for each tonne; or
- (e) for nickel—\$8300 for each tonne; or
- (f) for silver—\$5 for each troy ounce; or
- (g) for zinc—\$1455 for each tonne.

- (g) for zinc—\$2300 for each tonne.

## 2 Fixed royalty rate

The fixed royalty rate for a prescribed mineral is 2.7% of the value of the prescribed mineral.

## 3 Variable royalty rate

- (1) The variable royalty rate for a prescribed mineral is—
  - (a) if the average market price for the mineral is lower than reference price 1 for the mineral—1.5% of the value of the prescribed mineral; or
  - (b) if the average market price for the mineral is, or is higher than, reference price 1 for the mineral but lower than reference price 2 for the mineral—the prescribed percentage of the value of the prescribed mineral; or
  - (c) if the average market price for the mineral is, or is higher than, reference price 2 for the mineral but lower

## Schedule 4 (continued)

than reference price 3 for the mineral—the prescribed percentage of the value of the prescribed mineral; or

- (d) if the average market price for the mineral is higher than reference price 3 for the mineral—4.5% of the value of the prescribed mineral.

- (2) In this section—

**prescribed percentage** means—the amount, expressed as a percentage, rounded down to nearest increment of 0.02%, worked out by using the following formula—

$$PP = RR + \frac{PD}{N \times RFD}$$

where—

**PP** is the prescribed percentage.

**RR** is—

- (a) for subsection (1)(b)—1.5; or  
 (b) for subsection (1)(c)—2.5.

**PD** is the difference between the average market price and—

- (a) for subsection (1)(b)—reference price 1; or  
 (b) for subsection (1)(c)—reference price 2.

**N** is—

- (a) for subsection (1)(b)—1; or  
 (b) for subsection (1)(c)—0.5.

**RFD** is the difference between—

- (a) for subsection (1)(b)—reference prices 1 and 2; or  
 (b) for subsection (1)(c)—reference prices 2 and 3.

*Example—*

If, for a quarter, the average market price for copper is \$3045 for each tonne of copper, the variable rate of royalty for copper for the quarter must be worked out under subsection (1)(b) given the average market price is higher than reference price 1 for copper (\$2640) but lower than reference price 2 for copper (\$3300). The variable rate of royalty would be 2.10% being the amount (2.1136%) worked out by using the formula

## Schedule 4 (continued)

in subsection (2), definition *prescribed percentage*, rounded down to the nearest increment of 0.02%.

## Part 2 Royalty rates for minerals other than prescribed minerals

## 2 Bauxite

The royalty rate for bauxite is—

- (a) if the bauxite is mined for consumption outside the State—the higher of the following—
  - (i) 10% of the value of the bauxite;
  - (ii) \$1 for each tonne of bauxite; or

## Schedule 4 (continued)

- (b) if the bauxite is mined for consumption within the State—half the royalty rate mentioned in paragraph (a).

**3 Coal**

The royalty rate for coal is 7% of the value of the coal.

**4 Corundum, gemstones and other precious stones**

The royalty rate for corundum, gemstones or other precious stones is 2.7% of the value of the corundum, gemstones or precious stones.

**5 Coal seam gas**

The royalty rate for coal seam gas is the rate applying to petroleum under the Petroleum and Gas (Production and Safety) Act, section 590.<sup>64</sup>

**5A Manganese, rare earths and tantalum**

The royalty rate for manganese, rare earths and tantalum is 2.7% of the value of the manganese, rare earth or tantalum.

**6 Mineral sands**

- (1) The royalty rate for a concentrate of a mineral sand is 5% of the value of the concentrate.
- (2) In this section—  
*mineral sand* includes the following—
- (a) anatase;
  - (b) ilmenite;
  - (c) leucoxene;

---

<sup>64</sup> Petroleum and Gas (Production and Safety) Act, section 590 (Imposition of petroleum royalty on petroleum producers)

## Schedule 4 (continued)

- (d) monazite;
- (e) rutile;
- (f) zircon.

**7 Phosphate**

- (1) The royalty rate for phosphate rock is the higher of the following—
- (a) 80 cents for each tonne of phosphate rock;
  - (b) the rate, rounded down to 2 decimal places, for each tonne of phosphate rock worked out using the following formula—

$$R = \$1 \times \frac{G}{32.3} \times \frac{P_{curr}}{\$72.50}$$

where—

*R* is the royalty rate.

*G* is the average P<sub>2</sub>O<sub>5</sub> content of the phosphate rock for the return period.

*P<sub>curr</sub>* is the average price for the return period, converted to Australian dollars at the average hedge settlement rate for the return period, of Moroccan phosphate rock with 32.3% P<sub>2</sub>O<sub>5</sub> content.<sup>65</sup>

- (2) In this section—

*average hedge settlement rate*, for a return period, means the average, worked out for the return period, of the hedge settlement rates for each day in the return period.

*Example for subsection (1)*—

For a quarter—

- the average P<sub>2</sub>O<sub>5</sub> content of phosphate rock is 24%

---

<sup>65</sup> The price, in US dollars, of Moroccan phosphate rock with 32.3% P<sub>2</sub>O<sub>5</sub> content is published in the magazine called Fertilizer Week.

## Schedule 4 (continued)

- the average price of Moroccan phosphate rock with 32.3% P<sub>2</sub>O<sub>5</sub> content is US\$46
- the average hedge settlement rate is 65c.

The rate under subsection (1)(b), by applying the formula, is 72.53c. Therefore, the royalty rate is 80c for each tonne of the phosphate rock.

## 8 Processed oil shale

- (1) The royalty rate for oil shale that is processed is the lesser of the following—
  - (a) 10% of the value of the oil processed from the oil shale; or
  - (b) the WTI%, rounded to 2 decimal places, of the value of the oil processed from the oil shale.
- (2) For subsection (1)(b), the WTI% must be worked out using the following formula—

$$\text{WTI}\% = \left( \left[ \frac{\text{CPI}_{\text{BASE}}}{\text{CPI}_{\text{NOW}}} \times \text{WTI} \right]^2 \div 1000 \right) + 0.5$$

where—

*CPI*<sub>BASE</sub> is 110.0.

*CPI*<sub>NOW</sub> is the CPI for the calendar quarter for which the royalty for oil shale is being worked out.

*WTI* is the average crude oil price.

- (3) In this section—
 

*average crude oil price* means the ‘Crude Oil West Texas—Spot—Last’ price published in the Australian Financial Review—

  - (a) converted to Australian dollars at the hedge settlement rate for each day of trading in the calendar quarter for which the royalty payable for oil shale is being worked out; and
  - (b) averaged over the calendar quarter for which the royalty payable for oil shale is being worked out.

### Schedule 4 (continued)

**CPI** means the ‘Consumer Price Index: All Groups Index Numbers—Weighted Average of 8 Capital Cities’ published by the Australian Bureau of Statistics.

*Example for subsection (1)—*

For a calendar quarter—

- the CPI is 134.2; and
- the WTI is \$A30.

The WTI%, worked out using the formula in subsection (2), is 1.10%. Therefore, the royalty rate for oil would be 1.10% of the oil’s value.

## 9 Silica—1 July 2005 to 30 June 2006

- (1) This section provides for the royalty rate for silica from 1 July 2005 to 30 June 2006.
- (2) If 50c for each tonne of the silica is higher than 5% of the value of the silica, the rate is \$0.70 for each tonne of the silica.
- (3) If subsection (2) does not apply, the rate is the lower of the following—
  - (a) \$0.90 for each tonne of the silica;
  - (b) the total of—
    - (i) 5% of the value of the silica; and
    - (ii) 50% of the difference between 5% of the value of the silica and 90c for each tonne of the silica.

*Example for paragraph (b)—*

5% of the value of silica is equivalent to 80c for each tonne of the silica. 50% of the difference between 80c and 90c for each tonne of the silica is 5c. The royalty rate would be 85c for each tonne of the silica.

## 10 Other minerals

The royalty rate for a mineral for which a royalty rate is not already stated in this schedule is 2% of the value of the mineral.
