Information about this reprint

This regulation is reprinted as at 9 May 2008. The reprint—

- shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c))
- incorporates all necessary consequential amendments, whether of punctuation, numbering or another kind (Reprints Act 1992 s 5(d)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes. Also see list of legislation for any uncommenced amendments.

Minor editorial changes allowed under the provisions of the Reprints Act 1992 mentioned in the following list have also been made to—

- use standard punctuation consistent with current drafting practice (s 27)
- use aspects of format and printing style consistent with current drafting practice (s 35).

This page is specific to this reprint. See previous reprints for information about earlier changes made under the Reprints Act 1992. A table of reprints is included in the endnotes.

Also see endnotes for information about—

- **when provisions commenced**
- **editorial changes made in earlier reprints.**

Dates shown on reprints

Reprints dated at last amendment All reprints produced on or after 1 July 2002, authorised and electronic, are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If an authorised reprint is dated earlier than an electronic version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of an authorised reprint is the same as the date shown for an electronic version previously published, it merely means that the electronic version was published before the authorised version. Also, any revised edition of the previously published electronic version will have the same date as that version.

Replacement reprint date If the date of an authorised reprint is the same as the date shown on another authorised reprint it means that one is the replacement of the other.

(ii) adjacent to the area of a petroleum lease (an *adjacent petroleum lease*); and

(b) the coal mining operations physically affect, or may physically affect—

(i) the safety of persons or plant in the area of the petroleum lease; or

(ii) the efficiency with which the authorised activities under the petroleum lease can be carried out.

(2) It is a condition of the mining lease that the holder must—

(a) before the coal mining operations commence, make a principal hazard management plan for the mining lease that complies with section 19D; and

(b) if section 19C applies, before making the plan—

(i) make reasonable attempts to consult with the petroleum lease holder about the plan; and

(ii) subject to section 19C(3), have regard to any reasonable provisions for the plan proposed by the petroleum lease holder; and

- (c) implement and maintain the plan.
- (3) A principal hazard management plan made by the mining lease holder may also relate to another coal mining lease—
 - (a) that is held by the same holder; and
 - (b) under which coal mining operations are carried out in or adjacent to the area of the petroleum lease.
- (4) The condition of the holder's mining lease mentioned in subsection (2) is taken to have been complied with if—
 - (a) a principal hazard management plan (a *mine's principal hazard management plan*) has been implemented under the *Coal Mining Safety and Health Act 1999* for each coal mine operated under the lease at which coal mining operations mentioned in subsection (1) are carried out; and

authorised activities under the petroleum lease;
or

- (b) a change in water that may show fluid interconnections with an adjacent petroleum lease

(iii) state the reporting procedures.

- (2) The potential hazard guide in schedule 2A is a list of potential hazards that may be created by coal mining operations in relation to exploring for or producing coal seam gas or petroleum.
- (3) The guide is intended to help the mining lease holder identify and assess the effects mentioned in subsection (1)(a).

19E Resolving disputes about provision proposed by petroleum lease holder

- (1) This section applies if there is a dispute between the holder of the mining lease and a petroleum lease holder about the reasonableness of a provision proposed by the petroleum lease holder for the mining lease holder's proposed principal hazard management plan for the mining lease.
- (2) Either party may refer the dispute to the chief inspector of coal mines to decide whether the proposed provision is reasonable.
- (3) The referral must be—

Division 3 Working out values of minerals

Subdivision 1 Preliminary

This division applies to a mineral for which, under division 2, royalty payable in relation to the mineral must be worked out by reference to the value of the mineral.

Subdivision 2 Coal seam gas

41 Value of coal seam gas

The value of coal seam gas must be worked out in the same way as the value of petroleum is worked out for the Petroleum and Gas (Production and Safety) Act, section 590(3).²³

Subdivision 3 Minerals other than coal seam gas

42 Meaning of *gross value* of a mineral

- (1) The *gross value* of a mineral is the amount—
 - (a) for oil shale if it is processed—for which the oil processed from the oil shale could reasonably have been expected to be realised on sale to an arm's length buyer; or
 - (b) for a prescribed mineral—for which the mineral could, disregarding any cost relating to the processing of the mineral, reasonably have been expected to be realised on sale to an arm's length buyer; or
 - (c) for another mineral—for which the mineral could reasonably have been expected to be realised on sale to an arm's length buyer.
- (2) However, if the mineral was sold and the producer of the mineral has recovered an amount in relation to the royalty payable for the mineral from a buyer, the *gross value* of the mineral is the sum of the amount worked out under subsection (1) and the amount recovered.

43 Working out value of minerals other than coal seam gas

- (1) The value of a mineral other than coal seam gas must be worked out by—
 - (a) working out the gross value of the mineral; and

²³ Petroleum and Gas (Production and Safety) Act, section 590 (Imposition of petroleum royalty on petroleum producers)

- (b) if the mineral is coal—adding, to the gross value, any amount relating to an early despatch of the coal from a port; and
 - (c) subtracting the following amounts from the gross value or, if paragraph (b) applies, the amount worked out by adding the gross value and the amount mentioned in paragraph (b)—
 - (i) any marine cost for the mineral;
 - (ii) if the mineral is a prescribed mineral—the amount the Minister has decided, on reasonable grounds, is the amount that should be subtracted from the gross value to allow for the loss of metal content in the processing of the particular prescribed mineral;
 - (iii) any other cost the Minister has decided, on reasonable grounds, is a type of cost that should be subtracted from the gross value.
- (2) Also, in working out the value of a mineral that is sold, regard must be had to any change in the exchange rate from the time the mineral was sold and the time any payment for the sale is received by the producer.
- (3) In this section—
- marine cost*** means—
- (a) for coal—
 - (i) a cost relating to a late despatch of the coal from a port; or
 - (ii) a freight or an insurance cost relating to the transport of the coal by water to a port outside the State; or

Schedule 4 Royalty payable for minerals

sections 31, 32 and 37

Part 1 Royalty rates for prescribed minerals

1 Definitions for pt 1

In this part—

average market price, for a prescribed mineral, means the average for a return period of the following price, converted to Australian dollars at the hedge settlement rate for each day of the return period—

- (a) for cobalt—the warehouse spot price published in the Metal Bulletin;
- (b) for copper, lead, nickel or zinc—the spot price quoted on the London Metal Exchange;

- (d) for silver—the fix price quoted on the London Bullion Market.

reference price 1, for a prescribed mineral, means—

- (a) for cobalt—\$15 for each pound; or

2 Fixed royalty rate

The fixed royalty rate for a prescribed mineral is 2.7% of the value of the prescribed mineral.

3 Variable royalty rate

- (1) The variable royalty rate for a prescribed mineral is—
 - (a) if the average market price for the mineral is lower than reference price 1 for the mineral—1.5% of the value of the prescribed mineral; or
 - (b) if the average market price for the mineral is, or is higher than, reference price 1 for the mineral but lower than reference price 2 for the mineral—the prescribed percentage of the value of the prescribed mineral; or
 - (c) if the average market price for the mineral is, or is higher than, reference price 2 for the mineral but lower

Schedule 4 (continued)

than reference price 3 for the mineral—the prescribed percentage of the value of the prescribed mineral; or

- (d) if the average market price for the mineral is higher than reference price 3 for the mineral—4.5% of the value of the prescribed mineral.

- (2) In this section—

prescribed percentage means—the amount, expressed as a percentage, rounded down to nearest increment of 0.02%, worked out by using the following formula—

$$PP = RR + \frac{PD}{N \times RFD}$$

where—

PP is the prescribed percentage.

RR is—

- (a) for subsection (1)(b)—1.5; or
 (b) for subsection (1)(c)—2.5.

PD is the difference between the average market price and—

- (a) for subsection (1)(b)—reference price 1; or
 (b) for subsection (1)(c)—reference price 2.

N is—

- (a) for subsection (1)(b)—1; or
 (b) for subsection (1)(c)—0.5.

RFD is the difference between—

- (a) for subsection (1)(b)—reference prices 1 and 2; or
 (b) for subsection (1)(c)—reference prices 2 and 3.

Example—

If, for a quarter, the average market price for copper is \$3045 for each tonne of copper, the variable rate of royalty for copper for the quarter must be worked out under subsection (1)(b) given the average market price is higher than reference price 1 for copper (\$2640) but lower than reference price 2 for copper (\$3300). The variable rate of royalty would be 2.10% being the amount (2.1136%) worked out by using the formula

Schedule 4 (continued)

in subsection (2), definition *prescribed percentage*, rounded down to the nearest increment of 0.02%.

Part 2 Royalty rates for minerals other than prescribed minerals

| 33 Wollastonite | 0.50 |

a See section 236(3) (Entitlement to use sand, gravel and rock) of the Act.

2 Bauxite

The royalty rate for bauxite is—

- (a) if the bauxite is mined for consumption outside the State—the higher of the following—
- (i) 10% of the value of the bauxite;
 - (ii) \$1 for each tonne of bauxite; or

Schedule 4 (continued)

- (b) if the bauxite is mined for consumption within the State—half the royalty rate mentioned in paragraph (a).

3 Coal

The royalty rate for coal is 7% of the value of the coal.

4 Corundum, gemstones and other precious stones

The royalty rate for corundum, gemstones or other precious stones is 2.7% of the value of the corundum, gemstones or precious stones.

5 Coal seam gas

The royalty rate for coal seam gas is the rate applying to petroleum under the Petroleum and Gas (Production and Safety) Act, section 590.⁵³

5A Manganese, rare earths and tantalum

The royalty rate for manganese, rare earths and tantalum is 2.7% of the value of the manganese, rare earth or tantalum.

6 Mineral sands

- (1) The royalty rate for a concentrate of a mineral sand is 5% of the value of the concentrate.
- (2) In this section—
mineral sand includes the following—
- (a) anatase;
 - (b) ilmenite;
 - (c) leucoxene;

⁵³ Petroleum and Gas (Production and Safety) Act, section 590 (Imposition of petroleum royalty on petroleum producers)

Schedule 4 (continued)

- (d) monazite;
- (e) rutile;
- (f) zircon.

7 Phosphate

- (1) The royalty rate for phosphate rock is the higher of the following—
- (a) 80 cents for each tonne of phosphate rock;
 - (b) the rate, rounded down to 2 decimal places, for each tonne of phosphate rock worked out using the following formula—

$$R = \$1 \times \frac{G}{32.3} \times \frac{P_{curr}}{\$72.50}$$

where—

R is the royalty rate.

G is the average P₂O₅ content of the phosphate rock for the return period.

P_{curr} is the average price for the return period, converted to Australian dollars at the average hedge settlement rate for the return period, of Moroccan phosphate rock with 32.3% P₂O₅ content.⁵⁴

- (2) In this section—

average hedge settlement rate, for a return period, means the average, worked out for the return period, of the hedge settlement rates for each day in the return period.

Example for subsection (1)—

For a quarter—

- the average P₂O₅ content of phosphate rock is 24%

⁵⁴ The price, in US dollars, of Moroccan phosphate rock with 32.3% P₂O₅ content is published in the magazine called Fertilizer Week.

Schedule 4 (continued)

- the average price of Moroccan phosphate rock with 32.3% P₂O₅ content is US\$46
- the average hedge settlement rate is 65c.

The rate under subsection (1)(b), by applying the formula, is 72.53c. Therefore, the royalty rate is 80c for each tonne of the phosphate rock.

8 Processed oil shale

- (1) The royalty rate for oil shale that is processed is the lesser of the following—
 - (a) 10% of the value of the oil processed from the oil shale; or
 - (b) the WTI%, rounded to 2 decimal places, of the value of the oil processed from the oil shale.
- (2) For subsection (1)(b), the WTI% must be worked out using the following formula—

$$\text{WTI}\% = \left(\left[\frac{\text{CPI}_{\text{BASE}}}{\text{CPI}_{\text{NOW}}} \times \text{WTI} \right]^2 \div 1000 \right) + 0.5$$

where—

CPI_{BASE} is 110.0.

CPI_{NOW} is the CPI for the calendar quarter for which the royalty for oil shale is being worked out.

WTI is the average crude oil price.

- (3) In this section—

average crude oil price means the ‘Crude Oil West Texas—Spot—Last’ price published in the Australian Financial Review—

 - (a) converted to Australian dollars at the hedge settlement rate for each day of trading in the calendar quarter for which the royalty payable for oil shale is being worked out; and
 - (b) averaged over the calendar quarter for which the royalty payable for oil shale is being worked out.

Schedule 4 (continued)

CPI means the ‘Consumer Price Index: All Groups Index Numbers—Weighted Average of 8 Capital Cities’ published by the Australian Bureau of Statistics.

Example for subsection (1)—

For a calendar quarter—

- the CPI is 134.2; and
- the WTI is \$A30.

The WTI%, worked out using the formula in subsection (2), is 1.10%. Therefore, the royalty rate for oil would be 1.10% of the oil’s value.

9 Silica—1 July 2005 to 30 June 2006

- (1) This section provides for the royalty rate for silica from 1 July 2005 to 30 June 2006.
- (2) If 50c for each tonne of the silica is higher than 5% of the value of the silica, the rate is \$0.70 for each tonne of the silica.
- (3) If subsection (2) does not apply, the rate is the lower of the following—
 - (a) \$0.90 for each tonne of the silica;
 - (b) the total of—
 - (i) 5% of the value of the silica; and
 - (ii) 50% of the difference between 5% of the value of the silica and 90c for each tonne of the silica.

Example for paragraph (b)—

5% of the value of silica is equivalent to 80c for each tonne of the silica. 50% of the difference between 80c and 90c for each tonne of the silica is 5c. The royalty rate would be 85c for each tonne of the silica.

10 Other minerals

The royalty rate for a mineral for which a royalty rate is not already stated in this schedule is 2% of the value of the mineral.
