Editor's note—

This Act (other than sections 1–2, part 11 (other than sections 40–41 and 48) and part 14 (other than sections 108–109 and 116)) had not commenced on or before the reprint date.

Part 1 Preliminary

1 Short title

This Act may be cited as the *Clean Energy Act 2008*.

2 Commencement

The provisions of the Act, other than the following provisions, commence on a day to be fixed by proclamation—

- (a) part 11, other than sections 40, 41 and 48;
- (b) part 14, other than sections 108, 109 and 116.

[s 3]

3 Main object

The main object of this Act is to improve the efficiency and management of the use of energy, and the conservation of energy, in relation to particular businesses and other activities.

Part 2 Interpretation

4 Definitions

The dictionary in schedule 2 defines particular words used in this Act.

5 Who is the regulator

*The **regulator** is the chief executive.*

6 Meaning of participating business

- (1) *A **participating business** is a person—*
 - (a) *who operates a business or carries out another activity at a site that used 10 terajoules or more of energy, but less than 500 terajoules of energy, in the most recently completed baseline year for the person; and*
 - (b) *who is not registered, and is not required to be registered, under the Energy Efficiency Opportunities Act 2006 (Cwlth), part 4.*
- (2) *If the person is a participating business for 2 or more sites, a provision of this Act that applies to a participating business applies to the person separately in relation to each site for which the person is a participating business.*
- (3) *A government entity within the meaning of the Government Owned Corporations Act 1993, section 5, other than a GOC*

*issued with a generation authority under the Electricity Act 1994, is not a **participating business**.*

7 Meaning of energy use threshold

- (1) *An **energy use threshold**, for a financial year, is the total amount of energy used by a person's business or other activity at a site in the financial year, if the amount used is 10 terajoules or more, but less than 500 terajoules.*
- (2) *An energy use threshold for a financial year is a **level 1 threshold** if the total amount of energy used in the financial year is 100 terajoules or more, but less than 500 terajoules.*
- (3) *An energy use threshold for a financial year is a **level 2 threshold** if the total amount of energy used in the financial year is 30 terajoules or more, but less than 100 terajoules.*
- (4) *An energy use threshold for a financial year is a **level 3 threshold** if the total amount of energy used in the financial year is 10 terajoules or more, but less than 30 terajoules.*

Part 3 Energy use information

8 Energy provider must give regulator information about energy use

- (1) *An energy provider must give the regulator, within 2 months after the end of a financial year, the name and address of any customer the energy provider has supplied with 10 terajoules or more of energy, but less than 500 terajoules of energy, at the site of the customer, in the financial year.*

Maximum penalty—200 penalty units.

- (2) *An energy provider does not commit an offence under subsection (1) if compliance with the provision would be unlawful under another law of the State or a law of the Commonwealth.*

[s 9]

(3) *In this section—*

energy provider means any of the following entities if the regulator has given the entity written notice that this section applies to the entity—

Note—

A written notice would be likely to be given under subsection (1) approximately every 5 years to ensure that a participating business has a current energy savings plan under section 16.

(2) *The person must give the regulator the information within 2 months after the end of the baseline year, or 2 months after receiving the notice, whichever is later.*

Maximum penalty—200 penalty units.

(3) *The regulator must give the person an information notice for the decision of the regulator that the person is or may be a participating business.*
