

Water Fluoridation Act 2008

Water Fluoridation Regulation 2008

Reprinted as in force on 24 July 2009

Reprint No. 1A

**This reprint is prepared by
the Office of the Queensland Parliamentary Counsel
Warning—This reprint is not an authorised copy**

Information about this reprint

This regulation is reprinted as at 24 July 2009. The reprint shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes. Also see list of legislation for any uncommenced amendments.

This page is specific to this reprint. See previous reprint for information about earlier changes made under the Reprints Act 1992. A table of reprints is included in the endnotes.

Also see endnotes for information about—

- **when provisions commenced**
- **editorial changes made in earlier reprint.**

Spelling

The spelling of certain words or phrases may be inconsistent in this reprint or with other reprints because of changes made in various editions of the Macquarie Dictionary (for example, in the dictionary, ‘lodgement’ has replaced ‘lodgment’). Variations of spelling will be updated in the next authorised reprint.

Dates shown on reprints

Reprints dated at last amendment All reprints produced on or after 1 July 2002, authorised (that is, hard copy) and unauthorised (that is, electronic), are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If an authorised reprint is dated earlier than an unauthorised version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of an authorised reprint is the same as the date shown for an unauthorised version previously published, it merely means that the unauthorised version was published before the authorised version. Also, any revised edition of the previously published unauthorised version will have the same date as that version.

Replacement reprint date If the date of an authorised reprint is the same as the date shown on another authorised reprint it means that one is the replacement of the other.

Water Fluoridation Regulation 2008

[as amended by all amendments that commenced on or before 24 July 2009]

1 Short title

This regulation may be cited as the *Water Fluoridation Regulation 2008*.

2 Commencement

This regulation commences on 5 December 2008.

3 Definitions

The dictionary in schedule 3 defines particular words used in this regulation.

4 Prescribed dates—Act, s 7

- (1) This section applies to a public potable water supplier mentioned in schedule 1, column 1 for a relevant public potable water supply mentioned opposite in schedule 1, column 2.
- (2) For the Act, section 7, the public potable water supplier must add fluoride to the water supply before the date mentioned opposite in schedule 1, column 3.

4A Naturally occurring fluoride concentration—Act, s 8(1)(a)

For the Act, section 8(1)(a), the minimum and maximum concentrations prescribed for a water supply containing naturally occurring fluoride are—

- (a) if the water supply is located in the local government area of a local government listed in schedule 2, part 1—the minimum concentration of 0.5mg/L and the maximum concentration of 0.7mg/L; or

[s 5]

- (b) if the water supply is located in the local government area of a local government listed in schedule 2, part 2—the minimum concentration of 0.6mg/L and the maximum concentration of 0.8mg/L; or
- (c) if the water supply is located in the local government area of a local government listed in schedule 2, part 3—the minimum concentration of 0.7mg/L and the maximum concentration of 0.9mg/L.

5 Forms of fluoride—Act, s 12(a)

For the Act, section 12(a), the forms of fluoride that a public potable water supplier for a public potable water supply may add to the water supply are the following—

- (a) sodium fluoride (NaF);
- (b) sodium fluorosilicate (Na_2SiF_6);
- (c) fluorosilicic acid (H_2SiF_6).

6 Fluoride concentration—Act, s 12(b)

- (1) For the Act, section 12(b), a public potable water supplier for a public potable water supply that adds fluoride to the water supply must maintain the prescribed fluoride concentration, for the water supply, mentioned in subsection (2).
- (2) The prescribed fluoride concentration for the water supply is—
 - (a) if the water supply is located in the local government area of a local government listed in schedule 2, part 1—0.6mg/L; or
 - (b) if the water supply is located in the local government area of a local government listed in schedule 2, part 2—0.7mg/L; or
 - (c) if the water supply is located in the local government area of a local government listed in schedule 2, part 3—0.8mg/L.

-
- (3) The public potable water supplier complies with subsection (1) if the measured fluoride concentration for the water supply for each day averaged over a quarter is within 0.1mg/L of the prescribed fluoride concentration for the water supply.
 - (4) The prescribed fluoride concentration for the water supply includes the concentration of naturally occurring fluoride present in the water supply.
 - (5) In this section—

local government area see *Local Government Act 1993*, schedule 2.

measured fluoride concentration, for the water supply, means the fluoride concentration of the water supply that is measured by a prescribed analysis carried out under section 13(2)(b).

7 Fluoridation equipment—Act, s 12(b)

- (1) For the Act, section 12(b), a public potable water supplier for a public potable water supply that adds fluoride to the water supply must ensure—
 - (a) its fluoridation equipment is kept separate from its other water treatment equipment in a separate building or room; and
 - (b) its stocks of fluoride are kept—
 - (i) separated from other substances used by it for water treatment in a separate building or room; and
 - (ii) under weatherproof conditions.
- (2) The public potable water supplier must use automatic fluoride dosing equipment that—
 - (a) has the rate of feed of the fluoride compound paced to the flow of the water; and
 - (b) has water flow measuring devices, 1 of which is a flow meter; and
 - (c) is interlocked.

[s 8]

(3) If the automatic fluoride dosing equipment used by the public potable water supplier has not been in operation for a continuous period of 2 weeks, the public potable water supplier must, within 1 day after the end of the period, give the chief executive a notice, in the approved form, of its non-operation for the period.

(4) In this section—

flow meter means a device that measures the rate of flow of water.

interlocked means linked in a way to ensure that if part of the automatic fluoride dosing equipment fails, the entire fluoride dosing system is shut down.

8 Fluoridation notice

For the Act, section 13, the fluoridation notice must be in the approved form.

9 Prescribed entity—Act, s 73(b)

For the Act, section 73(b), NATA is an entity.

10 Recording requirements

(1) A public potable water supplier for a public potable water supply that adds fluoride to the water supply must record for each day—

- (a) the volume of water to which it has added fluoride; and
- (b) the amount of fluoride it has added, including an amount of zero; and
- (c) the calculated fluoride concentration of the fluoridated water; and
- (d) the fluoride concentration of the fluoridated water, measured by a prescribed analysis carried out under section 13(2)(b).

(2) A record mentioned in subsection (1) must be made—

- (a) in the approved form; and
 - (b) before the end of the day to which the record relates.
- (3) In this section—

calculated fluoride concentration, of the fluoridated water, means the concentration of the fluoridated water worked out by applying the following formula—

$$\frac{A}{B} + C$$

where—

A means the amount of fluoride that the public potable water supplier adds to the volume of water.

B means the volume of water to which the public potable water supplier has added the fluoride.

C means the concentration of the naturally occurring fluoride contained in the water supply before fluoride is added to the water supply.

11 Reporting requirements

- (1) A public potable water supplier for a public potable water supply that adds fluoride to the water supply must prepare a report for each quarter stating—
- (a) the number of samples of the fluoridated water taken by the public potable water supplier in the quarter; and
 - (b) the average fluoride concentration of the fluoridated water measured by a prescribed analysis carried out under section 13(2)(b) for the quarter; and
 - (c) the maximum fluoride concentration of the fluoridated water measured by a prescribed analysis carried out under section 13(2)(b) for the quarter; and
 - (d) the minimum fluoride concentration of the fluoridated water measured by a prescribed analysis carried out under section 13(2)(b) for the quarter.
- (2) The report must be in the approved form.

[s 12]

- (3) The report must be given to the chief executive within 30 business days after the end of each quarter.

12 Persons employed in operating equipment

A public potable water supplier for a public potable water supply that adds fluoride to the water supply must ensure each person employed in operating equipment used in relation to adding fluoride to the water supply has the necessary training, knowledge and experience.

13 Analysis of fluoridated water

- (1) This section applies to a public potable water supplier for a public potable water supply that adds fluoride to the water supply.
- (2) The public potable water supplier must each day—
 - (a) collect at least 1 sample of the fluoridated water from the water supply at a point where the fluoridated water has a consistent concentration of fluoride; and
 - (b) carry out a prescribed analysis of the fluoridated water to measure the concentration of fluoride of the fluoridated water.
- (3) The public potable water supplier must on 1 day for each month—
 - (a) divide a sample collected under subsection (2)(a) into 2 parts; and
 - (b) carry out a prescribed analysis of 1 part of the sample to measure the concentration of fluoride of the part; and
 - (c) send the other part of the sample to a laboratory accredited by NATA to carry out a prescribed analysis of the part to measure the concentration of fluoride of the part.
- (4) The public potable water supplier must obtain the results of the prescribed analysis of the part carried out by the laboratory under subsection (3)(c).

-
- (5) The public potable water supplier must keep the results of analyses carried out under subsections (2) and (3) for a minimum of 5 years.
 - (6) The chief executive may request that the public potable water supplier—
 - (a) collect an additional sample of fluoridated water from the water supply; and
 - (b) carry out a prescribed analysis of the fluoridated water within 1 day of the request being made.
 - (7) The public potable water supplier must—
 - (a) comply with the request under subsection (6); and
 - (b) notify the chief executive of the results of the prescribed analysis within 1 day of carrying out the prescribed analysis.

14 Impurities in fluoride

- (1) This section applies to a public potable water supplier for a public potable water supply that receives a quantity of fluoride to add to the water supply.
- (2) The public potable water supplier must not add the fluoride to the water supply if the batch analysis certificate for the quantity of fluoride indicates the concentration of impurities in the fluoride is likely to adversely affect public health.
- (3) On receipt of a quantity of fluoride without a batch analysis certificate for the quantity of fluoride, the public potable water supplier must ask the manufacturer, importer or supplier of the fluoride for a copy of a batch analysis certificate for the quantity of fluoride.
- (4) If the manufacturer, importer or supplier of the fluoride does not comply with the request mentioned in subsection (3), the public potable water supplier must—
 - (a) send a sample of the fluoride to a laboratory accredited by NATA to be analysed to determine the concentrations of any impurities in the fluoride; and

[s 15]

(b) obtain the results of the analysis.

(5) In this section—

batch analysis certificate, for a quantity of fluoride, means a certificate stating the concentration of impurities in the fluoride.

15 Forms

The chief executive may approve forms for use under this regulation.

Schedule 1 Dates before which fluoride must be added

section 4

Column 1 Public potable water supplier	Column 2 Relevant public potable water supply	Column 3 Date
Aurukun Shire Council	Aurukun Water Treatment Plant	31 December 2009

Balonne Shire Council, Brisbane City Council, Dalby Regional Council, Fraser Coast Regional Council, Gold Coast City Council, Goondiwindi Regional Council, Gympie Regional Council, Ipswich City Council, Lockyer Valley Regional Council, Logan City Council, Moreton Bay Regional Council, Redland City Council, Scenic Rim Regional Council, Somerset Regional Council, South Burnett Regional Council, Southern Downs Regional Council, Sunshine Coast Regional Council and Toowoomba Regional Council.

Schedule 3 Dictionary

section 3

approved form means a form approved by the chief executive under section 15.

fluoridated water means water from a public potable water supply to which fluoride has been added under the Act.

NATA means National Association of Testing Authorities, Australia ACN 004 379 748.

prescribed analysis, of fluoridated water, means analysis of the fluoride content of the fluoridated water using—

- (a) the SPADNS colorimetric method; or
- (b) the ion-selective electrode method; or
- (c) ion chromatography.

quarter means each of the following—

- (a) 1 January to 31 March of each year;
- (b) 1 April to 30 June of each year;
- (c) 1 July to 30 September of each year;
- (d) 1 October to 31 December of each year.
