

Queensland

Plant Protection Act 1989

Plant Protection Regulation 2002

Current as at 17 December 2012

Information about this reprint

This regulation is reprinted as at 17 December 2012. The reprint shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes. Also see list of legislation for any uncommenced amendments.

This page is specific to this reprint. See previous reprints for information about earlier changes made under the Reprints Act 1992. A table of reprints is included in the endnotes.

Also see endnotes for information about when provisions commenced.

Spelling

The spelling of certain words or phrases may be inconsistent in this reprint or with other reprints because of changes made in various editions of the Macquarie Dictionary (for example, in the dictionary, ‘lodgement’ has replaced ‘lodgment’). Variations of spelling will be updated in the next authorised reprint.

Dates shown on reprints

Reprints dated at last amendment All reprints produced on or after 1 July 2002, authorised (that is, hard copy) and unauthorised (that is, electronic), are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If an authorised reprint is dated earlier than an unauthorised version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of an authorised reprint is the same as the date shown for an unauthorised version previously published, it merely means that the unauthorised version was published before the authorised version. Also, any revised edition of the previously published unauthorised version will have the same date as that version.

Replacement reprint date If the date of an authorised reprint is the same as the date shown on another authorised reprint it means that one is the replacement of the other.

Plant Protection Regulation 2002

[as amended by all amendments that commenced on or before 17 December 2012]

Chapter 1 Preliminary

1 Short title

This regulation may be cited as the *Plant Protection Regulation 2002*.

2 Commencement

This regulation commences on 1 September 2002.

3 Definitions

The dictionary in schedule 13 defines particular words used in this regulation.

Chapter 2 General provisions

Part 1 Prescribed pests and notifiable pests

4 Prescription of pests

Each organism, virus, viroid, disorder, condition or cause of specified symptoms in plants mentioned in schedule 1 is prescribed for section 4(1) of the Act.

[s 5]

5 References to prescribed pests

- (1) If a prescribed pest has a life cycle, a reference in this regulation to the pest includes a reference to the pest at each stage of the pest's life cycle.

Examples of stages of the pest's life cycle—

egg, larva, pupa, adult

- (2) If schedule 1 states an abbreviated or common name for a prescribed pest, the body of this regulation refers to the pest by that name.

6 Notifiable pests

Each pest mentioned in schedule 2 is declared to be a notifiable pest for section 12(1) of the Act.

Part 2 Authorised persons

6A Declared class for appointment—Act, s 6D

For section 6D(2)(a)(ii) of the Act, the class of individual declared to be an approved class is an individual employed by—

- (a) BSES Ltd ACN 103 760 005; or
- (b) Queensland Cane Growers Organisation Ltd ACN 089 992 969; or
- (c) Isis Productivity Ltd ACN 108 518 216; or
- (d) a mill owner under the *Sugar Industry Act 1999*; or
- (e) an entity engaged in sugarcane production in Queensland; or
- (f) an entity whose objects include improving sugar industry production.

Part 3 General offences

7 Sale of infested plant prohibited

A person must not, in trade or commerce, sell or dispose of, or possess for sale, a plant the person knows is, or reasonably believes may be, infested with a prescribed pest.

Maximum penalty—20 penalty units.

8 Labelling for introduction

A person must not possess a plant introduced into Queensland in trade or commerce unless—

- (a) the plant is identified as to the place where it was grown or despatched; and
- (b) if the plant is in a package, a clear and legible description of the contents of the package is clearly marked on the package together with the name and address of both the sender and the recipient.

Maximum penalty—20 penalty units.

9 Certification of disinfection

- (1) If an inspector gives a direction under section 13 of the Act to a person to disinfect a plant, the person must disinfect the plant within 72 hours before introducing or moving the plant.

Maximum penalty—20 penalty units.

- (2) If the plant is disinfested under the inspector's direction, the inspector must, if the recipient of the plant requests, give the recipient a certificate to that effect.

[s 10]

10 Plant to be repacked if certificate given

A person must, within 24 hours of receiving a certificate issued under section 9, repack and remove the plant from the place of treatment.

Maximum penalty—20 penalty units.

11 Graft union

A person must not sell a grafted citrus fruit tree unless it is of upright growth with the stock-scion union at least 100mm above the point where the first lateral root branches from the main stem.

Maximum penalty—20 penalty units.

Part 4 Corresponding laws

12 Declaration of corresponding laws

For the definition *corresponding law* in schedule 2 of the Act, each of the following is declared to be a corresponding law to the Act—

- (a) *Plant Health Act 2009* (SA);
- (b) *Plant Diseases Act 1914* (WA);
- (c) *Plant Diseases Act 1924* (NSW);
- (d) *Plant Diseases Act 2002* (ACT);
- (e) *Plant Diseases Control Act* (NT);
- (f) *Plant Health and Plant Products Act 1995* (Vic);
- (g) *Plant Quarantine Act 1997* (Tas).

Chapter 3 Pest quarantine areas and related matters

Part 1 Banana pests

Division 1 Preliminary

17 Definitions for pt 1

In this part—

banana plant—

- (a) generally, means a plant of the genera *Musa* or *Ensete*; and
- (b) for division 3, see also section 20.

banana plant pest see section 25.

ground cover vegetation means any low spreading plant that covers the soil and retards movement of soil.

pest banana plant means a plant of the genera—

- (a) *Musa* spp., other than—
 - (i) a plant that produces edible fruit; or
 - (ii) an indigenous plant that is not a volunteer plant; or
- (b) *Ensete* spp.

pest quarantine area means each of the pest quarantine areas declared under section 18.

pest site see section 25.

treatment method A see schedule 5, item 1.

treatment method B see schedule 5, item 2.

[s 18]

treatment method C see schedule 5, item 3.

treatment method D see schedule 5, item 4.

Division 2 Pest quarantine areas and objects of quarantine

18 Declaration of pest quarantine areas

- (1) Each area shown on a map in schedule 3 is declared to be a pest quarantine area for pests of banana plants.
- (2) The exact location of the boundary of each of the pest quarantine areas is held in digital electronic form by the department.
- (3) Maps showing the exact location of the boundary of each of the pest quarantine areas can be accessed, free of charge, on the department's website.

Editor's note—

The department's website address is <www.dpi.qld.gov.au>.

- (4) The information held in digital electronic form can be reduced or enlarged to show the details of the boundaries.

19 Objects of quarantine

The objects of the quarantine for each pest quarantine area are—

- (a) to prevent the introduction into Queensland of pests that infest banana plants; and
- (b) to prevent the spread of the pests in Queensland; and
- (c) to prevent, control or remove pest infestations of banana plants in the pest quarantine area.

Division 3 General pest control measures

20 Definition for div 3

In this division—

banana plant does not include the fruit of the plant.

21 Restriction on introducing banana plants

(1) A person must not, without an inspector's approval, introduce a banana plant into Queensland unless the plant—

- (a) is a banana plantlet; and
- (b) is in a sealed pest-proof container; and
- (c) is accompanied by an inspector's certificate, or assurance certificate, stating the plant is free from banana bunchy top, banana streak and cucumber mosaic; and
- (d) is transported in a way that prevents infestation by a banana plant pest.

(2) In this section—

banana plantlet means a banana plant that has been grown in a tissue culture medium in a closed container.

22 Restriction on moving banana plants

A person must not, without an inspector's approval, move a banana plant—

- (a) into a pest quarantine area; or
- (b) from a parcel of land in a pest quarantine area to another parcel of land in the area; or
- (c) out of a pest quarantine area.

[s 23]

23 Restriction on moving soil, appliances and other things

- (1) A person must not, without an inspector's approval, move soil on which a banana plant has been growing or an appliance or other thing that has been in contact with an infested plant or soil on which an infested plant has been growing—
 - (a) into a pest quarantine area; or
 - (b) from a parcel of land in a pest quarantine area to another parcel of land in the area; or
 - (c) out of a pest quarantine area.

- (2) In this section—

infested plant means a banana plant infested with 1 or more of the following—

- (a) bacterial wilt of banana, also known as—
 - (i) banana blood disease; or
 - (ii) banana bugtok disease; or
 - (iii) banana moko disease;
- (b) fusarium wilt of banana, also known as banana Panama disease;
- (c) leaf spot of banana, also known as banana black Sigatoka disease.

other thing includes clothing, footwear, packaging material and banana bunch covers, but does not include fruit of a banana plant.

24 Restriction on planting and cultivating banana plants

- (1) A person must not, without an inspector's approval—
 - (a) plant a banana plant in a pest quarantine area; or
 - (b) cultivate a banana plant in a pest quarantine area.

-
- (2) However, a person may plant or cultivate a banana cultivar mentioned in schedule 4, parts 1 or 2, if the cultivar is planted and cultivated in—
- (a) a pest quarantine area for the part of the schedule in which the cultivar is in; and
 - (b) a residential plantation.
- (3) An inspector may give an approval to plant or cultivate a pest banana plant only if satisfied the planting and cultivation are to be carried out—
- (a) for research or educational purposes; and
 - (b) in a way that is not likely to spread the plant's seed.
- (4) In this section—

residential plantation means a group of no more than 10 banana plants or 30 pseudostems that are not cultivated for sale.

Division 4 Pest control measures for movement of fruit

25 Definitions for div 4

In this division—

banana plant pest means the following pests—

- (a) bacterial wilt of banana, also known as—
 - (i) banana blood disease; or
 - (ii) banana bugtok disease; or
 - (iii) banana moko disease;
- (b) banana black Sigatoka disease.

pest site means an area within approximately 50km of a place where a banana plant pest has been found.

[s 26]

26 Declaration of pest area

- (1) If the chief executive considers it necessary to prevent a banana plant pest spreading in Queensland, the chief executive may—
 - (a) declare an area in a pest quarantine area to be a pest area; and
 - (b) define the boundaries of the area so declared.
- (2) The chief executive must give notice of the declaration—
 - (a) in a newspaper, if any, published at least 5 days in any week, and circulating generally throughout the locality in which the pest area is situated; or
 - (b) in another newspaper published in Brisbane and circulating generally throughout Queensland.

Editor's note—

A copy of the notice may be inspected on the department's website at <www.dpi.qld.gov.au>.

- (3) The notice must state the following—
 - (a) that an area has been declared to be a pest area;
 - (b) the location and boundaries of the area;
 - (c) where a map showing the boundaries of the area is available for public inspection;
 - (d) the restrictions on movement of fruit of a banana plant growing in the pest area.

27 Restriction on moving fruit

- (1) This section applies to fruit of a banana plant growing in a pest site if—
 - (a) the chief executive declares the pest site to be a pest area under section 26; and
 - (b) the person moves the fruit—
 - (i) out of the pest area; or

- (ii) from a parcel of land in the pest area to another parcel of land in the area.
- (2) The person must not, without an inspector's approval, move the fruit unless the person moves the fruit in a way that complies with the restrictions on movement of fruit stated in the declaration.

Division 5 Other pest control measures

Subdivision 1 Treatment methods for banana plants

28 Treatment methods

Treatment methods A, B, C and D for treating banana plants under this part are described in schedule 5, items 1 to 4.

Subdivision 2 Notifiable pests

29 Bacterial wilt of banana

- (1) This section applies to an owner of land in a pest quarantine area if a banana plant is growing on the land in a pest site.
- (2) Unless the owner has an inspector's approval stating the plant does not have to be treated under this section, the owner must—
 - (a) treat the plant using treatment method B or C; and
 - (b) fence off the pest site from other banana plants.
- (3) The owner must—
 - (a) treat the plant and fence off the pest site within 1 day after becoming aware the pest has been found; and

[s 30]

- (b) as soon as practicable after the day the plant is treated, plant and grow ground cover vegetation on the pest site.
- (4) The owner must not, without an inspector's approval, plant a banana plant on the pest site.
- (5) The owner must grow the ground cover vegetation on the pest site unless the owner has an inspector's approval stating the vegetation need not be grown on the site.
- (6) In this section—

pest site means an area within 20m of a place where bacterial wilt of banana, also known as the following, has been found—

- (a) banana blood disease;
- (b) banana bugtok disease;
- (c) banana moko disease.

30 Banana black Sigatoka disease

- (1) This section applies to an owner of land in a pest quarantine area who grows a banana plant on the land within 500m of a place where banana black Sigatoka disease has been found.
- (2) Unless the owner has an inspector's approval stating the plant does not have to be treated under this section, the owner must—
 - (a) treat the plant's leaf tissue that is dead or not green in colour by—
 - (i) burning it; or
 - (ii) burying it under at least 60cm of soil; and
 - (b) treat the plant using treatment method B, C or D.
- (3) The owner must—
 - (a) treat the leaf tissue mentioned in subsection (2)(a) within 1 day after an inspector gives the owner a direction to treat the leaf tissue; and

-
- (b) treat the plant within 3 days after an inspector gives the owner a direction to treat the plant.
 - (4) In this section—
banana plant does not include a banana black Sigatoka resistant cultivar mentioned in schedule 6.

31 Banana bract mosaic and banana bunchy top

- (1) This section applies to an owner of land in a pest quarantine area who grows a banana plant on the land within 20m of a place where the following viruses have been found—
 - (a) banana bract mosaic;
 - (b) banana bunchy top.
- (2) Unless the owner has an inspector's approval stating the plant does not have to be treated under this section, the owner must—
 - (a) spray the plant with dieseline or kerosene; and
 - (b) treat it using treatment method A or B.
- (3) The owner must spray and treat the plant within 1 day after becoming aware the virus has been found.

32 Fusarium wilt of banana, also known as banana Panama disease

- (1) This section applies to an owner of land in a pest quarantine area if—
 - (a) the owner is growing a banana plant on the land; and
 - (b) the plant is infested with banana Panama disease.
- (2) Unless the owner has an inspector's approval stating the plant does not have to be treated under this section, the owner must—
 - (a) treat the plant using treatment method B or C; and
 - (b) fence off the pest site from other banana plants.

[s 33]

- (3) The owner must—
 - (a) treat the plant and fence off the pest site within 7 days after becoming aware the plant is infested; and
 - (b) as soon as practicable after treating the plant, plant and grow ground cover vegetation on the pest site.
- (4) The owner must not, without an inspector's approval, plant a banana plant on the pest site for at least 5 years after the day the plant is treated.
- (5) The owner must grow the ground cover vegetation for at least 5 years after the day the plant is treated unless the owner has an inspector's approval to plant a banana plant on the pest site.
- (6) In this section—

pest site means the area within 5m of a plant infested with banana Panama disease.

33 Pest banana plants

- (1) This section applies to an owner of land in a pest quarantine area if a pest banana plant is growing on the land.
- (2) Unless the owner has an inspector's approval to grow the plant, the owner must, within 1 day after becoming aware the plant is on the land—
 - (a) collect and burn the fruit and seeds of the plant; and
 - (b) inject the plant's pseudostem at a height of 30cm above the ground with—
 - (i) 15ml of a 1% solution of 2,4-D; or
 - (ii) 15ml of a 3.6% solution of glyphosate.

Subdivision 3 Other pests

34 Banana yellow Sigatoka and leaf speckle

- (1) This section applies to an owner of land in a pest quarantine area if—
 - (a) the owner grows a banana plant on the land; and
 - (b) there is an infested leaf on the plant.
- (2) Unless the owner has an inspector's approval stating the plant does not have to be treated under this section, the owner must treat each infested leaf by—
 - (a) removing it from the plant; and
 - (b) leaving it to rot on the surface of the soil.
- (3) The owner must treat each infested leaf within 7 days after the owner becomes aware it is an infested leaf.
- (4) In this section—

infested leaf means a banana plant leaf that is infested with the banana yellow Sigatoka pest or banana leaf speckle pest and the visible symptoms of the infestation of either or both of the pests are showing—

- (a) if the banana plant is grown on land in the northern pest quarantine area—on more than 5% of the leaf; or

Editor's note—

See schedule 3 (Pest quarantine areas for pests of banana plants), part 3 (Northern pest quarantine area).

- (b) if the banana plant is grown on land in any other pest quarantine area—
 - (i) at any time between 1 November and 31 May—on more than 15% of the leaf; or
 - (ii) at any time between 1 June and 31 October—on more than 30% of the leaf.

Subdivision 4 Volunteer plants

35 Treating volunteer plants

- (1) This section applies to an owner of land in a pest quarantine area if a volunteer plant that is a banana plant is growing on the land.
- (2) The owner must, within 5 days after becoming aware the plant is on the land, treat it using treatment method A, B or C.

Subdivision 5 Regrowth and weeds

36 Treating regrowth

- (1) If a person treats a banana plant under section 29, 32 or 33, the person must treat any regrowth of the plant by spraying it with a 0.2% solution of 2,4-D.
- (2) If a person treats a banana plant under section 30, 31 or 35, the person must treat any regrowth of the plant by—
 - (a) removing the regrowth from the soil and cutting it into pieces no more than 5cm in diameter; or
 - (b) spraying it with a 0.2% solution of 2,4-D.
- (3) The person must treat the regrowth as soon as practicable after becoming aware of it.

37 Keeping land free of weeds and other plants

An owner of land in a pest quarantine area who grows a banana plant on the land must keep the land within 2m of the plant free from weeds or other plants that are—

- (a) more than 60cm high; and
- (b) growing in numbers that an inspector reasonably believes would be likely to hinder—

- (i) symptom expression of a pest infestation on the banana plant; or
- (ii) inspection of the banana plant by an inspector.

Part 2 Fire ants

Division 1 Preliminary

38 Definitions for pt 2

In this part—

approved risk management plan see section 55(2).

fire ant means the following pests—

- (a) tropical fire ant;
- (b) red imported fire ant.

high risk restricted area means an area declared to be a high risk restricted area under section 49(1)(a)(i).

low risk restricted area means an area declared to be a low risk restricted area under section 49(1)(a)(ii).

pest quarantine area means the pest quarantine area declared under section 39.

proposed risk management plan see section 56(2)(a).

restricted area means—

- (a) a high risk restricted area; or
- (b) a low risk restricted area.

restricted item see section 38A.

show cause period see section 60(1)(e).

[s 38A]

soil includes a soil substitute that could be used as a growing medium for a plant.

Examples—

potting mix, organic mulch

treat—

- (a) for a restricted item to which an approved risk management plan relates—means treat in a way directed by the approved risk management plan; and
- (b) otherwise—means treat in a way directed by an inspector.

38A Meaning of *restricted item*

(1) A ***restricted item*** means any of the following—

- (a) soil or any thing that has soil attached;

Examples—

turf, a plant that has soil on the plant's roots, an appliance that has soil attached to it

- (b) material that is a product or by-product of quarrying or mining;

Examples—

chitters, coal fines, coal stone, decomposed granite, gravel, overburden

- (c) material that is a product or by-product of the processing or manufacturing of any of the following—

- (i) an animal;

Example—

solid waste produced by processing an animal at an abattoir

- (ii) a plant;

Examples—

mulch, sawdust

(iii) anything that comes from an animal or plant;

Examples—

animal manure, green waste

(d) baled hay or straw.

(2) Also, if an inspector decides any thing associated with a person's commercial activity may spread fire ant, and notifies the person of the decision, the thing is a *restricted item*.

Division 2 Pest quarantine area and objects of quarantine

39 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for fire ant.

40 Objects of quarantine

The objects of the quarantine are—

- (a) to prevent fire ant spreading in Queensland; and
- (b) to eradicate it in Queensland; and
- (c) to prevent the introduction of tropical fire ant into Queensland.

[s 41]

Division 3 Pest control measures for pest quarantine area

Subdivision 1 Restrictions on moving live fire ants, restricted items and other things

41 Restriction on moving live fire ants

A person must not, without an inspector's approval, move a live fire ant—

- (a) from a parcel of land in the pest quarantine area to another parcel of land in the area; or
- (b) out of the pest quarantine area.

42 Restriction on land owner's movement of restricted items and other things

(1) This section applies to an owner of land if an inspector—

- (a) reasonably believes the land is infested with fire ant; and
- (b) gives the owner a written notice stating—
 - (i) the land is infested with fire ant; and
 - (ii) the things on the land the inspector reasonably believes are infested with fire ant.

(2) The owner must not, without an inspector's approval, move, or allow another person to move, a restricted item or other thing mentioned in subsection (1)(b)(ii)—

- (a) from the owner's land to another parcel of land in the pest quarantine area; or
- (b) out of the pest quarantine area.

43 Restriction on other person's movement of restricted items and other things

- (1) This section applies to a person carrying on a commercial activity in the pest quarantine area if an inspector—
 - (a) reasonably believes the activity may spread fire ant in the pest quarantine area; and
 - (b) gives the person a written notice stating—
 - (i) that the activity may spread fire ant in the pest quarantine area; and
 - (ii) the things associated with the activity the inspector reasonably believes may spread fire ant.
- (2) The person must not, without an inspector's approval, move, or allow another person to move, a restricted item or other thing mentioned in subsection (1)(b)(ii)—
 - (a) from a parcel of land in the pest quarantine area to another parcel of land in the area; or
 - (b) out of the pest quarantine area.
- (3) In deciding whether the activity or other thing may spread fire ant, the inspector must have regard to—
 - (a) the nature of the activity or thing; and
 - (b) where the activity is carried out.

Subdivision 2 Other obligations of land owners

44 Definition for sdiv 2

In this subdivision—

land does not include a dwelling house on the land.

[s 45]

45 Obligation of land owner to allow surveillance

- (1) If an inspector requires an owner of land in the pest quarantine area to allow the inspector to carry out surveillance on the land to look for and monitor the spread of fire ant, the owner must not refuse to allow the inspector to carry out surveillance.
- (2) Without limiting subsection (1), an inspector may carry out surveillance on the land by putting fire ant baits, lures or traps on the land.
- (3) The inspector may direct the owner to remove any thing on the land that would obstruct the inspector carrying out surveillance on the land.

Examples of things an inspector may direct to be removed—

- rubbish
 - scrap metal
 - vegetation
- (4) When making the requirement or direction, the inspector must give the person an offence warning.

46 Preventative treatment of land, plants and other things

- (1) If an inspector considers it necessary to prevent fire ant spreading in the pest quarantine area, the inspector may require an owner of land in the pest quarantine area to allow the inspector to treat—
 - (a) the land; or
 - (b) a plant, or other thing the inspector reasonably believes may spread fire ant, on the land.
- (2) The owner must not refuse to allow the inspector to carry out the treatment.
- (3) The inspector may direct the owner to remove any thing on the land that would obstruct the inspector treating the land, or plant or other thing on the land.

Examples of things an inspector may direct to be removed—

- rubbish
 - scrap metal
 - vegetation
- (4) When making the requirement or direction, the inspector must give the person an offence warning.

47 Obligation of owner of land in the vicinity of infested land

An owner of land in the vicinity of land infested with fire ant must, if directed by an inspector, monitor the owner's land for fire ant in the way the inspector considers appropriate for finding fire ant.

48 Treatment of infested land, plants and other things

- (1) If an inspector requires an owner of land infested with fire ant to allow an inspector or an authorised person to treat—
- (a) the land; or
 - (b) a plant, or other thing infested with fire ant, on the land;
- the owner must not refuse to allow an inspector or authorised person to carry out the treatment.
- (2) When making the requirement, the inspector must give the person an offence warning.
- (3) In this section—
- authorised person*** means a person authorised by the chief executive.

[s 49]

Division 4 Pest control measures for restricted areas

Subdivision 1 Restricted areas

49 Declaration of restricted area

- (1) If the chief executive considers it necessary to prevent fire ant spreading or to eradicate fire ant in Queensland, the chief executive may—
 - (a) declare an area in the pest quarantine area to be—
 - (i) a high risk restricted area; or
 - (ii) a low risk restricted area; and
 - (b) define the boundaries of the area so declared.
- (2) The chief executive must give notice of the declaration in each of the following (each a *declaration notice*)—
 - (a) in a newspaper published in Brisbane and circulating generally throughout Queensland;
 - (b) in another newspaper, if any, published at least 5 days in any week, and circulating generally throughout the locality in which the area is situated;
 - (c) on the department's website.

Editor's note—

The address of the department's website is
<www.daff.qld.gov.au>.

- (3) A declaration notice must state each of the following—
 - (a) a sufficient reference to the location of the area to identify the area;
 - (b) that the area has been declared to be—
 - (i) a high risk restricted area; or
 - (ii) a low risk restricted area;

- (c) where a map showing the boundaries of the area is available for public inspection;
 - (d) that the restrictions mentioned in sections 51 to 58 apply to the area.
- (4) A declaration notice under subsection (2)(a) or (b) must also state that the declaration notice on the website shows the boundaries of the area.
- (5) A declaration notice under subsection (2)(c) must also show the boundaries of the area.

Subdivision 2 Movement restrictions

50 Application of sdiv 2

This subdivision does not limit another provision of this part.

51 Restriction on moving infested thing

- (1) An owner of land in a restricted area must not, without an inspector's approval, move, or allow another person to move, a thing infested with fire ant—
- (a) from the owner's parcel of land to another parcel of land in the restricted area; or
 - (b) out of the restricted area.
- (2) The inspector may approve a movement mentioned in subsection (1) on conditions.

52 Restriction on land owner's movement of restricted item from land in high risk restricted area

- (1) This section applies if the owner of a parcel of land in a high risk restricted area—
- (a) has a restricted item on the land; and
 - (b) is not carrying on a commercial activity on the land.

[s 53]

- (2) The owner must not, without an inspector's approval, move, or allow another person to move, the restricted item from the land.
- (3) The inspector may approve a movement mentioned in subsection (2) on conditions.
- (4) Despite subsection (2), the owner may move, or allow another person to move, the restricted item to a waste facility in the restricted area without an inspector's approval.
- (5) In this section—
waste facility see the *Waste Reduction and Recycling Act 2011*, schedule.

53 Restriction on moving restricted item by person carrying on commercial activity in high risk restricted area

- (1) This section applies to a person carrying on a commercial activity in a high risk restricted area if the person has a restricted item on the site where the commercial activity is carried on.
- (2) The person must not, without an inspector's approval, move, or allow another person to move, the restricted item—
 - (a) from a parcel of land in the high risk restricted area to another parcel of land in the high risk restricted area; or
 - (b) out of the high risk restricted area.
- (3) The inspector may approve a movement mentioned in subsection (2) on conditions.
- (4) Despite subsection (2), if there is an approved risk management plan for the activity, the person may carry out, or allow another person to carry out, a movement mentioned in subsection (2) without an inspector's approval if the restricted item has been treated in compliance with the plan.

Note—

For the requirement to have a risk management plan for a commercial activity in a restricted area that involves the movement of a restricted item, see section 55.

54 Restriction on moving restricted item by person carrying on commercial activity in low risk restricted area

- (1) This section applies to a person carrying on a commercial activity in a low risk restricted area if the person has a restricted item on the site where the commercial activity is carried on.
- (2) The person must not, without an inspector's approval, move, or allow another person to move, the restricted item out of the low risk restricted area.
- (3) The inspector may approve the movement on conditions.
- (4) However, the person may carry out, or allow another person to carry out, the movement without an inspector's approval if—
 - (a) the person moves the restricted item to a high risk restricted area; or
 - (b) if there is an approved risk management plan for the commercial activity—the restricted item has been treated in compliance with the plan.

Note—

For the requirement to have a risk management plan for a commercial activity in a restricted area that involves the movement of a restricted item, see section 55.

Subdivision 3 Risk management plans

55 Person carrying on certain commercial activity in restricted area must have approved risk management plan

- (1) This section applies to a person who is carrying on a commercial activity—

[s 56]

- (a) in a high risk restricted area, if the commercial activity involves the movement of a restricted item—
 - (i) from a parcel of land in the high risk restricted area to another parcel of land in the high risk restricted area; or
 - (ii) out of the high risk restricted area; or
 - (b) in a low risk restricted area, if the commercial activity involves the movement of a restricted item out of the low risk restricted area, other than to land in a high risk restricted area.
- (2) The person must implement and keep a risk management plan that complies with section 56 for the commercial activity (an *approved risk management plan*).

56 Requirements for risk management plan

- (1) A risk management plan must manage the risks associated with the commercial activity carried on in a restricted area by a person by using appropriate management techniques to prevent the activity, or the things associated with the activity, from spreading fire ant.
- (2) The person carrying on the commercial activity must—
 - (a) prepare a risk management plan for the commercial activity (the *proposed risk management plan*); and
 - (b) give the proposed risk management plan to an inspector.
- (3) The proposed risk management plan has no effect unless it has been approved by an inspector.

57 Approval of proposed risk management plan

- (1) An inspector must, when deciding whether to approve a proposed risk management plan, consider if it—
 - (a) takes into account the risks posed by the commercial activity that may spread fire ant; and

-
- (b) identifies each restricted item or procedure that may spread fire ant; and
 - (c) ensures each restricted item is not infested with fire ant.
- (2) The factors the inspector must consider, if applicable to the commercial activity, include, but are not limited to, the following—
- (a) purchase of restricted items;
 - (b) movement of restricted items onto and off the site where the commercial activity is carried on;
 - (c) storage and use of restricted items on the site;
 - (d) methods to increase the early detection of fire ant on the site;
 - (e) monitoring of the site to detect the presence of fire ant;
 - (f) treatment for fire ant at the site;
 - (g) treatment of a restricted item before moving the item off the site;
 - (h) staff training on detection of fire ant.
- (3) The person carrying on the commercial activity must give information the inspector reasonably requires to decide whether the plan should be approved.
- (4) Before approving the proposed risk management plan, the inspector may—
- (a) inspect, test or treat or take samples of a restricted item;
or
 - (b) do anything else the inspector reasonably considers necessary or desirable.
- (5) The inspector may approve a person's proposed risk management plan subject to conditions.

58 Term of approved risk management plan

An approved risk management plan remains in force—

[s 58A]

- (a) for any term stated initially in it; or
- (b) for any term an inspector later directs; or
- (c) until it is cancelled or suspended.

58A Audits

An inspector may audit an approved risk management plan to decide if it has been satisfactorily implemented and kept under this part.

Subdivision 4 Cancellation and suspension of approved risk management plan

59 Grounds for cancellation and suspension

Each of the following is a ground for cancelling or suspending a person's approved risk management plan—

- (a) an inspector reasonably believes the person has not complied with the plan;
- (b) the approval was obtained by incorrect or misleading information or documents;
- (c) the person has not complied with—
 - (i) a condition of the approval; or
 - (ii) a direction by an inspector to amend the plan.

60 Procedure for cancellation and suspension—general

- (1) If an inspector considers a ground exists to cancel or suspend a person's approved risk management plan, the inspector must give the person written notice stating each of the following—
 - (a) the proposed action;
 - (b) the grounds for the proposed action;

- (c) the facts and circumstances that form the basis for the grounds;
 - (d) if the proposed action is a suspension—the proposed suspension period;
 - (e) that the person may make, within a stated period (the *show cause period*), written representations to show why the proposed action should not be taken.
- (2) The show cause period must end at least 14 business days after the person is given the notice.
 - (3) If the inspector decides to take the proposed action, the inspector must, within 5 business days after making the decision, inform the person of the decision by written notice.
 - (4) The decision takes effect when the notice is given.

61 Immediate suspension

- (1) This section applies despite sections 59 and 60.
- (2) If an inspector considers it necessary to prevent fire ant spreading or to eradicate fire ant in Queensland, the inspector may, by written notice to a person, immediately suspend the person's approved risk management plan until the earlier of the following—
 - (a) the inspector informs the person of the inspector's decision by notice under section 60(3), given after complying with section 60(1) and (2);
 - (b) the end of 60 days after notice to the person.

62 Notice of decision and reconsideration

If the inspector cancels, suspends or immediately suspends an approval, the notice under section 60(3) or 61(2) must state—

- (a) the decision, and the reasons for it; and

[s 63]

- (b) that the person may apply to the chief executive under section 21M of the Act for reconsideration of the decision; and
- (c) how to apply.

Division 5 Introduction restrictions for tropical fire ants

63 Live tropical fire ants and infested things

- (1) A person must not, without an inspector's approval, introduce the following into Queensland—
 - (a) a live tropical fire ant;
 - (b) any thing the person reasonably believes may be infested with tropical fire ant.
- (2) An inspector may give an approval only if the inspector is satisfied the introduction of the thing will not pose a significant risk of introducing tropical fire ant into Queensland.

64 Restricted items

- (1) This section applies for restricted items that come from another State in which tropical fire ant is known to be living.
- (2) A person must not, without an inspector's approval, introduce the restricted item into Queensland.
- (3) An inspector may give an approval only if the restricted item is accompanied by a certificate, from an interstate inspector, that states—
 - (a) the item is dispatched from a property that is more than 5km from an infestation of tropical fire ant; or
 - (b) the item, when inspected by the interstate inspector, was free from evidence of tropical fire ant.

Part 3 Fire blight

65 Definitions for pt 3

In this part—

authorised person means a person authorised by—

- (a) the chief executive of an interstate department; or
- (b) an interstate inspector.

fire blight area means an area in a State, other than Queensland, where there is an infestation of fire blight.

pest quarantine area means the pest quarantine area declared under section 66.

regulated fire blight host plant, for a fire blight area, means a plant that—

- (a) is—
 - (i) a hybrid mentioned in schedule 7; or
 - (ii) of a species mentioned in schedule 7; or
 - (iii) of a species within a genus mentioned in schedule 7; and
- (b) has—
 - (i) for fruit—been grown within 5km of the fire blight area; or
 - (ii) for a plant (other than fruit)—been within 20km of the fire blight area.

66 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for fire blight.

[s 67]

67 Object of quarantine

The object of the quarantine is to prevent the introduction of fire blight into Queensland.

68 Restriction on introducing regulated fire blight host plant

- (1) A person must not, without an inspector's approval, introduce a regulated fire blight host plant into Queensland.
- (2) However, the person may introduce the plant, other than its fruit, if—
 - (a) the plant has been grown in a nursery that has been certified, by an interstate inspector, to be—
 - (i) located more than 10km from a fire blight area; and
 - (ii) free from evidence of fire blight when inspected by an interstate inspector in the autumn and spring before the certificate was made; and
 - (b) the plant is accompanied by a certificate, from an interstate inspector or authorised person, that states the plant was growing in the nursery for the entire year before the certificate was made.

Part 4 Grape phylloxera

Division 1 Preliminary

69 Definitions for pt 4

In this part—

clarified juice means juice of grapes—

- (a) that is visibly clear; and

-
- (b) from which solids have been removed such that it contains no more than 1% of solids.

filtered juice means clarified juice processed through a filter that removes all particles larger than 50 microns in diameter.

fresh juice means the liquid fraction from must that—

- (a) excludes skins, seeds and other large solids; but
(b) may contain some suspended solids.

fruit of a grape plant includes whole table grapes and whole wine grapes.

general control zone means the part of the pest quarantine area that is outside the special control zone.

grape phylloxera means the pest *Daktulosphaira vitifoliae* (Fitch).

grape plant means a grape plant *Vitis* Spp. and includes the following—

- (a) vine cuttings, buds and vegetative tissue (or plant parts) for propagation;
(b) germplasm establishment cuttings;
(c) any vegetative part of the grape plant.

grape plant product, of a grape plant, means a product derived from the plant and includes—

- (a) fruit of the grape plant; and
(b) clarified juice, filtered juice, fresh juice, marc and must.

marc, for grapes, means—

- (a) the solids residue from crushing or pressing of must; or
(b) wine fermented on skins, containing skins, seeds and possibly stems.

must, for grapes, means the total product of crushing grape berries and includes juice, skins, seeds, pulp, and possibly some stems and leaves.

[s 70]

other thing includes clothing, footwear, tools and packaging material.

pest quarantine area means the pest quarantine area declared under section 70.

special control zone see section 73(1).

Division 2 Declaration of pest quarantine area and objects of quarantine

70 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for grape phylloxera.

71 Objects of quarantine

The objects of the quarantine are to—

- (a) prevent the introduction of grape phylloxera into Queensland; and
- (b) prevent or control the spread of grape phylloxera within Queensland; and
- (c) remove infestations of grape phylloxera in Queensland.

Division 3 Restrictions for general control zone

72 Restriction on introducing restricted items

- (1) A person must not, without an inspector's approval, introduce any of the following (each a *restricted item*) into the general control zone from outside the quarantine area—
 - (a) grape phylloxera;
 - (b) a grape plant;

-
- (c) a grape plant product;
 - (d) an appliance or other thing that has been in contact with a grape plant or the soil on which a grape plant has been growing.
- (2) An inspector may give an approval, with or without conditions, only if the inspector is satisfied that the introduction of the restricted item will not pose a significant risk of introducing grape phylloxera into the general control zone.

Division 4 Restrictions for special control zone

73 What is the *special control zone*

- (1) The *special control zone* is the area made up of—
- (a) the following local government areas—
 - (i) Balonne shire;
 - (ii) Banana shire;
 - (iii) Central Highlands shire;
 - (iv) Maranoa region;
 - (v) Paroo shire;
 - (vi) Woorabinda shire; and
 - (b) the part of the local government area of North Burnett region west of the Burnett Highway; and
 - (c) the part of the local government area of Western Downs region west of a line—
 - from the intersection of the Warrego Highway and Dalby Jandowae Road
 - along Dalby Jandowae Road in a northerly direction to the intersection with Kingaroy Jandowae Road

[s 74]

- along Kingaroy Jandowae Road in an easterly direction to the intersection with Niagra Road
 - along Niagra Road in an easterly direction to the intersection with the Bunya Highway
 - along the boundary of the Western Downs region in a northerly direction to the intersection with the boundary of the North Burnett region.
- (2) Attachment 1 to this regulation shows the approximate location of the special control zone.

Editor's note—

Maps showing the exact location of the boundary of the special control zone in particular places are available, free of charge, from the department's head office in Brisbane and its regional offices in the special control zone. The addresses and contact details for the department's offices can be found on the department's website at <www.dpi.qld.gov.au>.

- (3) The attachment does not form part of this regulation.
- (4) If the special control zone is amended the attachment must be revised as soon as possible after the amendment.

74 Restriction on introducing restricted items

- (1) A person must not, without an inspector's approval, introduce into the special control zone, any of the following (each a *restricted item*)—
- (a) grape phylloxera;
 - (b) a grape plant;
 - (c) a grape plant product;
 - (d) an appliance or other thing that has been in contact with a grape plant or the soil on which a grape plant has been growing.
- (2) An inspector may give an approval, with or without conditions, only if the inspector is satisfied that the introduction of the restricted item will not pose a significant

risk of introducing grape phylloxera into the special control zone.

- (3) To remove any doubt, it is declared that a person requires an approval under subsection (2) to introduce a restricted item into the special control zone even if the person has been given an approval under section 72(2) to introduce the item into the general control zone.

Part 5 Mango leafhopper

Division 1 Preliminary

75 Definitions for pt 5

In this part—

authorised person means a person authorised (by the chief executive, or an interstate inspector, of an interstate department of the State in which mango leafhopper has been detected and a mango plant was grown or despatched) to—

- (a) competently treat the mango plant in an approved way; and
- (b) issue a treatment certificate.

pest quarantine area means a pest quarantine area declared under section 76.

treatment certificate, for a plant, means a certificate stating the plant has been treated in an approved way.

[s 76]

Division 2 Pest quarantine areas and objects of quarantine

76 Declaration of pest quarantine areas

- (1) Each area shown on the map in schedule 7A is declared to be a pest quarantine area for mango leafhopper.
- (2) The exact location of the boundary of each of the pest quarantine areas is held in digital electronic form by the department.
- (3) A map showing the exact location of the boundary of each of the pest quarantine areas can be accessed, free of charge, on the department's website.

Editor's note—

The department's website address is <www.dpi.qld.gov.au>.

- (4) The information held in digital electronic form can be reduced or enlarged to show the details of the boundaries.

77 Objects of quarantine

The objects of the quarantine are—

- (a) to prevent mango leafhopper being brought out of a pest quarantine area; and
- (b) to prevent the spread of mango leafhopper in a quarantine area; and
- (c) for the pest quarantine area declared under section 76(1)—to prevent the introduction of mango leafhopper into Queensland.

Division 3 General pest control measures

78 Restriction on introducing mango leafhopper and infested plant

A person must not, without an inspector's approval, introduce into Queensland—

- (a) mango leafhopper, or
- (b) a plant infested with mango leafhopper.

79 Restriction on introducing mango plant

(1) A person must not, without an inspector's approval, introduce into Queensland a mango plant grown in or despatched from another State in which mango leafhopper has been detected.

(2) Subsection (1) does not apply—

- (a) to the fruit of the mango plant if the stem of the fruit is removed at the abscission layer; or
- (b) to a mango plant if it is accompanied by a treatment certificate for the plant issued by—
 - (i) an interstate inspector; or
 - (ii) an authorised person.

80 Restrictions on movement out of pest quarantine area

(1) A person must not, without an inspector's approval, move a mango leafhopper, or a prescribed part of a mango plant, out of a pest quarantine area.

(2) An inspector may give an approval under subsection (1) only if the inspector is satisfied the movement of the mango leafhopper or prescribed part will not pose a significant risk of spreading mango leafhopper in Queensland.

(3) In this section—

[s 81]

prescribed part, of a mango plant, means a part of the mango plant other than the fruit of the plant and any stems attached to the fruit.

81 Restrictions on movement within pest quarantine area

- (1) A person must not, without an inspector's approval, move a mango leafhopper, or a plant infested with mango leafhopper, from a parcel of land within a pest quarantine area to another parcel of land within the area.
- (2) An inspector may give an approval under subsection (1) only if the inspector is satisfied the movement of the mango leafhopper or plant will not pose a significant risk of spreading mango leafhopper in the pest quarantine area.

Part 6 Red banded mango caterpillar

82 Definition for pt 6

In this part—

pest quarantine area means the pest quarantine area declared under section 83.

83 Declaration of pest quarantine area

The area north of latitude 13°45' south is declared to be a pest quarantine area for mango caterpillar.

Editor's note—

Latitude 13°45' south passes near Coen.

84 Object of quarantine

The object of the quarantine is to prevent mango caterpillar spreading in Queensland.

85 Restriction on moving live mango caterpillars and mango plants

A person must not, without an inspector's approval, move a live mango caterpillar or a mango plant—

- (a) from a parcel of land in the pest quarantine area to another parcel of land in the area; or
- (b) into or out of the pest quarantine area.

Part 7 Mediterranean fruit fly

86 Definitions for pt 7

In this part—

approved condition, for a plant, means the plant is in a condition approved by the chief executive or an inspector.

host plant means a plant mentioned in schedule 8.

pest quarantine area means the pest quarantine area declared under section 87.

87 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for Mediterranean fruit fly.

88 Object of quarantine

The object of the quarantine is to prevent the introduction of Mediterranean fruit fly into Queensland.

[s 89]

89 Restriction on introducing mediterranean fruit fly and infested plant

- (1) A person must not, without an inspector's approval, introduce into Queensland—
 - (a) Mediterranean fruit fly; or
 - (b) a plant infested with Mediterranean fruit fly.
- (2) An inspector may give an approval only if the inspector is satisfied the introduction of Mediterranean fruit fly or the plant will not pose a significant risk of introducing Mediterranean fruit fly into Queensland.

90 Restriction on introducing Mediterranean fruit fly host plant

- (1) This section applies for a host plant, if the host plant has been grown at or comes from a place that is within 15km of an infestation of Mediterranean fruit fly.
- (2) A person must not introduce the host plant into Queensland unless—
 - (a) for a host plant mentioned in schedule 8, part 1—an inspector approves the introduction of the plant; or
 - (b) for a host plant mentioned in schedule 8, part 2—the plant has been harvested in a mature green condition; or
 - (c) for a host plant mentioned in schedule 8, part 3—the plant's skin has not been broken and the flesh has not been exposed when the plant was harvested.
- (3) An inspector may give an approval under subsection (2)(a) only if the inspector is satisfied the host is free from evidence of Mediterranean fruit fly and the plant—
 - (a) has been treated for mediterranean fruit fly; or
 - (b) is in an approved condition.

Part 8 Papaya ringspot

91 Definition for pt 8

In this part—

pest quarantine area means the pest quarantine area declared under section 92.

92 Declaration of pest quarantine area

The area south of latitude 24°30' south and east of longitude 150°00' east is declared to be a pest quarantine area for papaya ringspot.

Editor's note—

Latitude 24°30' south, longitude 150°00' east is in the vicinity of Moura.

93 Object of quarantine

The object of the quarantine is to prevent papaya ringspot being brought out of the pest quarantine area.

94 Restriction on moving prohibited plants

- (1) A person must not, without an inspector's approval, bring a prohibited plant out of the pest quarantine area.
- (2) An inspector may give an approval under subsection (1) only if the inspector is satisfied the plant is free of papaya ringspot.
- (3) In this section—

plant does not include the fruit or seed of the plant.

prohibited plant means—

- (a) a plant of the genus *Carica*; or
- (b) a plant of the family *Cucurbitaceae*.

Example for paragraph (a) of a plant of the genus Carica—

[s 95]

papaya plant

Examples for paragraph (b) of plants of the family Cucurbitaceae—

- cucumber
- melon
- pumpkin
- squash

Part 9 Potato pests

Division 1 Preliminary

95 Definitions for pt 9

In this part—

pest quarantine area means the pest quarantine area declared under section 96.

potato pest means the following pests—

- (a) golden nematode;
- (b) potato cyst nematode.

potato pest area means an area in a State, other than Queensland, within 20km of an infestation of a potato pest.

restricted item means the following—

- (a) soil;
- (b) a plant of the *Solanaceae* family.

Examples of plants of the Solanaceae family—

- capsicum
- potato
- thornapple

- tobacco
- tomato

Division 2 Pest quarantine area and object of quarantine

96 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for potato pest.

97 Object of quarantine

The object of the quarantine is to prevent the introduction into Queensland of potato pest.

Division 3 General pest control measures

98 Introduction of restricted item

- (1) A person must not introduce a restricted item into Queensland if the restricted item has been in a potato pest area unless—
 - (a) an inspector has given approval; and
 - (b) if the approval is given on conditions, the person has complied with the conditions.
- (2) An inspector may give an approval under subsection (1) only if the inspector is satisfied the introduction of the restricted item will not pose a significant risk of introducing potato pest into Queensland.

[s 99]

99 Introduction of other thing

- (1) A person must not introduce a thing, other than a restricted item, into Queensland if the thing has come from a potato pest area unless—
 - (a) the thing is accompanied by a certificate from an interstate inspector that states potato pest does not exist at the place; or
 - (b) an inspector has given approval and, if the approval is given on conditions, the person has complied with the conditions; or
 - (c) the thing is not a plant and all soil has been removed from it.
- (2) An inspector may give an approval only if the inspector is satisfied the introduction of the thing will not pose a significant risk of introducing potato pest into Queensland.

100 Restrictions on planting potato tuber

A person must not, without an inspector's approval, plant a potato tuber if the potato tuber—

- (a) has been in a potato pest area; and
- (b) is not substantially free of soil.

Part 10 Strawberry plant pests

101 Definitions for pt 10

In this part—

accredited business means a business accredited under a strawberry runner certification scheme by the chief executive of an interstate department.

authorised person means a person authorised, by an interstate inspector or the chief executive of an interstate department of the State in which a strawberry plant is grown, to issue a strawberry runner scheme certificate for the plant.

pest quarantine area means the pest quarantine area declared under section 102.

strawberry plant means a plant of the genus *Fragaria* spp.

strawberry plant pest means the following—

- (a) *Strawberry crinkle virus*;
- (b) *Strawberry mild yellow edge associated virus*;
- (c) strawberry mottle virus (uncharacterised).

strawberry runner certification scheme means a scheme for the production of strawberry plants that—

- (a) ensures the plants grown by an accredited business are free of strawberry plant pest at the time of despatch from the business; and
- (b) is monitored by the chief executive for an interstate department of the State in which the plants are grown; and
- (c) is approved by the chief executive.

strawberry runner scheme certificate, for a plant, means a certificate that states the plant has been produced under the conditions of a strawberry runner certification scheme.

102 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for strawberry plant pest.

103 Object of quarantine

The object of the quarantine is to prevent the introduction of strawberry plant pest into Queensland.

[s 104]

104 Restriction on introducing strawberry plant pest and infested plant

A person must not, without an inspector's approval, introduce into Queensland—

- (a) strawberry plant pest; or
- (b) a plant infested with strawberry plant pest.

105 Restriction on introducing strawberry plants

- (1) A person must not, without an inspector's approval, introduce into Queensland a strawberry plant unless the plant—
 - (a) has been produced by an accredited business; and
 - (b) is accompanied by a strawberry runner scheme certificate for the plant issued by—
 - (i) an interstate inspector; or
 - (ii) an authorised person.
- (2) An inspector may give an approval only if the inspector is satisfied the introduction of the plant will not pose a significant risk of introducing strawberry plant pest into Queensland.

Part 11 Pests of sugarcane

Division 1 Preliminary

113 Definitions for pt 11

In this part—

pest quarantine area means each of the pest quarantine areas declared under section 114.

sugarcane plant pest means a pest mentioned in schedule 11.

Division 2 Pest quarantine areas and objects of quarantine

114 Declaration of pest quarantine areas

- (1) Each area described in schedule 10 is declared to be a pest quarantine area for a sugarcane plant pest.

Editor's note—

Maps of the quarantine areas are available for inspection at the department's head office at 80 Ann Street, Brisbane and at the following places—

- (a) Maroochy Research Station at Mayers Road, Nambour;
 - (b) Centre for Wet Tropics Research at South Johnstone Road, South Johnstone;
 - (c) the department's regional office at 21 Redden Street, Cairns.
- (2) Attachment 2 to this regulation shows the approximate location of each pest quarantine area.
- (3) The attachment—
- (a) does not form part of this regulation; and
 - (b) must be revised if the area of a pest quarantine area is amended.
- (4) The revision must be made when the pest quarantine area is amended.

115 Objects of quarantine

The objects of the quarantine for each pest quarantine area are—

- (a) to prevent the introduction into Queensland of sugarcane plant pests; and
- (b) to prevent the spread of the pests in Queensland; and

[s 116]

- (c) to control or remove pest infestation of sugarcane plants in the pest quarantine area.

Division 3 General pest control measures

116 Restriction on introducing sugarcane plant

- (1) A person must not, without an inspector's approval, introduce a sugarcane plant into Queensland.
- (2) An inspector may give an approval only if the inspector is satisfied the introduction of the plant will not pose a significant risk of introducing a sugarcane plant pest into Queensland.

117 Restriction on moving sugarcane plant

A person must not, without an inspector's approval, move a sugarcane plant—

- (a) into a pest quarantine area; or
- (b) out of a pest quarantine area.

118 Restriction on moving appliances

A person must not, without an inspector's approval, move into or out of a pest quarantine area—

- (a) an appliance that has been in contact with a sugarcane plant; or
- (b) soil on which a sugarcane plant is growing or has been growing.

118A Restriction on planting and cultivating non-approved sugarcane variety

A person must not, without an inspector's approval, plant or cultivate in a pest quarantine area a variety of sugarcane that is

not, under section 11A of the Act, declared by the chief executive to be an approved plant variety for planting or cultivating in the area.

Editor's note—

See the *Plant Protection (Approved Sugarcane Varieties) Declaration 2003*.

119 Restriction on planting infested plant

- (1) A person must not, without an inspector's approval, plant an infested plant in a pest quarantine area.
- (2) An inspector may give an approval only if the inspector is satisfied the planting is to be carried out—
 - (a) for research or educational purposes; and
 - (b) in a way that is not likely to spread the pest.
- (3) In this section—

infested plant means a sugarcane plant infested with a sugarcane plant pest.

120 Restriction on cultivating sugarcane plant infested with sugarcane Fiji disease

- (1) A person must not, without an inspector's approval, cultivate a sugarcane plant infested with sugarcane Fiji disease.
- (2) An inspector may give an approval only if the inspector is satisfied the cultivation is to be carried out—
 - (a) on conditions in the approval; and
 - (b) in a way that is not likely to spread sugarcane Fiji disease—
 - (i) in a pest quarantine area; or
 - (ii) out of a pest quarantine area.

[s 121]

121 Restriction on cultivating sugarcane plant infested with sugarcane plant pest other than sugarcane smut

- (1) A person must not, without an inspector's approval, cultivate a sugarcane plant infested with a sugarcane plant pest, other than sugarcane smut, after the plant's fourth year of cultivation.
- (2) In this section—
fourth year of cultivation, for a sugarcane plant, means the fourth year after planting the plant.

122 Restriction on moving sugarcane plant infested with sugarcane plant pest

- (1) This section applies to an owner of land in a pest quarantine area if the owner is growing a sugarcane plant infested with a sugarcane plant pest on the land.
- (2) The owner must not, without an inspector's approval, move, or allow another person to move, a plant—
 - (a) from the owner's land to another person's parcel of land in the pest quarantine area; or
 - (b) out of the pest quarantine area.
- (3) This section does not apply to a person who is moving sugarcane from the owner's land directly to a mill in the pest quarantine area.

Part 12 Asian sugarcane planthopper

123 Definitions for pt 12

In this part—

Asian sugarcane planthopper means the pest *Perkinsiella thompsoni* (Muir).

Note—

Perkinsiella thompsoni is a species within the genus *Perkinsiella*, by reference to which the sugarcane planthopper is prescribed as a pest under schedule 1.

pest quarantine area means the pest quarantine area declared under section 124.

124 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for Asian sugarcane planthopper.

125 Objects of quarantine

The objects of the quarantine are—

- (a) to prevent the movement of Asian sugarcane planthopper into the pest quarantine area; and
- (b) to prevent or control the spread of Asian sugarcane planthopper in areas in the pest quarantine area in which sugarcane is commercially produced; and
- (c) to control or remove pest infestation of Asian sugarcane planthopper in the pest quarantine area.

126 Restriction on moving Asian sugarcane planthopper

A person must not, without an inspector's approval, move Asian sugarcane planthopper—

- (a) into the pest quarantine area; or
- (b) from a parcel of land in the pest quarantine area to another parcel of land in the area.

126A Restriction on moving appliances

- (1) A person must not, without an inspector's approval, move an appliance that has been in contact with a sugarcane plant that

[s 126B]

comes from an area infested with Asian sugarcane planthopper—

- (a) into the pest quarantine area; or
 - (b) from a parcel of land in the pest quarantine area to another parcel of land in the area.
- (2) An inspector may give an approval, with or without conditions, only if the inspector is satisfied the movement of the appliance will not pose a significant risk of—
- (a) introducing Asian sugarcane planthopper into the pest quarantine area; or
 - (b) spreading Asian sugarcane planthopper in the pest quarantine area.

126B Restriction on moving sugarcane plants

- (1) A person must not, without an inspector's approval, move a sugarcane plant that comes from an area infested with Asian sugarcane planthopper—
- (a) into the pest quarantine area; or
 - (b) from a parcel of land in the pest quarantine area to another parcel of land in the area.
- (2) An inspector may give an approval, with or without conditions, only if the inspector is satisfied the movement of the sugarcane plant will not pose a significant risk of—
- (a) introducing Asian sugarcane planthopper into the pest quarantine area; or
 - (b) spreading Asian sugarcane planthopper in the pest quarantine area.

Part 13 Cape York Peninsula targeted pests

127 Definitions for pt 13

In this part—

pest quarantine area means the pest quarantine area declared under section 128.

targeted pest means a pest mentioned in schedule 12.

128 Declaration of pest quarantine area

The area north of latitude 13°45' south is declared to be a pest quarantine area for a targeted pest.

Editor's note—

Latitude 13°45' south passes near Coen.

129 Objects of quarantine

The objects of the quarantine are—

- (a) to prevent a targeted pest being brought out of the pest quarantine area; and
- (b) to prevent its spread in the pest quarantine area.

130 Restriction on moving targeted pest and plant infested with targeted pest out of pest quarantine area

- (1) A person must not, without an inspector's approval, move the following out of the pest quarantine area—
 - (a) a targeted pest;
 - (b) a plant infested with a targeted pest.
- (2) An inspector may give an approval only if the inspector is satisfied the movement of the targeted pest or plant will not

[s 131]

pose a significant risk of spreading the targeted pest in Queensland.

131 Restriction on moving plant infested with targeted pest within pest quarantine area

- (1) A person must not, without an inspector's approval, move a plant infested with a targeted pest within the pest quarantine area.
- (2) An inspector may give an approval only if the inspector is satisfied the movement of the targeted pest or plant will not pose a significant risk of spreading the targeted pest in the pest quarantine area.

132 Treatment of targeted pest or infested plant

- (1) This section applies to a person moving a targeted pest or a plant infested with a targeted pest within or out of the pest quarantine area.
- (2) If an inspector directs the person to treat the targeted pest or infested plant, the person must carry out the treatment in the way directed by the inspector.
- (3) If an inspector directs the person to allow the inspector to treat the targeted pest or infested plant, the person must not refuse to allow the inspector to carry out the treatment.
- (4) When making the direction, the inspector must give the person an offence warning.

Part 14 Branched broomrape

133 Definitions for pt 14

In this part—

branched broomrape means the pest *Orobanche ramosa* L. (common name—branched broomrape).

pest quarantine area means the pest quarantine area declared under section 134.

134 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for branched broomrape.

135 Objects of quarantine

The objects of the quarantine are—

- (a) to prevent the introduction of branched broomrape into the pest quarantine area; and
- (b) to prevent or control the spread of branched broomrape in the pest quarantine area; and
- (c) to control or remove pest infestation of branched broomrape in the pest quarantine area.

135A Restriction on moving branched broomrape

- (1) A person must not, without an inspector's approval, move branched broomrape—
 - (a) into the pest quarantine area; or
 - (b) from a parcel of land in the pest quarantine area to another parcel of land in the area.
- (2) An inspector may give an approval, with or without conditions, only if the inspector is satisfied the movement of the branched broomrape will not pose a significant risk of spreading branched broomrape in the pest quarantine area.

[s 135B]

135B Restriction on moving high risk items

- (1) A person must not, without an inspector's approval, move a high risk item that the person knows, or ought reasonably to know, has been in a branched broomrape pest area—
 - (a) into the pest quarantine area; or
 - (b) from a parcel of land in the pest quarantine area to another parcel of land in the area.
- (2) An inspector may give an approval, with or without conditions, only if the inspector is satisfied the movement of the high risk item will not pose a significant risk of—
 - (a) introducing branched broomrape into the pest quarantine area; or
 - (b) spreading branched broomrape in the pest quarantine area.
- (3) In this section—

branched broomrape pest area means an area in a State, other than an area in Queensland, within 50km of an infestation of branched broomrape.

high risk item means any of the following—

- (a) soil;
- (b) an appliance;
- (c) an animal kept, or usually kept, for a domestic purpose or in a captive state;
- (d) a plant.

plant includes—

- (a) grain, legumes and oilseed; and
- (b) fodder made from a crop plant; and
- (c) fruit and vegetables; and
- (d) the part of a crop plant remaining after its seed is harvested.

Part 16 Electric ant

Division 1 Preliminary

153 Definitions for pt 16

In this part—

electric ant means the pest *Wasmannia auropunctata* (Roger).

high risk item see section 154.

pest quarantine area means the pest quarantine area declared under section 155.

restricted area means a restricted area declared under section 162.

soil includes a soil substitute that could be used as a growing medium for a plant.

Examples—

potting mix, organic mulch

154 Meaning of *high risk item*

(1) A *high risk item* means any of the following—

(a) a plant that has been grown, kept or harvested in a restricted area;

Examples—

- a pot plant that has been kept at premises in a restricted area
- fruit or flowers picked in a restricted area

(b) soil or a thing that has soil attached;

Example—

turf

(c) waste material, other than soil, that—

(i) comes from the ground; or

[s 154]

- (ii) is manufactured from material that comes from the ground;

Example—

material extracted from the ground as part of building construction

- (d) waste bio-solids that are a product of processing or manufacturing an animal, a plant, or anything that comes from an animal or a plant;

Examples—

- solid waste from a sewage treatment plant
- solid waste produced by processing an animal at an abattoir

- (e) a container used for growing, harvesting, moving, packing or storing that contains soil or has soil attached;

Examples of a container—

beehive, bin, carton, case, crate, pallet, pot

- (f) baled hay or straw;
- (g) an appliance used—
- (i) to disturb soil; or
- (ii) for building work or construction; or

Examples—

formwork, scaffolding

- (iii) for packing or moving a thing mentioned in paragraphs (a) to (f).

- (2) Also, a thing is a **high risk item** if—

- (a) the thing is associated with an activity performed by a person; and

Example of a thing associated with an activity—

rubbish that is put out for collection

- (b) an inspector—
- (i) decides the thing may spread electric ant; and

-
- (ii) notifies the person of the decision.

Division 2 Pest quarantine area and objects of quarantine

155 Declaration of pest quarantine area

- (1) The area consisting of the prescribed suburban areas, in the Cairns Regional Council's local government area, shown on the electric ant pest quarantine area map held by the department, is declared to be a pest quarantine area for electric ant.

- (2) In this section—

prescribed suburban areas means each of the following areas—

- (a) Barron;
- (b) Caravonica;
- (c) Holloways Beach;
- (d) Kewarra Beach;
- (e) MacAlister Range;
- (f) Machans Beach;
- (g) Smithfield;
- (h) Trinity Beach;
- (i) Trinity Park;
- (j) Yorkeys Knob.

Editor's note—

The electric ant pest quarantine area map may be inspected during business hours at the department's office at 21–23 Redden Street, Cairns, and may also be viewed on the department's website at <www.dpi.qld.gov.au>.

[s 156]

156 Objects of quarantine

The objects of the quarantine for a pest quarantine area are—

- (a) to prevent the movement of electric ant within or out of the pest quarantine area; and
- (b) to eradicate electric ant in Queensland.

Division 3 Pest control measures for pest quarantine area

Subdivision 1 Restrictions on movement

157 Restrictions on movement within or out of pest quarantine area

A person must not, without an inspector's approval, move a live electric ant within or out of a pest quarantine area.

Subdivision 2 Other obligations of land owners

158 Definition for sdiv 2

In this subdivision—

land does not include a dwelling house on the land.

159 Obligation of owner of land to allow surveillance

- (1) This section applies if an inspector requires an owner of land in a pest quarantine area to allow the inspector to carry out surveillance on the land to look for and monitor the spread of electric ant.
- (2) The owner must not refuse to allow the inspector to carry out the surveillance.

- (3) Without limiting subsection (1), an inspector may carry out surveillance on the land by putting baits, lures or traps on the land.
- (4) The inspector may direct the owner to remove any thing on the land that would obstruct the inspector carrying out surveillance on the land.

Examples of things for subsection (4)—
rubbish, scrap metal, vegetation

- (5) When making the requirement or direction, the inspector must give the person an offence warning.

160 Restriction on who may treat land or things

- (1) An owner of land in a pest quarantine area must not, unless directed by an inspector, treat, or allow another person, other than an inspector or an appropriate person, to treat—
 - (a) the land; or
 - (b) the following on the land—
 - (i) electric ant;
 - (ii) a plant or other thing infested with electric ant.
- (2) In this section—

appropriate person means a person who is authorised by the chief executive.

161 Treatment of infested land or things

- (1) This section applies if an inspector directs an owner of land infested with electric ant to treat, or allow an inspector to treat—
 - (a) the land; or
 - (b) the following on the land—
 - (i) electric ant;

[s 162]

- (ii) a plant or other thing infested with electric ant.
- (2) If the owner is directed to carry out the treatment, the owner must carry out the treatment in the way directed by the inspector.
- (3) If the owner is directed to allow an inspector to carry out the treatment, the owner must not refuse to allow the inspector to carry out the treatment.
- (4) When making the direction, the inspector must give the owner an offence warning.

Division 4 Restricted areas

Subdivision 1 Declaration

162 Declaration of restricted area

- (1) If the chief executive considers it necessary to achieve the objects of the quarantine for a pest quarantine area, the chief executive may—
 - (a) declare an area in the pest quarantine area to be a restricted area; and
 - (b) define the boundaries of the area so declared.
- (2) The chief executive must give notice of the declaration in a newspaper that is published in the Cairns Regional Council's local government area at least 5 days a week and circulates generally in the restricted area.
- (3) The notice must state each of the following—
 - (a) that an area has been declared to be a restricted area;
 - (b) the location and boundaries of the area;
 - (c) where a map showing the boundaries of the area is available for public inspection.

Subdivision 2 Pest control measures for restricted areas

163 Application of sdiv 2

This subdivision does not limit division 3.

164 Restrictions on movement within or out of restricted area

A person must not, without an inspector's approval, move a high risk item within or out of a restricted area.

Part 17 Mango malformation disease

165 Definitions for pt 17

In this part—

mango malformation disease means a fungal disease of mango plants caused by several different species of *Fusarium*, including *Fusarium mangiferae*.

mango plant means *Mangifera indica* L.

pest quarantine area means the pest quarantine area declared under section 166.

166 Declaration of pest quarantine area

The whole of Queensland is declared to be a pest quarantine area for mango malformation disease.

167 Objects of quarantine

The objects of the quarantine for the pest quarantine area are—

[s 168]

- (a) to prevent the introduction of mango malformation disease into the pest quarantine area; and
- (b) to prevent or control the spread of mango malformation disease in the pest quarantine area; and
- (c) to control or remove mango malformation disease in or from the pest quarantine area.

168 Restriction on introduction

- (1) A person must not, without an inspector's approval, introduce into the pest quarantine area—
 - (a) mango malformation disease; or
 - (b) a mango plant, other than the fruit of a mango plant; or
 - (c) an appliance that has been in contact with a mango plant.
- (2) An inspector may give an approval, with or without conditions, for the introduction of a thing mentioned in subsection (1)(a) to (c) only if the inspector is satisfied the introduction of the thing will not pose a significant risk of spreading mango malformation disease in the pest quarantine area.

168A Restriction on movement within the pest quarantine area

- (1) A person must not, without an inspector's approval, move from a parcel of land in the pest quarantine area to another parcel of land in the area—
 - (a) mango malformation disease; or
 - (b) a mango plant that the person knows, or ought reasonably to know, is infected with mango malformation disease; or
 - (c) an appliance that has been in contact with a mango plant the person knows, or ought reasonably to know, is infected with mango malformation disease.

- (2) An inspector may give an approval, with or without conditions, for the movement of a thing mentioned in subsection (1)(a) to (c) only if the inspector is satisfied the movement of the thing will not pose a significant risk of spreading mango malformation disease in the pest quarantine area.

Chapter 4 Transitional provisions

Part 1 Transitional provision for Plant Protection Amendment Regulation (No. 5) 2003

173 Notification of new restrictions for restricted area

- (1) This section applies if, before the commencement of this section, the chief executive declares an area to be a restricted area.
- (2) If the chief executive decides the amending regulation should, on or after the commencement, apply to the restricted area, the chief executive must give notice of the decision in each newspaper in which the chief executive gave notice of the declaration.
- (3) The notice must state the following—
 - (a) a sufficient reference to the location of the restricted area to identify the area;
 - (b) the day the restricted area was declared;
 - (c) that each of the following are in addition to the information or requirements stated, under the unamended regulation, section 49(3) in the notice of the declaration—

[s 174]

- (i) if a person is carrying on a commercial activity in the area, the circumstances under which the person is required to treat high risk items and sign a fire ant declaration;
 - (ii) the restriction on disturbing soil in the area;
 - (iii) the circumstances under which high risk items associated with a business person's commercial activity must be treated and certified.
- (4) If the chief executive gives notice under subsection (2), the amending regulation applies to the restricted area from the day of publication, or first publication, of the notice.
- (5) In this section—

amending regulation means the *Plant Protection Amendment Regulation (No. 5) 2003*.

unamended regulation means this regulation as in force before the commencement.

Part 2

Transitional provision for Plant Protection Amendment Regulation (No. 2) 2012

174 Notification of new restrictions for restricted area

- (1) This section applies if, before the commencement of this section, the chief executive declares an area to be a restricted area for chapter 3, part 2.
- (2) If the chief executive decides the amending regulation should, on or after the commencement of this section, apply to the restricted area, the chief executive must give notice of the decision—

-
- (a) in each newspaper in which the chief executive gave notice of the declaration; and
 - (b) on the department's website.

Editor's note—

The address of the department's website is <www.daff.qld.gov.au>.

- (3) The notice under subsection (2) must state the following—
 - (a) a sufficient reference to the location of the restricted area to identify the area;
 - (b) the day the restricted area was declared;
 - (c) that the restricted area is—
 - (i) a high risk restricted area; or
 - (ii) a low risk restricted area;
 - (d) where a map showing the boundaries of the restricted area is available for public inspection;
 - (e) that the restrictions mentioned in sections 51 to 58, as in force after the commencement of this section, apply to the restricted area.
- (4) A notice under subsection (2)(a) must also state that the notice on the department's website shows the boundaries of the restricted area.
- (5) A notice under subsection (2)(b) must also show the boundaries of the restricted area.
- (6) If the chief executive gives notice under subsection (2), the amending regulation applies to the restricted area from the day of publication, or first publication, of the notice.
- (7) In this section—

amending regulation means the *Plant Protection Amendment Regulation (No. 2) 2012*.

Schedule 1 Prescribed pests

section 4

Part 1 Animals**Insects and mites**

Common name	Scientific name and author
African black beetle	<i>Heteronychus arator</i> (Fabricius)
Argentine ant	<i>Linepithema humile</i> (Mayr)
armyworm	<i>Mythimna unipuncta</i> Haworth
ash whitefly	<i>Siphoninus phillyreae</i> (Haliday)
Bactrocera atrisetosa	<i>Bactrocera atrisetosa</i> (Perkins)
Bactrocera decipiens	<i>Bactrocera decipiens</i> (Drew)
Bactrocera kirki	<i>Bactrocera kirki</i> (Froggatt)
Bactrocera tau	<i>Bactrocera tau</i> (Walker)
Bactrocera trilineola	<i>Bactrocera trilineola</i> Drew
Bactrocera trivialis	<i>Bactrocera trivialis</i> (Drew)
Bactrocera xanthodes	<i>Bactrocera xanthodes</i> (Broun)
banana fruit fly	<i>Bactrocera musae</i> (Tryon)
banana skipper butterfly	<i>Erionota thrax</i> (Linnaeus)
banana stem weevil	<i>Odoiporus longicollis</i> (Oliver)
banana weevil borer	<i>Cosmopolites sordidus</i> (Germar)
Bezzi fruit fly	<i>Bactrocera occipitalis</i> (Bezzi)
black carpenter ant	<i>Camponotus pennsylvanicus</i> (De Geer)
boll weevil	<i>Anthonomus grandis</i> Boheman

Common name	Scientific name and author
breadfruit fruit fly	<i>Bactrocera umbrosa</i> (Fabricius)
Californian red scale	<i>Aonidiella aurantii</i> (Maskell)
carambola fruit fly	<i>Bactrocera carambolae</i> Drew and Hancock
Chinese fruit fly	<i>Bactrocera minax</i> (Enderlein)
citrus blackfly	<i>Aleurocanthus woglumi</i> Ashby
citrus fruit borer	<i>Citripestis sagitifera</i> (Moore)
citrus gall wasp	<i>Bruchophagus muli</i> (Boucek and Brough)
citrus psyllid	<i>Diaphorina citri</i> Kuw.
citrus red mite	<i>Panonychus citri</i> (McGregor)
cocoa pod borer	<i>Conopomorpha cramerella</i> (Snellen)
codling moth	<i>Cydia pomonella</i> (Linnaeus)
Colorado potato beetle	<i>Leptinotarsa decemlineata</i> (Say)
Cook Islands fruit fly	<i>Bactrocera melanotus</i> (Coquillett)
cotton boll weevil	<i>Anthonomus grandis</i> Boheman
cucumber fly	<i>Bactrocera cucumis</i> (French)
cut worm	<i>Agrotis interjectionis</i> (Guenée)
Dacus bivattatus	<i>Dacus bivattatus</i> (Bigot)
Dacus ciliatus	<i>Dacus ciliatus</i> Loew
electric ant	<i>Wasmannia auropunctata</i> (Roger)
European corn borer	<i>Pyrausta nubilalis</i> (Hübner)
European flower thrips	<i>Thrips vulgatissimus</i> Haliday
European red mite	<i>Panonychus ulmi</i> (Koch)
European wasp	<i>Vespula germanica</i> (Fabricius)
false codling moth	<i>Cryptophlebia leucotreta</i> (Meyrick)

Common name	Scientific name and author
Fijian fruit fly	<i>Bactrocera passiflorae</i> (Froggatt)
granary weevil	<i>Sitophilus granarius</i> (Linnaeus)
grape leaf-folder	<i>Desmia funeralis</i> (Hübner)
grape leafhopper	<i>Erythroneura elegantula</i> Osborn
grape Phylloxera Type B	<i>Daktulosphaira vitifoliae</i> (Fitch)
grape thrips	<i>Drepanothrips reuteri</i> Uzel
grasshoppers and locusts	Acrididae
guava fruit fly	<i>Bactrocera correcta</i> (Bezzi)
hessian fly	<i>Mayetiola destructor</i> (Say)
Indian fruit fly	<i>Bactrocera caryeae</i> (Kapoor)
Japanese bayberry whitefly	<i>Parabemisia myricae</i> (Kuwana)
Japanese beetle	<i>Popillia japonica</i> Newmann
Japanese citrus fruit fly	<i>Bactrocera tsuneonis</i> (Miyake)
khapra beetle	<i>Trogoderma gladrum</i> (Herbst)
khapra beetle	<i>Trogoderma granarium</i> Everts
khapra beetle	<i>Trogoderma inclusum</i> Le Conte
large grain borer	<i>Prostephanus truncates</i> (Horn)
lettuce aphid	<i>Nasonovia ribisnigri</i> (Mosley)
mango fruit borer	<i>Citripestis eutraptera</i> (Meyrick)
mango leaf gall midge	<i>Procontarinia</i> spp.
mango leafhopper	<i>Idioscopus clypealis</i> (Lethierry)
mango leafhopper	<i>Idioscopus nitidulus</i> (= <i>niveosparsus</i>) (Walker)
mango pulp weevil	<i>Sternochetus frigidus</i> (Fabricius)
mango seed weevil	<i>Sternochetus mangiferae</i> (Fabricius)

Common name	Scientific name and author
Mediterranean fruit fly	<i>Ceratitis capitata</i> (Wiedemann)
melon fly	<i>Bactrocera cucurbitae</i> (Coquillett)
melon thrips	<i>Thrips palmi</i> Karny
Mexican fruit fly	<i>Anastrepha ludens</i> (Loew)
Navel orangeworm	<i>Amyelois transitella</i> Walker
New Zealand flower thrips	<i>Thrips obscuratus</i> (Crawford)
omnivorous leafroller	<i>Platynota sultana</i> Walsingham
Oriental fruit fly	<i>Bactrocera dorsalis</i> (Hendel)
Pacific spider mite	<i>Eotetranychus willamettei</i> (McGregor)
palm leaf beetle	<i>Brontispa longissima</i> (Gestro)
papaya fruit fly	<i>Bactrocera papayae</i> Drew and Hancock
peach fruit fly	<i>Bactrocera zonata</i> (Saunders)
pea leafminer	<i>Liriomyza huidobrensis</i> (Blanchard)
pear fruit moth	<i>Numonia pirivorella</i> (Matsumura)
Philippine fruit fly	<i>Bactrocera philippinensis</i> Drew and Hancock
pink bollworm	<i>Pectinophora gossypiella</i> (Saunders)
pinkspotted bollworm	<i>Pectinophora scutigera</i> (Holdaway)
plum weevil or plum curculio	<i>Conotrachelus nenuphar</i> (Herbst)
poinsettia whitefly or silverleaf whitefly	<i>Bemisia tabaci</i> (Gennadius) (biotype B) (= <i>B. argentifolii</i> Bellows and Perring)
potato moth	<i>Phthorimaea operculella</i> (Zeller)
Queensland fruit fly	<i>Bactrocera tryoni</i> (Froggatt)
red banded mango caterpillar	<i>Deanolis sublimbalis</i> (Snellen)

Common name	Scientific name and author
red imported fire ant	<i>Solenopsis invicta</i> Buren
rice water weevil	<i>Lissorhoptrus oryzophilus</i> Kuschel
rice weevil	<i>Sitophilus oryzae</i> (Linnaeus)
rough strawberry weevil	<i>Otiorhynchus rugosostriatus</i> (Goeze)
Russian wheat aphids	<i>Diuraphis noxia</i> (Mordvilko)
rust red flour beetle	<i>Tribolium castaneum</i> (Herbst)
serpentine leafminer	<i>Liriomyza trifolii</i> (Burgess)
solanum fruit fly	<i>Bactrocera latifrons</i> (Hendel)
South African citrus thrips	<i>Scirtothrips aurantii</i> Faure
spider mite	<i>Tetranychus piercei</i> McGregor
spiraling whitefly	<i>Aleurodicus dispersus</i> Russell
Sri Lankan fruit fly	<i>Bactrocera kandiensis</i> Drew and Hancock
stem borer	<i>Chilo</i> spp.
strawberry bud weevil	<i>Anthonomus bisignatus</i> Schenkling
strawberry tortrix	<i>Acleris comariana</i> Lienig and Zeller
sugarcane borer	<i>Scirpophaga</i> spp.
sugarcane borer	<i>Sesamia</i> spp.
sugarcane borer	<i>Tetramoera schistanceana</i> (Snellen)
sugarcane leafhopper	<i>Eumetopina</i> spp.
sugarcane leafhopper	<i>Pyrilla perpusilla</i> (Walker)
sugarcane planthopper	<i>Perkinsiella</i> spp.
sugarcane scale	<i>Aulacaspis tegalensis</i> (Zehntner)
sugarcane weevil borer	<i>Rhabdoscelus obscurus</i> (Boisduval)
sugarcane whitefly	<i>Aleurolobus barodensis</i> (Maskell)

Common name	Scientific name and author
sugarcane woolly aphid	<i>Ceratovacuna lanigera</i> Zehntner
summer fruit tortrix	<i>Adoxophyes orana</i> Fischer von Rösslerstamm
tobacco beetle	<i>Lasioderma serricorne</i> (Fabricius)
tobacco stem borer	<i>Scrobipalpa heliopa</i> (Lower)
Tongan fruit fly	<i>Bactrocera facialis</i> (Coquillett)
tropical fire ant	<i>Solenopsis geminata</i> (Fabricius)
variegated cutworm	<i>Peridroma saucia</i> (Hebner)
variegated grape leafhopper	<i>Erythroneura variabilis</i> Beamer
vegetable leafminer	<i>Liriomyza sativae</i> Blanchard
warehouse beetle	<i>Trogoderma variabile</i> Ballion
western flower thrips	<i>Frankliniella occidentalis</i> (Pergande)
western grapeleaf skeltonizer	<i>Harrisiana brillians</i> Barnes and McDunnough
woolly whitefly	<i>Aleurothrixus floccosus</i> (Maskell)

Molluscs

Common name	Scientific name and author
giant African snail	<i>Achatina fulica</i> Bowditch
golden apple snail	<i>Pomacea canaliculata</i> (Lamarck 1819)
green snail	<i>Helix aperta</i> (Born)

Part 2 **Pests associated with plant disease**

A Organisms

Nematodes

Bursaphelenchus xylophilus (Steiner and Buhner) Nickle

Ditylenchus destructor Thorne

Globodera pallida (Stone) Behrens (abbreviated name—potato cyst nematode)

Globodera rostochiensis (Wollenweber) Behrens (abbreviated name—golden nematode)

Heterodera avenae (Wollenweber) Filipjev

Heterodera glycines Ichinohe

Pratylenchus coffeae (Zimmermann) Filipjev and Schuurmans Stekhoven

Pratylenchus goodeyi Sher and Allen

Rhadinaphelenchus cocophilus (Cobb) Goodey

Xiphinema index Thorne and Allen

Plants

A plant of the genera *Musa* spp., other than—

- (a) a plant that produces edible fruit; or
- (b) an indigenous plant that is not a volunteer plant.

Berberis spp.

Ensete spp.

Mahonia spp.

Orobanche ramosa L. (common name—branched broomrape)

Striga asiatica

Phytoplasmas

apple chat fruit phytoplasma

apple proliferation phytoplasma
apple rubbery wood phytoplasma
apricot chlorotic leaf roll phytoplasma
apricot witches broom phytoplasma
Australian grapevine yellows phytoplasma
cherry albino (X disease) phytoplasma
cherry necrotic rusty mottle phytoplasma
cherry western X (peach X) phytoplasma
European stone fruit yellows phytoplasma
grapevine flavesence doree phytoplasma
little cherry phytoplasma
little peach phytoplasma
palm lethal yellowing phytoplasma
Parry's disease (pear) phytoplasma
peach chlorotic leaf roll phytoplasma
peach red suture phytoplasma
peach rosette phytoplasma
peach X phytoplasma (including peach eastern X phytoplasma)
peach yellows phytoplasma
pear decline phytoplasma
plum chlorotic leaf roll phytoplasma
sugarcane grassy shoot phytoplasma
sugarcane white leaf phytoplasma (White leaf)

Bacteria

Acidovorax avenae subsp. *avenae* (Manns) Willems *et al.*

Agrobacterium tumefaciens biovar 3 (E.F. Smith and Town.)

Clavibacter michiganensis subsp. *sepedonicus* (Spiek and Kotth.) Davies *et al.*

Erwinia amylovora (Burrill) Winslow *et al.* (abbreviated name—fire blight)

Leifsonia xyli subsp. *xyli* (Davies *et al.*) Evtushenko

“*Liberobacter asiatica*” Jagoueix *et al.*

Panotoea stewartii subsp. *stewartii* (E.F. Smith) Mergaert *et al.*

Pseudomonas angulata (Fromme and Murray) Holland

“*Pseudomonas celebensis*” = banana blood disease bacterium (uncharacterised)

Pseudomonas syringae pv. *phaseolicola* (Burkeholder) Young *et al.*

Pseudomonas syringae pv. *syringae* Van Hall

Pseudomonas syringae pv. *tabaci* (Wolf and Foster) Young *et al.*

Pseudomonas syzygii I. Roberts *et al.*

Ralstonia solanacearum (E.F. Smith) Yabuuchi *et al.*

Xanthomonas albilineans (Ashby) Dowson

Xanthomonas axonopodis pv. *citri* (Hasse) Vauterin

Xanthomonas axonopodis pv. *malvacearum* (E. F. Smith) Dowson

Xanthomonas axonopodis pv. *vasculorum* (Cobb) Dye

Xanthomonas campestris pv. *campestris* (Pammel) Dowson

Xanthomonas campestris pv. *oryzae* (Ishiyama) Swings *et al.*

Xanthomonas campestris pv. *phaseoli* (E. F. Smith) Dye

Xanthomonas campestris pv. *vasculorum* (Cobb)

Xanthomonas fragariae J.K. Kennedy and King

Xanthomonas oryzae pv. *oryzicola* (Ishiyama) Swings *et al.*

Xylella fastidiosa Wells *et al.*

Xylophilus ampelinus (Panagopoulos) Willems *et al.*

Fungi

Albugo candida (Pers.) Kuntze (abbreviated name—white blister of brassica)

-
- Anisogramma anomala* (Peck) E. Müll. (1962)
Apiosporina morbosa (Schwein.) Arx (1954)
Ascochyta rabiei (Pass.) Labr.
Asperisporium caricae (Speg.) Maubl.
Ceratocystis ulmi (Buisman) C. Moreau (1952)
Cercospora longipes E.J. Butler
Ciborinia camelliae L.M. Kohn (1979)
Claviceps africana Freder., Mantle and De Milliano
Claviceps gigantea S.F. Fuentes, Isla, Ullstrup and Rodriguez
Claviceps sorghi P. Kulkarni, Seshadri and Hedge
Coleosporium ipomoeae (Schwein.) Burrill
Colletotrichum kahawae J.M. Waller and P.D. Bridge
Colletotrichum lindemuthianum (Sacc. and Magnus) Scribn.
Cryphonectria cubensis (Bruner) Hodges
Cryphonectria parasitica (Murrill) M.E. Barr (1978)
Deuterophoma tracheiphila Petri
Elsinoe fawcettii Bitanc. and Jenkins
Eutypa lata (Pers.:Fr.) Tul. and C. Tul.
Exobasidium vexans Masee
Fusarium moniliforme J. Sheld. var. *subglutinans* Wollenw. and Reinking
Fusarium oxysporum Schltdl. Fr. f.sp. *chrysanthemi* G.M. Armstrong, J.K. Armstrong and R.H. Littrell
Fusarium oxysporum Schltdl. Fr. f. sp. *cubense* (E.F. Smith) W.C. Snyder and H.N. Hansen
Fusarium oxysporum Schltdl. Fr. f.sp. *lycopersici* (Sacc.) W.C. Snyder and H.N. Hansen
Fusarium oxysporum Schltdl. Fr. f.sp. *vasinfectum* (Atk.) W.C. Snyder and H.N. Hansen
Guignardia bidwellii (Ellis) Viala and Ravaz

- Guignardia citricarpa* Kiely (anamorph *Phyllosticta citricarpa* (McAlpine) Aa)
- Guignardia musae* Racib. (anamorph *Phyllosticta musarum* (Cooke) Aa (1909))
- Gymnosporangium* R. Hedw.
- Hemileia vastatrix* Berk. and Broome
- Magnaporthe grisea* (T.T. Hebert) M.E. Barr (1977)
- Microbotryum violaceum* (Pers.:Pers.) G. Deml. and Oberwinkler
- Monilinia fructigena* Honey in Whetzel (1946)
- Mycosphaerella angulata* W.A. Jenkins (anamorph *Cercospora brachypus* Ellis and Everh.)
- Mycosphaerella fijiensis* M. Morelet (anamorph *Paracercospora fijiensis* (M. Morelet) Deighton)
- Mycosphaerella musae* (Speg.) Syd. and P. Syd.
- Mycosphaerella musicola* J.L. Mulder (anamorph *Pseudocercospora musae* (Zimm.) Deighton)
- Pachymetra chaunorhiza* B.J. Croft and M.W. Dick
- Peronosclerospora maydis* (Racib.) C.G. Shaw
- Peronosclerospora philippinensis* (W. Weston) C.G. Shaw
- Peronosclerospora sacchari* (T. Miyake) Shirai and K. Hara
- Peronosclerospora sorghi* (W. Weston and Uppal) C.G. Shaw
- Peronosclerospora spontanea* (W. Weston) C.G. Shaw
- Peronospora hyoscyami* de Bary
- Phakospora euvitis* Y. Ono (2000)
- Phoma tracheiphila* (Petri) L.A. Kantsch. and Gokaschvili (1948)
- Phymatotrichopsis omnivora* (Duggar) Hennebert
- Phymatotrichum omnivorum* Duggar (1916)
- Physopella ampelopsidis* (Dietel and P. Syd.) Cummins and Ramachar
- Phytophthora cinnamomi* Rands
- Phytophthora fragariae* var. *fragariae* Hickman

Phytophthora ramorum Werres, De Cock and Man in 't Veld
Plasmodiophora brassicae Woronin
Plasmopara halstedii (Farl.) Berl. and DeToni
Pseudopezizicula tetraspora Korf, R.C. Pearson and Zhuang
Pseudopezizicula tracheiphila (Müller-Thurg.) Korf and Zhuang (anamorph
Phialophora tracheiphila (Sacc. and D. Sacc.) Korf)
Puccinia asparagi D.C. (1805)
Puccinia horiana Henn.
Puccinia psidii sensu lato
Pyricularia oryzae Cavara
Roesleria subterranea (Weinm.) Redhead (1985)
Rosellinia necatrix Berl. ex Prill. (1904)
Sclerospora graminicola (Sacc.) J. Schröt.
Sphaceloma arachidis Bitanc. and Jenkins
Sporisorium cruentum (Kühn) K. Vánky
Stagnospora saccharum T.T. Lo and L. Ling (1950)
Synchytrium endobioticum (Schilb.) Percival
Tilletia barclayana (Bref.) Sacc. and P. Syd. (1899)
Tilletia indica Mitra
Uredo rangelii (J.A. Simpson, K. Thomas and C.A. Grgurinovic)
Uromyces gladioli Henn.
Uromyces transversalis (Thüm.) G. Winter
Ustilago scitaminea Syd. (abbreviated name—sugarcane smut)
Verticillium dahliae Kleb. (1913)

B Viruses and viroids

Viruses

Apple chlorotic leaf spot virus
 apple flat limb virus (uncharacterised)

Apple mosaic virus

apple ringspot virus (uncharacterised)

apple rough skin virus (uncharacterised)

apple star crack virus (uncharacterised)

apricot ring pox virus (uncharacterised)

Arabis mosaic virus

Artichoke Italian latent virus

Banana bract mosaic virus (abbreviated name—banana bract mosaic)

Banana bunchy top virus (abbreviated name—banana bunchy top)

Banana streak virus (abbreviated name—banana streak)

Begomovirus Cotton leaf curl virus

bratislava mosaic virus (uncharacterised)

cherry black canker virus (uncharacterised)

Cherry rasp leaf virus

Citrus tristeza virus

Cucumber mosaic virus (abbreviated name—cucumber mosaic)

grapevine Ajinashika virus (uncharacterised)

Grapevine Algerian latent virus

Grapevine Bulgarian latent virus

Grapevine chrome mosaic virus

grapevine corky bark virus (uncharacterised)

grapevine enation virus (uncharacterised)

Grapevine fanleaf virus

grapevine fleck virus (uncharacterised)

Grapevine leafroll virus

Grapevine virus A

Grapevine virus B

Grapevine virus D

Grapevine yellow vein virus

High plains virus

Maize dwarf mosaic virus

Myrobalan latent ringspot virus

Nepovirus Cherry leaf roll virus (blackline)

Papaya ringspot virus type P (abbreviated name—papaya ringspot)

Papaya ringspot virus type W (abbreviated name—papaya ringspot)

Peach rosette mosaic virus

Peach wart virus (uncharacterised)

Peanut stripe virus

Pea seed-borne mosaic virus

Plum pox virus

prune diamond canker virus (uncharacterised)

Prune dwarf virus

Prunus necrotic ringspot virus

Sorghum mosaic virus

Squash mosaic virus

Strawberry crinkle virus

Strawberry mild yellow edge associated virus

strawberry mottle virus (uncharacterised)

Sugarcane bacilliform virus

Sugarcane Fiji disease virus

Sugarcane mosaic virus

sugarcane Ramu stunt virus

sugarcane streak mosaic virus (Potyviridae)

Sugarcane streak virus

sugarcane striate mosaic associated virus (uncharacterised)

Tobacco mosaic virus

Tobacco ringspot virus

Tomato black ring virus

Tomato leaf curl virus

Tomato mosaic virus

Tomato ringspot virus

Tomato yellow leaf curl virus

Watermelon mosaic virus

Wheat spindle streak mosaic virus

Wheat streak mosaic virus

Zucchini yellow mosaic virus

Viroids

Apple scar skin viroid

Avocado sunblotch viroid

Chrysanthemum stunt viroid

Citrus exocortis viroid

Coconut cadang-cadang viroid

Dapple apple viroid

grapevine stem pitting viroid (uncharacterised)

grapevine summer mottle viroid (uncharacterised)

grapevine vein necrosis viroid (uncharacterised)

Grapevine yellow speckle viroid-1

Grapevine yellow speckle viroid-2

Potato spindle tuber viroid

C Disorders

Disorder	Description
bacterial wilt	an occlusion and necrosis of the xylem tissue associated with invasion by plant pathogenic bacteria
blight	a necrosis of leaf or stem tissue, with sudden onset, associated with a plant pathogenic bacterium (bacterial blight) or fungus (fungal blight)
canker	a sharply delineated necrosis or suberisation of the cortical tissue of leaves or stems, associated with a plant pathogenic bacterium or fungus
downy mildew	a necrosis or organoid gall of leaf or stem tissue associated with intercellular hyphae and emergent sporophores of a fungus of the family Peronosporaceae
ergot	an organoid gall of floral and ovule tissue associated with intercellular and extracellular hyphae and emergent sporophores of a fungus of the genus <i>Claviceps</i> Tul., order Hypocreales
fusarium wilt	an occlusion and necrosis of the xylem tissue, associated with plant pathogenic strains of a fungus of the genus <i>Fusarium</i> Link ex Fr., order Moniliales
gall	a swelling of tissue resulting from multiplication of cells (histoplasia), enlargement of cells (hypertrophy) or replacement with tissue of another organism, and associated with an intracellular or intercellular fungus, bacterium, phytoplasma, virus or mite
grey mould	a necrosis of leaf, stem or floral tissue associated with intercellular and extracellular hyphae or emergent sporophores of a fungus of the genus <i>Botrytis</i> Pers. ex Fr., order Moniliales, or <i>Sclerotinia</i> Fuckel, order Helotiales

Disorder	Description
mango malformation	an abnormal development of vegetative shoots and inflorescences of a mango plant, caused by several different species of <i>Fusarium</i> , including <i>Fusarium mangiferae</i>
mosaic (mottles or yellows)	a uniform or patchy variation of normal green colour associated with intracellular phytoplasma, virus or viroid infection
mutant plant	a plant with recombinant deoxyribonucleic acid (DNA) acquired artificially or by natural transmission but having an undesired quality of increasing the weed potential of the plant or interfering with pest management programs
powdery mildew	a necrosis or suberisation of leaf or stem tissue associated with intracellular and extracellular hyphae and sporophores of a fungus of the order Erysiphales
rust	an organoid gall of leaf or stem tissue associated with intercellular hyphae, aeciospores, uredospores or teliospores of a fungus of the order Pucciniales
smut	an organoid gall of leaf, stem, floral or meristematic tissue associated with intercellular hyphae and chlamydospores of a fungus of the order Ustilaginales
spot	a localised necrosis or yellowing of leaf or stem tissue, associated with a plant pathogenic bacterium, fungus or virus
white blister	an organoid gall of leaf or stem tissue associated with intercellular hyphae, sporeangia, zoospores and oospores of a fungus of the genus <i>Albugo</i> , order Peronosporales
witches broom	a gall resulting in massed outgrowths of vegetative buds and associated with an intracellular or intercellular fungus, bacterium, phytoplasma, virus or mite

Additional information about the disorders listed in part 2, item C of this schedule

- 1 For bacterial wilt, mosaic (mottles or yellows) and witches broom, the description's reference is *Plant Pathologist's Pocketbook*, CAB, Commonwealth Mycological Institute, Kew, Surrey, UK.
- 2 For all other disorders, apart from mutant plant, the description's reference is *Ainsworth and Bisby's Dictionary of the Fungi*, CAB, Commonwealth Mycological Institute, Kew, Surrey, UK.

Schedule 2 Notifiable pests

section 6

Part 1 Animals

Insects and mites

Common name	Scientific name and author
armyworm	<i>Mythimna unipuncta</i> Haworth
banana skipper butterfly	<i>Erionota thrax</i> (Linnaeus)
boll weevil	<i>Anthonomus grandis</i> Boheman
citrus psyllid	<i>Diaphorina citri</i> Kuw.
Colorado potato beetle	<i>Leptinotarsa decemlineata</i> (Say)
electric ant	<i>Wasmannia auropunctata</i> (Roger)
false codling moth	<i>Cryptophlebia leucotreta</i> (Meyrick)
grape Phylloxera Type B	<i>Daktulosphaira vitifoliae</i> (Fitch)
hessian fly	<i>Mayetiola destructor</i> (Say)
khapra beetle	<i>Trogoderma granarium</i> Everts
lettuce aphid	<i>Nasonovia ribisnigri</i> (Mosley)
mango leafhopper	<i>Idioscopus clypealis</i> (Lethierry)
mango leafhopper	<i>Idioscopus nitidulus</i> (= <i>niveosparsus</i>) (Walker)
mango pulp weevil	<i>Sternochetus frigidus</i> (Fabricius)
melon fly	<i>Bactrocera cucurbitae</i> (Coquillett)
Navel orangeworm	<i>Amyelois transitella</i> Walker
Oriental fruit fly	<i>Bactrocera dorsalis</i> (Hendel)
papaya fruit fly	<i>Bactrocera papayae</i> Drew and Hancock

Common name	Scientific name and author
pear fruit moth	<i>Numonia pirivorella</i> (Matsumura)
Philippine fruit fly	<i>Bactrocera philippinensis</i> Drew and Hancock
plum weevil or plum curculio	<i>Conotrachelus nenuphar</i> (Herbst)
red banded mango caterpillar	<i>Deanolis sublimbalis</i> (Snellen)
red imported fire ant	<i>Solenopsis invicta</i> Buren
rice water weevil	<i>Lissorhoptus oryzophilus</i> Kuschel
rough strawberry weevil	<i>Otiorhynchus rugosostriatus</i> (Goeze)
Russian wheat aphid	<i>Diuraphis noxia</i> (Mordvilko)
rust red flour beetle	<i>Tribolium castaneum</i> (Herbst)
South African citrus thrips	<i>Scirtothrips aurantii</i> Faure
spider mite	<i>Tetranychus piercei</i> McGregor
strawberry bud weevil	<i>Anthonomus bisignatus</i> Schenkling
strawberry tortrix	<i>Acleris comariana</i> Lienig and Zeller
sugarcane borer	<i>Sesamia</i> spp.
sugarcane whitefly	<i>Aleurolobus barodensis</i> (Maskell)
summer fruit tortrix	<i>Adoxophyes orana</i> Fischer von Rösslerstamm
tropical fire ant	<i>Solenopsis geminata</i> (Fabricius)
variegated cutworm	<i>Peridroma saucia</i> (Hebner)
vegetable leafminer	<i>Liriomyza sativae</i> Blanchard

Molluscs

Common name	Scientific name and author
golden apple snail	<i>Pomacea canaliculata</i> (Lamarck 1819)

Part 2 **Pests associated with plant disease**

A Organisms

Nematodes

Globodera pallida (Stone) Behrens (abbreviated name—potato cyst nematode)

Globodera rostochiensis (Wollenweber) Behrens (abbreviated name—golden nematode)

Bacteria

Clavibacter michiganensis subsp. *sepedonicus* (Spiek and Kotth.) Davies *et al*

Erwinia amylovora (Burrill) Winslow *et al* (abbreviated name—fire blight)

“*Liberobacter asiatica*” Jagoueix *et al*

“*Pseudomonas celebensis*” = banana blood disease bacterium (uncharacterised)

Ralstonia solanacearum (E.F. Smith) Yabuuchi *et al*

Xanthomonas axonopodis pv. *citri* (Hasse) Vauterin

Xanthomonas axonopodis pv. *malvacearum* (E. F. Smith) Dowson

Xanthomonas fragariae J.K. Kennedy and King

Xylella fastidiosa Wells *et al*

Fungi

Anisogramma anomala (Peck) E. Müll. (1962)

Apiosporina morbosa (Schwein.) Arx (1954)

Ceratocystis ulmi (Buisman) C. Moreau (1952)

Ciborinia camelliae L.M. Kohn (1979)

Cryphonectria parasitica (Murrill) M.E. Barr (1978)

- Fusarium oxysporum* Schltdl. Fr. f. sp. *cubense* (E.F. Smith) W.C. Snyder and H.N. Hansen
- Guignardia bidwellii* (Ellis) Viala and Ravaz
- Guignardia musae* Racib. (anamorph *Phyllostica musarum* (Cooke) Aa (1909)
- Magnaporthe grisea* (T.T. Hebert) M.E. Barr (1977)
- Monilinia fructigena* Honey in Whetzel (1946)
- Mycosphaerella fijiensis* M. Morelet (anamorph *Paracercospora fijiensis* (M. Morelet) Deighton)
- Peronosclerospora sacchari* (T. Miyake) Shirai and K. Hara
- Phakopsora euvitis* Y. Ono (2000)
- Phoma tracheiphila* (Petri) L.A. Kantsch. and Gokaschvili (1948)
- Phymatotrichum omnivorum* Duggar (1916)
- Phytophthora fragariae* var. *fragariae* Hickman
- Phytophthora ramorum* Werres, De Cock and Man in 't Veld
- Puccinia asparagi* D.C. (1805)
- Roesleria subterranea* (Weinm.) Redhead (1985)
- Rosellinia necatrix* Berl. ex Prill. (1904)
- Stagonospora saccharum* T.T. Lo and L. Ling (1950)
- Tilletia barclayana* (Bref.) Sacc. and P. Syd. (1899)
- Tilletia indica* Mitra
- Ustilago scitaminea* Syd.
- Verticillium dahliae* Kleb. (1913)

Plants

A plant of the genera *Musa* spp., other than—

- (a) a plant that produces edible fruit; or
- (b) an indigenous plant that is not a volunteer plant.

Ensete spp.

Orobanche ramosa L. (branched broomrape)

Phytoplasmas

European stone fruit yellows phytoplasma

peach X phytoplasma (including peach eastern X phytoplasma)

sugarcane white leaf phytoplasma (White leaf)

B Viruses and viroids

Viruses

Banana bract mosaic virus

Banana bunchy top virus

Begomovirus Cotton leaf curl virus

Nepovirus Cherry leaf roll virus (blackline)

Plum pox virus

Sugarcane Fiji disease virus

sugarcane Ramu stunt virus

sugarcane streak mosaic virus (Potyviridae)

Wheat spindle streak mosaic virus

Viroids

Potato spindle tuber viroid

C Disorders

Disorder	Description	Common or abbreviated names
bacterial wilt of banana plants	<p>bacterial wilt, as described in schedule 1, part 2, under the heading ‘C Disorders’, caused by—</p> <ul style="list-style-type: none"> • <i>Ralstonia solanacearum</i> (E. F. Smith) Yabuuchi <i>et al</i>; or • “<i>Pseudomonas celebensis</i>” = banana blood disease bacterium (uncharacterised) 	<p>bacterial wilt of bananas</p> <p>banana blood disease</p> <p>banana bugtok disease</p> <p>banana moko disease</p>
bacterial wilt of grape plants	bacterial wilt, as described in schedule 1, part 2, under the heading ‘C Disorders’, caused by <i>Xylella fastidiosa</i> Wells <i>et al</i>	Pierce’s disease
blight of potato plants	blight, as described in schedule 1, part 2, under the heading ‘C Disorders’, caused by <i>Clavibacter michiganensis</i> subsp. <i>sepedonicus</i> (Spiek and Kotth.) Davies <i>et al</i> .	potato ring rot
blight of regulated fire blight host plants	blight, as described in schedule 1, part 2, under the heading ‘C Disorders’, caused by <i>Erwinnia amylovora</i> (Burrill) Winslow <i>et al</i> (abbreviated name—fire blight)	fire blight
canker of citrus plants	canker, as described in schedule 1, part 2, under the heading ‘C Disorders’, caused by <i>Xanthomonas axonopodis</i> pv. <i>citri</i> (Hasse) Vauterin	citrus canker

Schedule 2

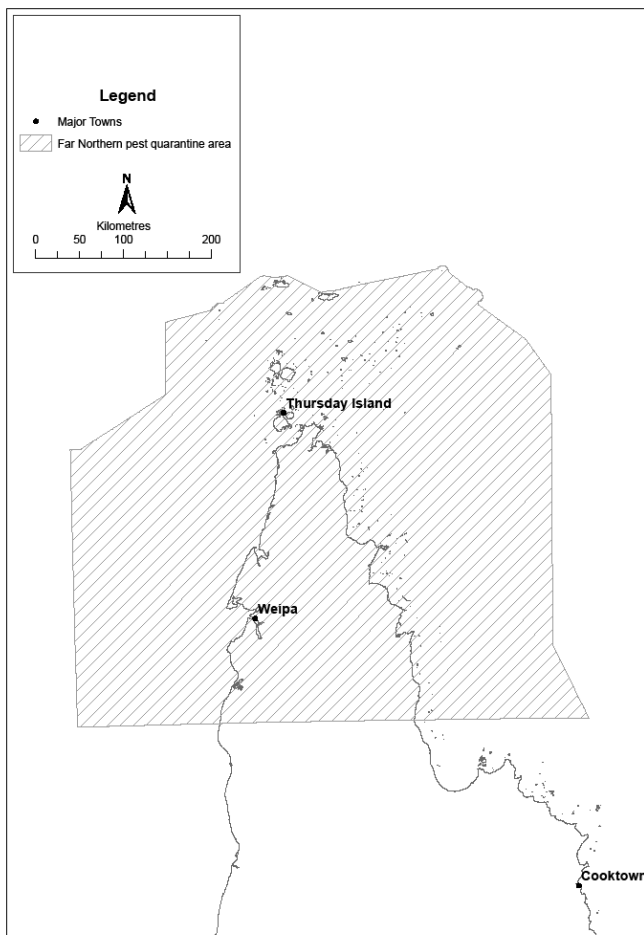

Disorder	Description	Common or abbreviated names
downy mildew of sugarcane plants	downy mildew, as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Peronosclerospora sacchari</i> (T. Miyake) Shirai and K. Hara	sugarcane downey mildew
fusarium wilt of banana plants	fusarial wilt, as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Fusarium oxysporum</i> Schltdl. Fr. F. sp. <i>cubense</i> (E.F. Smith) W.C. Snyder and H.N. Hansen	fusarial wilt of banana banana Panama disease
mango malformation	mango malformation disease, as described in schedule 1, part 2, under the heading 'C Disorders', caused by several different species of <i>Fusarium</i> , including <i>Fusarium mangiferae</i>	mango malformation disease
mosaic (mottles or yellows) of banana plants—banana bract mosaic disease	mosaic (mottles or yellows), as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Banana bract mosaic virus</i> (abbreviated name—banana bract mosaic)	banana bract mosaic disease
mosaic (mottles or yellows) of banana plants—banana bunchy top virus	mosaic (mottles or yellows), as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Banana bunchy top virus</i> (abbreviated name—banana bunchy top)	banana bunchy top disease
mosaic (mottles or yellows) of citrus plants	mosaic (mottles or yellows), as described in schedule 1, part 2, under the heading 'C Disorders', caused by " <i>Liberobacter asiatica</i> " Jagouix <i>et al.</i>	citrus greening Huanglongbing

Disorder	Description	Common or abbreviated names
mosaic (mottles or yellows) of stonefruit plants	mosaic (mottles or yellows), as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>plum pox virus</i>	plum pox virus
mosaic (mottles or yellows) of sugarcane plants	mosaic (mottles or yellows), as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>sugarcane Fiji disease virus</i>	sugarcane Fiji disease Fiji virus
smut of prescribed cereal crop plants	smut, as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Tilletia indica</i> Mitra	Karnal bunt
smut of sugarcane plants	smut, as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Ustilago scitaminea</i> Syd. (abbreviated name—sugarcane smut)	sugarcane smut
spot of banana plants	spot, as described in schedule 1, part 2, under the heading 'C Disorders', caused by <i>Mycosphaerella fijiensis</i> M. Morelet (anamorph <i>Paracercospora fijiensis</i> (M. Morelet) Deighton)	banana black Sigatoka disease spot

Schedule 5 Treatment methods

section 28

- 1 Treatment method A
 - remove the plant, including the corm, suckers and pseudostem from the soil
 - cut each pseudostem into pieces no more than 60cm long and split each piece lengthwise
 - cut the corm into pieces no more than 5cm in diameter
- 2 Treatment method B
 - remove the fruit from the plant or spray the fruit with a permanent marker dye to make it unsuitable for human or animal consumption
 - inject each pseudostem at a height of 30cm above the ground with 15ml of a 1% solution of 2,4-D
- 3 Treatment method C
 - remove the fruit from the plant or spray the fruit with a permanent marker dye to make it unsuitable for human or animal consumption
 - inject each pseudostem at a height of 30cm above the ground with 15ml of a 3.6% solution of glyphosate
- 4 Treatment method D
 - remove the plant, including the corm, suckers and pseudostem from the soil
 - cut the pseudostem and leaf tissue, other than leaf tissue that is dead or not green in colour, into pieces no more than 60cm long
 - cut the corm, suckers and butt of each pseudostem into pieces no more than 5cm in diameter

- leave the pseudostem and leaf tissue pieces to rot on the surface of the soil or bury them under at least 60cm of soil
- leave the pieces of the corm, suckers and butt of each pseudostem to rot on the surface of the soil or bury them under at least 1m of soil

Schedule 7 Regulated fire blight host plants

section 65, definition *regulated fire blight host plant*

Hybrid	Common name
<i>Rubus</i> hybrids	thornless blackberry

Species	Common name
<i>Prunus salicina</i>	plum
<i>Rubus ideus</i>	red raspberry

Genus	Examples of common names
<i>Amelanchier</i>	service berry, June berry
<i>Cotoneaster</i>	cotoneaster
<i>Crataegus</i>	hawthorn
<i>Cydonia</i>	quince
<i>Eriobotrya</i>	loquat
<i>Malus</i>	apple
<i>Mespilus</i>	medlar
<i>Pyracantha</i>	fire thorn
<i>Pyrus</i>	pear
<i>Sorbus</i>	mountain ash
<i>Stranvaesia</i>	–

Schedule 7A Pest quarantine areas for mango leafhopper

section 76

Schedule 8 Mediterranean fruit fly host plants

section 86, definition *host plant*

Part 1 Host plants requiring treatment

Common name	Scientific name and author
abiu	<i>Pouteria caimito</i> (Ruiz and Pavon) Radlk. [Sapotaceae]
acerola	<i>Malpighia glabra</i> (L.) [Malpighiaceae] <i>M. glabra</i> x <i>M. puniceifolia</i> (L.) (Barbados cherry)
akee	<i>Blighia sapida</i> K.Konig [Spaindacea]
akia	<i>Wikstroemia phillyreifolia</i> Gray [Thymelaeaceae]
almond (with husk)	<i>Prunus amygdalus</i> Batsch => <i>Prunus dulcis</i> (Mill.) D.A. Webb
apple	<i>Malus domestica</i> Borkh L. [Rosaceae] <i>Malus sylvestris</i> Mill. [Rosaceae] (crab apple)
apricot	<i>Prunus armeniaca</i> L. [Rosaceae]
Barbados cherry	<i>Malpighia puniceifolia</i> (L.) [Malpighiaceae]
blackberry	<i>Rubus fruticosus</i> L. [Rosaceae]
black sapote	<i>Diospyros ebenum</i> J. König ex Retz. [Ebanaceae]
black walnut	<i>Juglans nigra</i> L. [Juglandaceae]
blueberry	<i>Vaccinium corymbosum</i> L. [Ericaceae]

Common name	Scientific name and author
bourbon orange	<i>Ochrosia elliptica</i> Labill. [Apocynaceae]
boxthorn	<i>Lycium europaeum</i> L. [Solanaceae]
Brazil cherry	see Grumichama
breadfruit	<i>Artocarpus altilis</i> (Parkinsonia) Fosb. [Moraceae]
calamondin orange	<i>Citrofortunella mitis</i> (Blanco) J. Ingram and H. Moore [Rutaceae]
camito (star cherry)	<i>Chrysophyllum cainito</i> L. [Sapotaceae]
Cape gooseberry	<i>Physalis peruviana</i> L. [Solanaceae]
capsicum	<i>Capsicum annuum</i> L. var. <i>grossum</i> (L.) sendt [Solanaceae]
carambola (star fruit)	<i>Averrhoa carambola</i> L. [Oxalidaceae]
cashew apple	<i>Anacardium occidentale</i> L. [Anacardiaceae]
casimiroa (white sapote)	<i>Casimiroa edulis</i> LaLave and Lex. [Rutaceae]
cherimoya	<i>Annona cherimolia</i> Mill. [Annonaceae]
cherry	<i>Prunus avium</i> L. (sour cherry) [Rosaceae] <i>Prunus avium</i> L. (sweet cherry) [Rosaceae]
chilli	<i>Capsicum annuum</i> v <i>acuminatum</i> Fingerh. [Solanaceae] (chillies) <i>Capsicum annuum</i> v <i>cerasiforme</i> (Miller) Irish [Solanaceae] (cherry peppers) <i>Capsicum annuum</i> v <i>conoides</i> (Miller) Irish [Solanaceae] (tabasco)
citron	<i>Citrus medica</i> L. [Rutaceae]

Common name	Scientific name and author
coffee berry	<i>Coffea arabica</i> [Rubiaceae] (Arabian coffee)
	<i>Coffea canephora</i> Pierre and Froehner [Rubiaceae]
	<i>Coffea excelsa</i> Chiov. [Rubiaceae] (excelsa coffee)
	<i>Coffea liberica</i> Hiern. [Rubiaceae] (Liberian coffee)
	<i>Coffea robusta</i> Linden [Rubiaceae] (robusta coffee)
custard apple	<i>Annona squamosa</i> L. x <i>A. cherimolia</i> Mill. [Annonaceae]
date	<i>Phoenix dactylifera</i> L. [Arecaceae]
eggplant	<i>Solanum melongena</i> L. [Solanaceae]
feijoa	<i>Acca sellowiana</i> (Berg.) Burret [Myrtaceae]
fig	<i>Ficus carica</i> L. [Moraceae]
granadilla	<i>Passiflora quadrangularis</i> L. [Passifloraceae]
grape	<i>Vitis labrusca</i> L. [Vitaceae] (Isabella grape)
	<i>Vitis vinifera</i> L. [Vitaceae] (wine grape)
grapefruit	<i>Citrus paradisi</i> Macf. [Rutaceae]
grumichama	<i>Eugenia braziliensis</i> Lam. [Myrtaceae]

Common name	Scientific name and author
guava	<i>Psidium guajava</i> L. [Myrtaceae] <i>P. littorale</i> Raddi syn => <i>p. cattleianum</i> Sabine [Myrtaceae] (strawberry guava) <i>P. cattleianum</i> Sabine var. <i>guineense</i> Sw. [Myrtaceae] (Brazilian guava) <i>P. cattleianum</i> Sabine var. <i>lucidum</i> [Myrtaceae] (yellow cattley guava) <i>P. friedrichsthalianum</i> Nied. [Myrtaceae] (Costa Rican guava)
hawthorne	<i>Crataegis</i> spp. [Rosaceae]
ironwood	<i>Sideroxylon inerme</i>
jaboticaba	<i>Myrciaria cauliflora</i> (DC.) Berg. [Myrtaceae]
jackfruit	<i>Artocarpus heterophyllus</i> Lam. [Moraceae]
jambu	<i>Syzygium cumini</i> (L.) Skeels [Myrtaceae]
Jerusalem cherry	<i>Solanum pseudocapsicum</i> L. [Solanaceae]
kei apple	<i>Dovyalis caffra</i> (Hook.f. and Harv.) Warb.
kiwifruit	<i>Actinidia deliciosa</i> (a. Chev.) Liang and Ferguson [Actinidiaceae]
kumquat	<i>Fortunella japonica</i> (Thumb.) Swing. ; * <i>F. margarita</i> (Lour.) Swing. [Rutaceae]
lemon	<i>Citrus limon</i> x <i>C. chinense</i> [Rutaceae]
lemon (Meyer)	<i>Citrus meyeri</i> Tanaka L [Rutaceae]
loganberry	<i>Rubus loganobaccus</i> L. H. Bailey [Rosaceae]
longan	<i>Euphoria longan</i> (Lour.) Stued. [Sapindaceae]

Common name	Scientific name and author
loquat	<i>Eriobotrya japonica</i> (Thunb.) Lindley [Rosaceae]
Madagascar olive	<i>Noronhia emarginata</i> (Lam.) Thours ex Hook [Oleaceae]
mamey sapote	<i>Pouteria spanota</i> (jacq.) H.E. Moore and Stearn [Sapotaceae]
mandarin	<i>Citrus reticulata</i> Blanco [Rutaceae]
mango	<i>Mangifera indica</i> L. [Anacardiaceae]
mock orange	<i>Murraya paniculata</i> L. Jack [Rutaceae] M exotica
mombin	<i>Spondias</i> spp.
monstera	<i>Monstera deliciosa</i> Liebm. [Araceae]
mountain apple (Malay apple)	<i>Syzygium malaccensis</i> L. Merrill and L.M. Perry [Myrtaceae] Eugenia
mulberry	<i>Morus nigra</i> L. [Moraceae]
nashi	<i>Pyrus pyrifolia</i> var. <i>culta</i> (Mak.) Nakai or <i>P.</i> <i>betulaefolia</i> [Rosaceae]
natal plum	<i>Carissa macrocarpa</i> <i>Terminalia chebula</i>
nectarine	<i>Prunus persicae</i> var. <i>nectarina</i> (R.Br.) Maxim. [Rosaceae]
orange	<i>Citrus aurantium</i> L.; <i>C. sinensis</i> L, Osbeck [Rutaceae]
otaheite apple	<i>Spondias cytherea</i> Sonn. [Anacardiaceae]
peach	<i>Prunus persicae</i> L. Batsch [Rosaceae]
pear	<i>Pyrus communis</i> L. [Rosaceae]

Common name	Scientific name and author
pepino	<i>Solanum muricatum</i> Aiton [Solanaceae]
persimmon	<i>Diospyros kaki</i> L.f. [Ebenaceae] (Japanese persimmon) <i>D.decandra</i> Lour. [Ebenaceae] (persimmon)
plum	<i>Prunus domestica</i> [Rosaceae] (prune) <i>Prunus insitita</i> L. [Rosaceae] (damson plum) <i>Prunus salicina</i> [Rosaceae] (Japanese plum)
pomegranate	<i>Punica granatum</i>
pond apple	<i>Annona glabra</i>
prickly pear	<i>Opuntia ficus indica</i> L. Miller [Cactaceae] or <i>Opuntia stricta</i> (Haw.) Haw
pummelo	<i>Citrus grandis</i> (L.) Osbeck [Rutaceae]
quince	<i>Cydonia oblonga</i> Miller [Rosaceae]
raspberry	<i>Rubus idaeus</i> L. [Rosaceae]
rollinia	<i>Rollinia deliciosa</i> Safford [Annonaceae]
rose apple	<i>Syzygium jambos</i> (L.) Alston [Myrtaceae]
santol	<i>Sandoricum indicum</i> Cav. [Meliaceae]
sapodilla	<i>Manilkara zapota</i> (L.) Van Royen [Sapotaceae]
soursop	<i>Annona muricata</i> L. [Annonaceae]
Spanish cherry	<i>Mimusops elengi</i> L. [Sapotaceae]
Surinam cherry	<i>Eugenia uniflora</i> L. [Myrtaceae]
sweetsop (sugar apple)	<i>Annona squamosa</i> L. [Annonaceae]
tamarillo	<i>Cyphomandra betacea</i> (Cao) Sendtner [Solanaceae]

Common name	Scientific name and author
tangelo	<i>Citrus reticulata</i> x <i>C. paradisi</i> [Rutaceae]
tomato (pink and red type)	<i>Lycopersicon lycopersicum</i> (L.) Karst. ex Farw. [Solanaceae]
tree tomato	<i>Cyphomandra betacea</i> (Cav.) Sendtn. [Solanaceae]
tropical almond	<i>Terminalia catappa</i> L. [Combretaceae]
walnut	<i>Juglans regia</i> L. [Juglandaceae]
wax apple (rose apple)	<i>Eugenia jambos</i> L. [Myrtaceae] (L.) Alston
wax jambu	<i>Syzygium samarangense</i> (Blume) Merrill and L.M. Perrt [Myrtaceae]

Part 2

Host plants requiring treatment unless harvested in a mature green condition

Common name	Scientific name and author
avocado	<i>Persea americana</i> Mill. [Lauraceae]
babaco (ripe)	<i>Carica pentagona</i> Heilb [Caricaceae]
banana	<i>Musa</i> spp. [Musaceae]
lime	<i>Citrus aurantiifolia</i> (Christm.) Swing. [Rutaceae] (West Indian lime) <i>C. latifolia</i> [Rutaceae] (Tahitian lime) <i>C. reticulata</i> var. <i>Austera</i> Lyb. [Rutaceae] (Rangpur lime)
papaya	<i>Carica papaya</i> L. [Caricaceae]

Part 3 **Host plants requiring treatment if skin broken and flesh exposed at harvest**

Common name	Scientific name and author
durian	<i>Durio zibethinus</i> Murray [Bombacaceae]
lychee	<i>Litchi chinensis</i> Sonn. [Sapindaceae]
mangosteen	<i>Garcinia mangostana</i> L. [Clusiaceae]
passionfruit	<i>Passiflora edulis</i> f. <i>edulis</i> Sims [Passifloraceae] (purple passionfruit) <i>P. edulis</i> f. <i>flavicarpa</i> Sims [Passifloraceae] (yellow passionfruit)
pomegranate	<i>Punica granatum</i> L. [Punicaceae]
rambutan	<i>Nephelium lappaceum</i> L. [Sapindaceae]

Schedule 10 Pest quarantine areas for pests of sugarcane plants

section 114

1 Far northern pest quarantine area

The far northern pest quarantine area consists of the area of Queensland, north of latitude 13°45' south.

Editor's note—

Latitude 13°45' south passes near Coen.

2 Coen to Cardwell pest quarantine area

The Coen to Cardwell pest quarantine area consists of the area of Queensland—

- (a) south of latitude 13°45' south; and
- (b) north of latitude 18°19.7' south.

Editor's note—

Latitude 18°19.7' south passes near Cardwell.

2A Cardwell to Townsville pest quarantine area

The Cardwell to Townsville pest quarantine area consists of the area of Queensland—

- (a) south of latitude 18°19.7' south; and
- (b) north of latitude 19°15' south.

Editor's note—

Latitude 19°15' south passes near Townsville.

3 Townsville to Bowen-Collinsville pest quarantine area

The Townsville to Bowen-Collinsville pest quarantine area is the area within the following boundary—

- from latitude 19°15' south where it intersects the border of Queensland and the Northern Territory to where latitude 19°15' south intersects the eastern boundary of the Great Barrier Reef Region
- then along the eastern boundary of the Great Barrier Reef Region to where it intersects latitude 19°53' south;
- to latitude 19°53' south, longitude 148°05' east
- to latitude 20°12' south, longitude 147°55' east
- to latitude 20°33' south, longitude 147°51' east
- to where latitude 20°33' south intersects the border of Queensland and the Northern Territory
- then along the border of Queensland and the Northern Territory to where it intersects latitude 19°15' south.

Editor's notes—

- Latitude 19°15' south passes near Townsville.
- Latitude 19°53' south, longitude 148°05' east is in the vicinity of Abbot Point.
- Latitude 20°12' south, longitude 147°55' east is in the vicinity of Mt Aberdeen.
- Latitude 20°33' south, longitude 147°51' east is in the vicinity of Collinsville.

4 Bowen-Collinsville to Rockhampton pest quarantine area

The Bowen-Collinsville to Rockhampton pest quarantine area consists of the area of Queensland—

- (a) south of the southern boundary of the Townsville to Bowen-Collinsville pest quarantine area; and
- (b) north of latitude 23°27' south.

Editor's note—

Latitude 23°27' south passes near Rockhampton.

5 Rockhampton to Howard pest quarantine area

The Rockhampton to Howard pest quarantine area consists of the area of Queensland—

- (a) south of latitude 23°27' south; and
- (b) north of latitude 25°18.7' south.

Editor's note—

Latitude 25°18.7' south passes near Howard.

6 Howard to New South Wales border pest quarantine area

The Howard to New South Wales border pest quarantine area—

- (a) consists of the area of Queensland south of latitude 25°18.7' south; but
- (b) does not include the Woodford special pest quarantine area.

7 Woodford special pest quarantine area

The Woodford special pest quarantine area is the area within the following boundary—

- from latitude 26°50' south, longitude 152°53' east to latitude 26°50' south, longitude 152°34' east
- to latitude 27°04' south, longitude 152°34' east
- to latitude 27°04' south, longitude 152°53' east
- to latitude 26°50' south, longitude 152°53' east.

Editor's notes—

- Latitude 26°50' south, longitude 152°53' east is in the vicinity of Peachester.
- Longitude 152°34' east passes near Kilcoy.
- Latitude 27°04' south passes near Mount Mee.

Schedule 11 Sugarcane plant pests

section 113, definition *sugarcane plant pest*

leaf scald disease caused by *Xanthomonas albilineans*
(Ashby) Dowson

ratoon stunting disease caused by *Leifsonia xyli* subsp. *xyli*
(Davies *et al.*) Evtushenko

Sugarcane Fiji disease virus

Sugarcane mosaic virus

sugarcane striate mosaic associated virus (uncharacterised)

Ustilago scitaminea Syd. (abbreviated name—sugarcane
smut)

Schedule 12 Cape York Peninsula targeted pests

section 127, definition *targeted pest*

Part 1 Animals

Insects and mites

Common name	Scientific name and author
Bactrocera atrisetosa	<i>Bactrocera atrisetosa</i> (Perkins)
Bactrocera decipiens	<i>Bactrocera decipiens</i> (Drew)
Bactrocera kirki	<i>Bactrocera kirki</i> (Froggatt)
Bactrocera tau	<i>Bactrocera tau</i> (Walker)
Bactrocera trilineola	<i>Bactrocera trilineola</i> Drew
Bactrocera trivialis	<i>Bactrocera trivialis</i> (Drew)
Bactrocera xanthodes	<i>Bactrocera xanthodes</i> (Broun)
banana skipper	<i>Erionota thrax</i> (Linnaeus)
banana stem weevil	<i>Odoiporus longicollis</i> (Oliver)
Bezzi fruit fly	<i>Bactrocera occipitalis</i> (Bezzi)
breadfruit fruit fly	<i>Bactrocera umbrosa</i> (Fabricius)
Chinese fruit fly	<i>Bactrocera minax</i> (Enderlein)
citrus blackfly	<i>Aleurocanthus woglumi</i> Ashby
citrus fruit borer	<i>Citripestis sagitifera</i> (Moore)
citrus gall wasp	<i>Bruchophagus muli</i> (Boucek and Brough)
citrus psylla or Asian citrus psylla	<i>Diaphorina citri</i> (Kuwayama)

Common name	Scientific name and author
Cook Islands fruit fly	<i>Bactrocera melanotus</i> (Coquillett)
cut worm	<i>Agrotis interjectionis</i> (Guenée)
Fijian fruit fly	<i>Bactrocera passiflorae</i> (Froggatt)
guava fruit fly	<i>Bactrocera correcta</i> (Bezzi)
Indian fruit fly	<i>Bactrocera caryeae</i> (Kapoor)
Japanese citrus fruit fly	<i>Bactrocera tsuneonis</i> (Miyake)
mango fruit borer	<i>Citripestis eutraptera</i> (Meyrick)
mango leaf gall midge	<i>Procontarinia</i> spp.
mango leafhopper	<i>Idioscopus clypealis</i> (Lethierry)
mango leafhopper	<i>Idioscopus nitidulus</i> (= <i>niveosparsus</i>) (Walker)
mango pulp weevil	<i>Sternochetus frigidus</i> (Fabricius)
melon fly	<i>Bactrocera cucurbitae</i> (Coquillett)
papaya fruit fly	<i>Bactrocera papayae</i> Drew and Hancock
peach fruit fly	<i>Bactrocera zonata</i> (Saunders)
Philippine fruit fly	<i>Bactrocera philippinensis</i> (Drew and Hancock)
planthoppers	<i>Perkinsiella</i> spp.
red banded mango caterpillar	<i>Deanolis sublimbalis</i> (Snellen)
red imported fire ant	<i>Solenopsis invicta</i> (Buren)
solanum fruit fly	<i>Bactrocera latifrons</i> (Hendel)
spider mite	<i>Tetranychus piercei</i> McGregor
Sri Lankan fruit fly	<i>Bactrocera kandiensis</i> Drew and Hancock
stem borer	<i>Chilo</i> spp.
sugarcane borer	<i>Scirpophaga</i> spp.

Common name	Scientific name and author
sugarcane borer	<i>Sesamia</i> spp.
sugarcane borer	<i>Tetramoera schistanceana</i> (Snellen)
sugarcane leafhopper	<i>Eumetopina</i> spp.
sugarcane leafhopper	<i>Pyrilla perpusilla</i> (Walker)
sugarcane planthopper	<i>Perkinsiella</i> spp.
sugarcane whitefly	<i>Aleurodicus barodensis</i> (Maskell)
sugarcane woolly aphid	<i>Ceratovacuna lanigera</i> Zehntner
Tongan fruit fly	<i>Bactrocera facialis</i> (Coquillett)
vegetable leafminer	<i>Liriomyza sativae</i> Blanchard

Molluscs

Common name	Scientific name and author
giant African snail	<i>Achatina fulica</i> Bowditch

Part 2 Pests associated with plant disease

A Organisms

Bacteria

“*Liberobacter asiatica*” Jagoueix et al

Panotoea stewartii subsp. *stewartii* (E.F. Smith) Mergaert et al.

“*Pseudomonas celebensis*” = banana blood disease bacterium (uncharacterised)

Pseudomonas syzygii I. Roberts et al.

Ralstonia solanacearum (E.F. Smith) Yabuuchi et al.

Xanthomonas albilineans (Ashby) Dowson

Xanthomonas axonopodis pv. *citri* (Hasse) Vauterin

Fungi

Claviceps sorghi P. Kulkarni, Seshadri and Hedge

Cryphonectria cubensis (Bruner) Hodges

Elsinoe fawcettii Bitanc. and Jenkins

Fusarium oxysporum Schldl. Fr. f. sp. *cubense* (E.F. Smith) W.C. Snyder and H.N. Hansen

Hemileia vastatrix Berk. and Broome

Mycosphaerella fijiensis M. Morelet (anamorph *Paracercospora fijiensis* (M. Morelet) Deighton)

Peronosclerospora philippinensis (W. Weston) C.G. Shaw

Peronosclerospora sacchari (T. Miyake) Shirai and K. Hara

Peronosclerospora sorghi (W. Weston and Uppal) C.G. Shaw

Physopella ampelopsidis (Dietel and P. Syd.) Cummins and Ramachar

Stagonospora sacchari T.T. Lo and Y. Ling

Ustilago scitaminea Syd.

B Viruses and viroids

Banana bract mosaic virus

Banana bunchy top virus

Citrus tristeza virus

Coconut cadang-cadang viroid

Peanut stripe virus

Sorghum mosaic virus

Sugarcane Fiji disease virus

Sugarcane mosaic virus

sugarcane Ramu stunt virus (uncharacterised)

Tomato leaf curl virus

Schedule 13 Dictionary

section 3

accredited business see section 101.

approved condition see section 86.

approved risk management plan, for chapter 3, part 2, see section 55(2).

approved way means a way approved by the chief executive or an inspector.

Asian sugarcane planthopper, for chapter 3, part 12, see section 123.

authorised person—

- (a) for chapter 3, part 3—see section 65; or
- (b) for chapter 3, part 5—see section 75; or
- (c) for chapter 3, part 10—see section 101.

banana leaf speckle pest means the banana leaf speckle disease caused by *Mycosphaerella musae* (Speg.) Syd. and P. Syd.

banana plant see section 17.

banana plant pest see section 25.

banana yellow Sigatoka pest means the banana yellow Sigatoka disease caused by *Mycosphaerella musicola* J.L. Mulder (anamorph *Pseudocercospora musae* (Zim.) Deighton).

branched broomrape see section 133.

citrus plant means a plant of the family Rutaceae.

Editor's note—

Under the Act, schedule 2 (Dictionary)—

plant means a member of the plant kingdom and includes the seed or seedling of or a part of a plant, whether living or dead and whether attached to a plant but does not include timber in service.

clarified juice see section 69.

electric ant, for chapter 3, part 16, see section 153.

far northern pest quarantine area—

- (a) for chapter 3, part 1—see schedule 3, part 1; and
- (b) for chapter 3, part 11—see schedule 10, section 1.

filtered juice see section 69.

fire ant see section 38.

fire blight area see section 65.

fresh juice see section 69.

fruit of a grape plant see section 69.

grape plant see section 69.

grape plant product see section 69.

Great Barrier Reef Region means the Great Barrier Reef Region under the *Great Barrier Reef Marine Park Act 1975* (Cwlth).

ground cover vegetation see section 17.

high risk item, for chapter 3, part 16, see section 154.

high risk restricted area, for chapter 3, part 2, see section 38.

host plant, for chapter 3, part 7, see section 86.

interstate department means the department of another State that deals with matters relating to agriculture in the State.

interstate inspector means a person who holds a position, however called, equivalent to an inspector, in an interstate department.

leaf scald disease means a disease of sugarcane caused by *Xanthomonas albilineans* (Ashby) Dowson.

local government area means a part of Queensland established as a local government area under the *Local Government Act 1993*.

low risk restricted area, for chapter 3, part 2, see section 38.

mango malformation disease, for chapter 3, part 17, see section 165.

mango plant—

- (a) generally, means a plant of the genus *Mangifera* spp; or
- (b) for chapter 3, part 17, see section 165.

marc see section 69.

mill see the *Sugar Industry Act 1999*, schedule.

must, for grapes, see section 69.

northern buffer pest quarantine area see schedule 3, part 2.

northern pest quarantine area see schedule 3, part 3.

offence warning, for a requirement under this regulation, means a warning that it is an offence for the person to whom the requirement is given, or of whom it is made, not to comply with it.

package includes a box, basket, case, container, crate, carton, cover or wrapper.

pest banana plant see section 17.

pest quarantine area—

- (a) for chapter 3, part 1—see section 17; or
- (b) for chapter 3, part 2—see section 38; or
- (c) for chapter 3, part 3—see section 65; or
- (d) for chapter 3, part 4—see section 69; or
- (e) for chapter 3, part 5—see section 75; or
- (f) for chapter 3, part 6—see section 82; or
- (g) for chapter 3, part 7—see section 86; or
- (h) for chapter 3, part 8—see section 91; or
- (i) for chapter 3, part 9—see section 95; or
- (j) for chapter 3, part 10—see section 101; or
- (k) for chapter 3, part 11—see section 113; or
- (l) for chapter 3, part 12—see section 123; or

- (m) for chapter 3, part 13—see section 127; or
- (n) for chapter 3, part 14—see section 133; or
- (o) for chapter 3, part 16—see section 153; or
- (p) for chapter 3, part 17—see section 165.

pest site see section 25.

potato pest see section 95.

potato pest area see section 95.

potato plant means a plant of the species *Solanum tuberosum* L. (common name—potato).

prescribed cereal crop plant means each of the following—

- (a) a plant of the species *Secale cereale* (common name—rye);
- (b) a plant of the species *Triticum aestivum* (common name—wheat);
- (c) a plant that is a hybrid of a plant mentioned in paragraph (a) and a plant mentioned in paragraph (b) (*Tricitium X Secale*).

prescribed pest means a pest mentioned in schedule 1.

proposed risk management plan, for chapter 3, part 2, see section 56(2)(a).

ratoon stunting disease means a disease of sugarcane caused by *Leifsonia xyli* subsp. *xyli* (Davies *et al.*) Evtushenko.

reasonably believes means to believe on grounds that are reasonable in the circumstances.

regulated fire blight host plant see section 65.

restricted area—

- (a) for chapter 3, part 2—see section 38; or
- (b) for chapter 3, part 16—see section 153.

restricted item—

- (a) for chapter 3, part 2—see section 38A; and
- (b) for chapter 3, part 9—see section 95.

show cause period see section 60(1)(e).

soil—

(a) for chapter 3, part 2—see section 38; or

(b) for chapter 3, part 16—see section 153.

southern buffer pest quarantine area see schedule 3, part 4.

southern pest quarantine area see schedule 3, part 6.

special pest quarantine area see schedule 3, part 5.

stone fruit plant means a plant of the species *Prunus* spp.

strawberry plant see section 101.

strawberry plant pest see section 101.

strawberry runner certification scheme see section 101.

strawberry runner scheme certificate see section 101.

sugarcane Fiji disease means a disease of sugarcane caused by *Sugarcane Fiji disease virus*.

sugarcane mosaic disease means a disease of sugarcane caused by *Sugarcane mosaic virus*.

sugarcane plant means a plant of the genus *Saccharum*.

sugarcane plant pest see section 113.

sugarcane striate mosaic disease means a disease of sugarcane caused by sugarcane striate mosaic associated virus (uncharacterised).

targeted pest see section 127.

treat, for chapter 3, part 2, see section 38.

treatment certificate see section 75.

treatment method A, for chapter 3, part 1, see schedule 5, item 1.

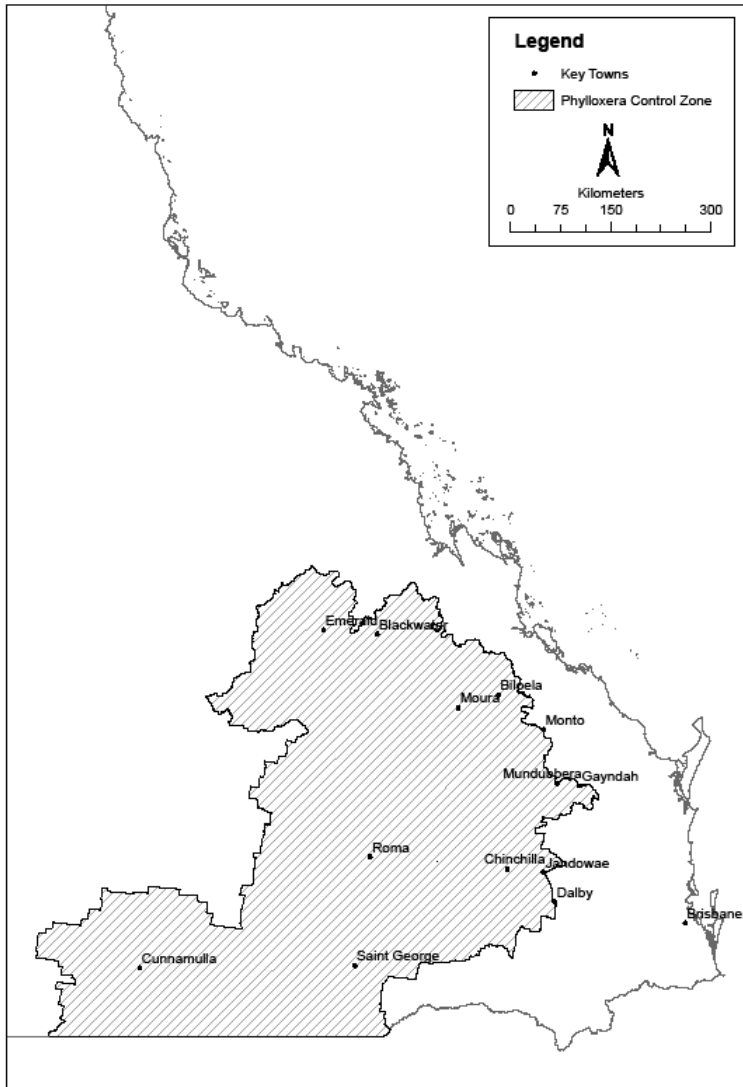

treatment method B, for chapter 3, part 1, see schedule 5, item 2.

treatment method C, for chapter 3, part 1, see schedule 5, item 3.

treatment method D, for chapter 3, part 1, see schedule 5, item 4.

Attachment 1 Special control zone for grape phylloxera

section 73(2)

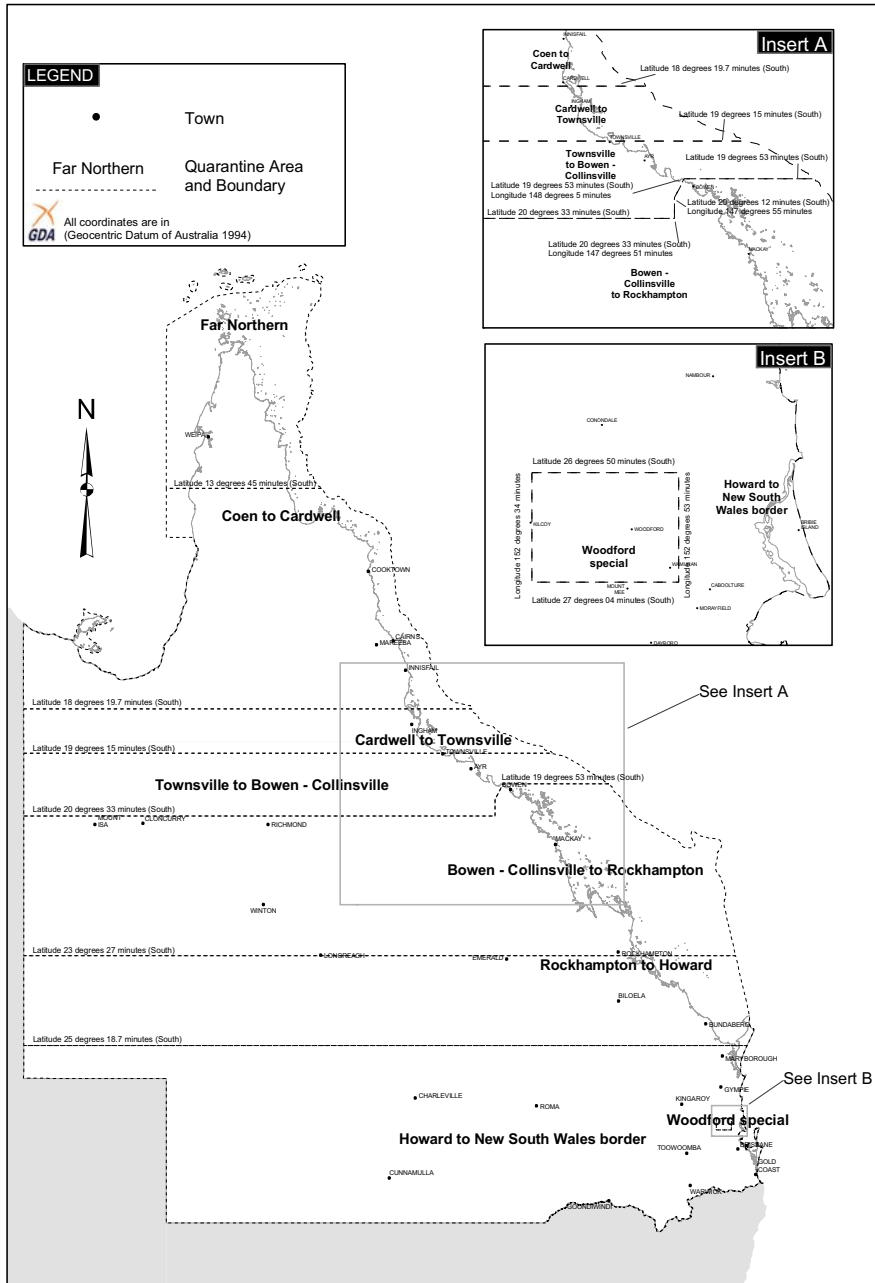

Attachment 2

section 114(2) and (3)

The map shows—

- Far northern pest quarantine area
- Coen to Cardwell pest quarantine area
- Cardwell to Townsville pest quarantine area
- Townsville to Bowen-Collinsville pest quarantine area
- Bowen-Collinsville to Rockhampton pest quarantine area
- Rockhampton to Howard pest quarantine area
- Howard to New South Wales border pest quarantine area
- Woodford special pest quarantine area.
