- (a) if the return relates to a year—within 3 months after the day the year ended; or
- (b) if the return relates to a quarter—on or before the last business day of the month after the day the quarter ended.

(2) However, if a mining operation ends within the year or quarter, the royalty return must be lodged within 3 months after the day the operation ended.

(3) Also, a person may apply, in writing, to the Minister for approval to lodge the royalty return on a day later than the day mentioned in subsection (1) or (2).

(4) A royalty return lodged after the day mentioned in subsection (1) or (2) or, if the Minister has approved a later day under subsection (3), the later day approved by the Minister, must be accompanied by the prescribed fee.

Division 2—Royalty payable for minerals

Subdivision 1—Definitions

29 Definitions for div 2

In this division—

“**base prescribed mineral**” means the following—

- (a) cobalt;
- (b) copper;

- (c) lead;
- (d) nickel;
- (e) zinc.

“mining authority” means a mining claim, mining lease or other authority under the Act or an authority under another Act relating to mining.

“mining operation” means—

- (a) mining minerals under only 1 mining authority; or
- (b) mining minerals under 2 or more mining authorities if—
 - (i) the authorities are held by the same person or by related persons; and
 - (ii) any stage of the mining is carried out by using a common mining facility; or
- (c) if the Minister has made a determination under section 320(8)¹⁸ of the Act—the operation determined by the Minister, under that section, as being 1 mining operation.

“related person” includes corporations that are related bodies corporate within the meaning of the Corporations Act, section 50.¹⁹

Subdivision 2—Royalty payable

30 When royalty payable

Royalty payable under the Act for a return period is payable on the day a royalty return must be lodged for the return period.

31 General royalty payable under the Act

(1) Royalty payable under the Act by a person is payable, for all minerals sold, disposed of or used in a return period, at the following rate²⁰—

- (a) for a prescribed mineral—

18 Section 320 (Royalty return and payment) of the Act

19 Corporations Act, section 50 (Related bodies corporate)

20 See, however, subdivisions 3 (Exemptions for particular minerals), 4 (Concessions for particular minerals), and 5 (Discounts for base prescribed minerals).

- (i) the fixed rate stated for the mineral in schedule 4, part 1, section 2; or
 - (ii) if the person made an election, on the first royalty return lodged by the person, to pay the royalty at the variable rate—the variable rate stated for the mineral in schedule 4, part 1, section 3;
- (b) for another mineral—the rate stated for the mineral in schedule 4, part 2.

(2) If a person, on the first royalty return lodged by the person, elected to pay royalty for a prescribed mineral at the variable rate, the person must pay royalty for the prescribed mineral at the variable rate for all of the prescribed mineral sold, disposed of or used before 1 January 2006.

(3) In this section—

“first royalty return”, in relation to a person, means—

- (a) for a person who was carrying on a mining operation on or before 31 December 2000—the first royalty return lodged by the person after 31 December 2000; or
- (b) for another person—the first royalty return lodged by the person.

32 Royalty on stocks of mineral for mining operation that has ended

(1) This section applies if—

- (a) a mining operation has ended; and
- (b) there are minerals mined under the operation that have not been sold, disposed of or used; and
- (c) the Minister reasonably believes the minerals will not be sold, disposed of or used within 12 months after the day the operation ended.

(2) The royalty payable for the return period in which the mining operation ended must include royalty for the minerals at the rate stated for the minerals in schedule 4.

Subdivision 3—Exemptions for particular minerals

33 Exemption for hydrocarbons

No royalty is payable for hydrocarbons that are—

- (a) flared or vented; or
- (b) used for recovering more hydrocarbons.

34 Threshold exemption for particular minerals

(1) This section applies if 1 or more of the following minerals are being mined under a mining operation—

- (a) a prescribed mineral;
- (b) corundum or a gemstone or precious stone;
- (c) a mineral mentioned in schedule 4, part 2, section 10.²¹

(2) No royalty is payable on the first \$30 000 of the combined value of the minerals sold, disposed of or used in a year.

(3) A person must elect to apply the exemption mentioned in subsection (2) to the first \$30 000 of value of only 1 of the minerals, mentioned in subsection (1), sold, disposed of or used in the year.

(4) However, if less than \$30 000 of value of the mineral elected for subsection (3) is sold, disposed of or used in the year, the person may apply the unused part for the mineral to another mineral mentioned in subsection (1).

(5) In this section—

“unused part”, in relation to a mineral, means the difference between \$30 000 and the value of the mineral sold, disposed of or used in a year.

35 Threshold exemption for processed oil shale

(1) This section applies to oil shale mined under mining lease 80003.

²¹ Schedule 4 (Royalty payable for minerals), part 2 (Royalty rates for minerals other than prescribed minerals), section 10 (Other minerals)

(2) No royalty is payable for the oil shale on the value of the first 1 600 000 barrels of oil processed, from the oil shale, in a calendar year.

(3) If less than 1 600 000 barrels are processed from the oil shale in a calendar year—

- (a) the shortfall for the calendar year may be carried forward to the following calendar year; and
- (b) if the shortfall is carried forward to the following calendar year—no royalty is payable for the oil shale on the value of the first exempt number of barrels of oil processed, from the oil shale, in the calendar year.

(4) However, any unused shortfall for a calendar year can not be carried forward beyond the calendar year immediately following the calendar year in which there was a shortfall.

(5) In this section—

“**exempt number**”, for a calendar year, means the sum of 1 600 000 and the shortfall carried forward, under subsection (3)(a), to that year.

“**shortfall**”, for a calendar year, means the difference between 1 600 000 and the number of barrels actually processed in the year.

“**unused shortfall**”, for a calendar year, means any shortfall that was carried forward, under subsection (3)(a), to the year but was not used in the year.

(6) This section expires on 1 January 2006.

Example—

For the years 2002 to 2004, the barrels of oil processed from oil shale mined under mining lease 80003 are as follows—

- 2002—1 300 000 barrels
- 2003—1 700 000 barrels
- 2004—2 000 000 barrels

In 2002, no royalty is payable for the oil shale because the number of barrels of oil processed from the oil shale is below 1 600 000. Under subsection (3), the shortfall of 300 000 (i.e. 1 600 000 less 1 300 000) is carried forward to 2003 so that the exempt number for 2003 is 1 900 000 (i.e. 1 600 000 plus 300 000).

In 2003, no royalty is payable for the oil shale because the number of barrels of oil processed from the oil shale is below 1 900 000 (the exempt number). There is no shortfall from 2003 to carry forward because the number of barrels of oil processed from the oil shale (i.e. 1 700 000) is above 1 600 000. Also, under subsection (4), the

unused shortfall of 200 000 (i.e 1 900 000 less 1 700 000) from 2002 can not be carried forward to 2004.

In 2004, royalty is payable for the oil shale on the value of 400 000 barrels of oil (i.e. 2 000 000 less 1 600 000) and there is no shortfall to be carried forward to 2005.

Subdivision 4—Concessions for particular minerals

36 Definitions for subdiv 4

In this subdivision—

“apportioned prescribed amount”, in relation to a base prescribed mineral sold, disposed of or used in a year or quarter, means the amount worked out by—

- (a) working out—
 - (i) the total combined value (the **“total value”**) of all the base prescribed minerals sold, disposed of or used in the year or quarter; and
 - (ii) the relevant prescribed amount for the base prescribed minerals sold, disposed of or used in the year or quarter; and
- (b) apportioning the relevant prescribed amount to each base prescribed mineral based on the amount of the total value that is attributable to the mineral.

“quarterly prescribed amount”, in relation to base prescribed minerals sold, disposed of or used in a quarter in a year, means—

- (a) for the threshold quarter for the year—the lower of the following after the first total combined value of \$30 000 for the year is exceeded—
 - (i) \$1 000 000;
 - (ii) the total combined value of all the minerals sold, disposed of or used in the quarter; or
- (b) for each following quarter in the year—the lower of the following—
 - (i) \$1 000 000 plus, if there is an unused part of the quarterly prescribed amount for the previous quarter, the unused part for the previous quarter;

- (ii) the total combined value of the minerals sold, disposed of or used in the quarter.

“relevant prescribed amount” means—

- (a) for working out base prescribed minerals sold, disposed of or used in a year—the yearly prescribed amount; or
- (b) for working out base prescribed minerals sold, disposed of or used in a quarter—the quarterly prescribed amount.

“threshold quarter” means the quarter, in a year, in which the value of the minerals sold, disposed of or used in the year exceeds \$30 000.

“unused part”, in relation to a quarterly prescribed amount for a quarter in a year, means—

- (a) for the threshold quarter for the year—the difference between—
 - (i) \$1 000 000; and

“yearly prescribed amount”, in relation to base prescribed minerals sold, disposed of or used in a year, means the lower of the total combined value of all the base prescribed minerals sold, disposed of or used in the year and—

- (a) \$4 000 000; or
- (b) if the mining operation under which the minerals are mined was not operational for a part of a year because the project had not started on or before the start of the year or ended within the year—a proportionate amount of \$4 000 000 based on the number of months, or part months, in the year between and including—
 - (i) the month at the start of the year, or if the mining operation started after the start of the year, the month in which the project started; and

- (ii) the month at the end of the year or, if the mining operation ended within the year, the month in which the project ended.

37 Concessional royalty for particular prescribed minerals

(1) The royalty payable for the minerals sold, disposed of or used in a year or quarter is the sum of the following—

- (a) the royalty payable for all base prescribed minerals sold, disposed of or used in the year or quarter worked out by adding the royalty payable for each base prescribed mineral sold, disposed of or used in the year or quarter at the following rate—
 - (i) for the apportioned prescribed amount of the mineral sold, disposed of or used in the year or quarter—50% of the rate stated in schedule 4, part 1, for the mineral;
 - (ii) for any remaining value of the mineral sold, disposed of or used in the year or quarter—the rate stated in schedule 4, part 1, for the mineral;
- (b) the royalty payable for all minerals, other than base prescribed minerals, sold, disposed of or used in the year or quarter, worked out by adding the royalty payable for each mineral sold, disposed of or used in the year or quarter at the rate stated in schedule 4 for the mineral.

(2) However, for working out, under subsection (1), the royalty payable for a mineral, any value or amount of the mineral sold, disposed of or used that is exempt under section 34 or 35 must be disregarded.

38 Adjustment for concessions for particular prescribed minerals—quarterly returns

(1) This section applies if—

- (a) royalty returns lodged for a year in relation to a mining operation are lodged quarterly; and
- (b) the royalty payable for the quarters to which the royalty returns relate are worked out under section 37; and
- (c) either—
 - (i) the total combined value of the base prescribed minerals sold, disposed of or used in the year, under the mining

operation, for which the royalty payable is worked out at the concessional royalty rate mentioned in section 37 is less than \$4 000 000; or

(ii) the mining operation started or ended in the year.

(2) The last royalty return for the year must include an adjustment so that—

(a) if section (1)(c)(i) applies—the total combined value of all base prescribed minerals sold, disposed of or used in the year, for which royalty is worked out at the concessional royalty rate mentioned in section 37 is the lower of—

(i) \$4 000 000; and

(ii) the total combined value of all base prescribed minerals sold, disposed of or used in the year; or

(b) if section (1)(c)(ii) applies—the total combined value of all base prescribed minerals sold, disposed of or used in the year, for which royalty is worked out at the concessional royalty rate mentioned in section 37 does not exceed the adjusted prescribed amount.

(3) In this section—

“adjusted prescribed amount” means a proportionate amount of \$4 000 000 based on the number of months, or part months, in the year between and including—

(a) the month at the start of the year, or if the mining operation started after the start of the year, the month in which the project started; and

(b) the month at the end of the year or, if the mining operation ends within the year, the month in which the project ends.

Subdivision 5—Discounts for base prescribed minerals

39 Royalty discounts for base prescribed minerals

(1) This section applies to royalty payable for a base prescribed mineral sold, disposed of or used if—

(a) the mineral is processed in the State; and

- (b) the mineral, after it is processed, has a metal content of—
- (i) for cobalt—at least 50%; or
 - (ii) for copper, lead and zinc—at least 95%; or
 - (iii) for nickel—at least 70%.

(2) For subsection (1), a mineral is processed if it is changed to another substance by a process, including, for example, leaching, refining, smelting and solvent extraction electro winning (SX-EW).

- (3) The royalty payable for the base prescribed mineral is reduced by—
- (a) for cobalt, copper and nickel—20%; or
 - (b) for lead—25%; or
 - (c) for zinc—35%.

Division 3—Working out values of minerals

Subdivision 1—Preliminary

40 Application of div 3

This division applies to a mineral for which, under division 2, royalty payable in relation to the mineral must be worked out by reference to the value of the mineral.

Subdivision 2—Hydrocarbons

41 Working out value of hydrocarbons

The value of hydrocarbons must be worked out by using the way stated in the *Petroleum Act 1923*, section 57, for working out the value of petroleum at the wellhead.²²

²² *Petroleum Act 1923*, section 57 (Ascertainment of value)

Subdivision 3—Minerals other than hydrocarbons

42 Meaning of “gross value” of a mineral

(1) The “**gross value**” of a mineral is the amount—

- (a) for oil shale if it is processed—for which the oil processed from the oil shale could reasonably have been expected to be realised on sale to an arm’s length buyer; or
- (b) for a prescribed mineral—for which the mineral could, disregarding any cost relating to the processing of the mineral, reasonably have been expected to be realised on sale to an arm’s length buyer; or
- (c) for another mineral—for which the mineral could reasonably have been expected to be realised on sale to an arm’s length buyer.

(2) However, if the mineral was sold and the producer of the mineral has recovered an amount in relation to the royalty payable for the mineral from a buyer, the “**gross value**” of the mineral is the sum of the amount worked out under subsection (1) and the amount recovered.

43 Working out value of minerals other than hydrocarbons

(1) The value of a mineral other than hydrocarbon must be worked out by—

- (a) working out the gross value of the mineral; and
- (b) if the mineral is coal—adding, to the gross value, any amount relating to an early despatch of the coal from a port; and
- (c) subtracting the following amounts from the gross value or, if paragraph (b) applies, the amount worked out by adding the gross value and the amount mentioned in paragraph (b)—
 - (i) any marine cost for the mineral;
 - (ii) if the mineral is a prescribed mineral—the amount the Minister has decided, on reasonable grounds, is the amount that should be subtracted from the gross value to allow for the loss of metal content in the processing of the particular prescribed mineral;

- (iii) any other cost the Minister has decided, on reasonable grounds, is a type of cost that should be subtracted from the gross value.

(2) Also, in working out the value of a mineral that is sold, regard must be had to any change in the exchange rate from the time the mineral was sold and the time any payment for the sale is received by the producer.

(3) In this section—

“**marine cost**” means—

- (a) for coal—
 - (i) a cost relating to a late despatch of the coal from a port; or
 - (ii) a freight or an insurance cost relating to the transport of the coal by water to a port outside the State; or
- (b) for another mineral—a freight or an insurance cost relating to the transport, by water, of the mineral or, if the mineral is oil shale that has been processed, the oil processed from the oil shale, to a port outside the State.

- (a) if no amount of royalty is paid with the return—at least 10 days after the day the notice is given to the person; or
- (b) otherwise—at least 28 days after the day the notice is given to the person.

Division 5—Prescribed interest rate

47 Interest rate on unpaid royalty

SCHEDULE 4

ROYALTY PAYABLE FOR MINERALS

sections 31, 32 and 37

PART 1—ROYALTY RATES FOR PRESCRIBED MINERALS

1 Definitions for pt 1

In this part—

“average market price”, for a prescribed mineral, means the average for a return period of the following price, converted to Australian dollars at the hedge settlement rate for each day of the return period—

- (a) for cobalt—the warehouse spot price published in the Metal Bulletin;
- (b) for copper, lead, nickel or zinc—the spot price quoted on the London Metal Exchange;
- (c) for gold—the p.m. fix price quoted on the London Bullion Market;
- (d) for silver—the fix price quoted on the London Bullion Market.

“reference price 1”, for a prescribed mineral, means—

- (a) for cobalt—\$15 for each pound; or
- (b) for copper—\$2 640 for each tonne; or
- (c) for gold—\$430 for each troy ounce; or
- (d) for lead—\$740 for each tonne; or
- (e) for nickel—\$8 300 for each tonne; or
- (f) for silver—\$5 for each troy ounce; or
- (g) for zinc—\$1 455 for each tonne.

“reference price 2”, for a prescribed mineral, means—

- (a) for cobalt—\$25 for each pound; or

SCHEDULE 4 (continued)

- (b) for copper—\$3 300 for each tonne; or
- (c) for gold—\$540 for each troy ounce; or
- (d) for lead—\$925 for each tonne; or
- (e) for nickel—\$10 400 for each tonne; or
- (f) for silver—\$7 for each troy ounce; or
- (g) for zinc—\$1 815 for each tonne.

“reference price 3”, for a prescribed mineral, means—

- (a) for cobalt—\$35 for each pound; or
- (b) for copper—\$4 180 for each tonne; or
- (c) for gold—\$680 for each troy ounce; or
- (d) for lead—\$1 170 for each tonne; or
- (e) for nickel—\$13 200 for each tonne; or
- (f) for silver—\$9 for each troy ounce; or
- (g) for zinc—\$2 300 for each tonne.

2 Fixed royalty rate

The fixed royalty rate for a prescribed mineral is 2.7% of the value of the prescribed mineral.

3 Variable royalty rate

(1) The variable royalty rate for a prescribed mineral is—

- (a) if the average market price for the mineral is lower than reference price 1 for the mineral—1.5% of the value of the prescribed mineral; or
- (b) if the average market price for the mineral is, or is higher than, reference price 1 for the mineral but lower than reference price 2 for the mineral—the prescribed percentage of the value of the prescribed mineral; or
- (c) if the average market price for the mineral is, or is higher than, reference price 2 for the mineral but lower than reference price 3

SCHEDULE 4 (continued)

for the mineral—the prescribed percentage of the value of the prescribed mineral; or

- (d) if the average market price for the mineral is higher than reference price 3 for the mineral—4.5% of the value of the prescribed mineral.

(2) In this section—

“**prescribed percentage**” means—the amount, expressed as a percentage, rounded down to nearest increment of 0.02%, worked out by using the following formula—

$$PP = RR + \frac{PD}{N \times RFD}$$

where—

“**PP**” is the prescribed percentage.

“**RR**” is—

- (a) for subsection (1)(b)—1.5; or
 (b) for subsection (1)(c)—2.5.

“**PD**” is the difference between the average market price and—

- (a) for subsection (1)(b)—reference price 1; or
 (b) for subsection (1)(c)—reference price 2.

“**N**” is—

- (a) for subsection (1)(b)—1; or
 (b) for subsection (1)(c)—0.5.

“**RFD**” is the difference between—

- (a) for subsection (1)(b)—reference prices 1 and 2; or
 (b) for subsection (1)(c)—reference prices 2 and 3.

Example—

If, for a quarter, the average market price for copper is \$3 045 for each tonne of copper, the variable rate of royalty for copper for the quarter must be worked out under subsection (1)(b) given the average market price is higher than reference price 1 for copper (\$2 640) but lower than reference price 2 for copper (\$3 300). The variable rate of royalty would be 2.10% being the amount (2.1136%) worked out by using the

SCHEDULE 4 (continued)

formula in subsection (2), definition “prescribed percentage”, rounded down to the nearest increment of 0.02%.

 - (i) 10% of the value of the bauxite;
 - (ii) \$1 for each tonne of bauxite; or
- (b) if the bauxite is mined for consumption within the State—half the royalty rate mentioned in paragraph (a).

3 Coal

The royalty rate for coal is 7% of the value of the coal.

SCHEDULE 4 (continued)

4 Corundum, gemstones and other precious stones

The royalty rate for corundum, gemstones or other precious stones is 2.7% of the value of the corundum, gemstones or precious stones.

5 Hydrocarbons

The royalty rate for hydrocarbons is the rate applying to petroleum under the *Petroleum Act 1923*, section 55(1).⁶³

6 Mineral sands

(1) The royalty rate for a concentrate of a mineral sand is 5% of the value of the concentrate.

(2) In this section—

“**mineral sand**” includes the following—

- (a) anatase;
- (b) ilmenite;
- (c) leucoxene;
- (d) monazite;
- (e) rutile;
- (f) zircon.

7 Phosphate

(1) The royalty rate for phosphate rock is the higher of the following—

- (a) 80 cents for each tonne of phosphate rock;
- (b) the rate, rounded down to 2 decimal places, for each tonne of phosphate rock worked out using the following formula—

$$R = \$1 \times \frac{G}{32.3} \times \frac{P_{\text{curr}}}{\$72.50}$$

63 *Petroleum Act 1923*, section 55 (Royalty)

SCHEDULE 4 (continued)

where—

“**R**” is the royalty rate.

“**G**” is the average P_2O_5 content of the phosphate rock for the return period.

“**P_{curr}**” is the average price for the return period, converted to Australian dollars at the average hedge settlement rate for the return period, of Moroccan phosphate rock with 32.3% P_2O_5 content.⁶⁴

(2) In this section—

“**average hedge settlement rate**”, for a return period, means the average, worked out for the return period, of the hedge settlement rates for each day in the return period.

Example for subsection (1)—

For a quarter—

- the average P_2O_5 content of phosphate rock is 24%
- the average price of Moroccan phosphate rock with 32.3% P_2O_5 content is US\$46
- the average hedge settlement rate is 65c.

The rate under subsection (1)(b), by applying the formula, is 72.53c. Therefore, the royalty rate is 80c for each tonne of the phosphate rock.

8 Processed oil shale

(1) The royalty rate for oil shale that is processed is the lesser of the following—

- (a) 10% of the value of the oil processed from the oil shale; or
- (b) the WTI%, rounded to 2 decimal places, of the value of the oil processed from the oil shale.

⁶⁴ The price, in US dollars, of Moroccan phosphate rock with 32.3% P_2O_5 content is published in the magazine called Fertilizer Week.

SCHEDULE 4 (continued)

(2) For subsection (1)(b), the WTI% must be worked out using the following formula—

$$\text{WTI}\% = \left(\left[\frac{\text{CPI}_{\text{BASE}}}{\text{CPI}_{\text{NOW}}} \times \text{WTI} \right]^2 \div 1\,000 \right) + 0.5$$

where—

“**CPI_{BASE}**” is 110.0.

“**CPI_{NOW}**” is the CPI for the calendar quarter for which the royalty for oil shale is being worked out.

“**WTI**” is the average crude oil price.

(3) In this section—

“**average crude oil price**” means the ‘Crude Oil West Texas—Spot—Last’ price published in the Australian Financial Review—

- (a) converted to Australian dollars at the hedge settlement rate for each day of trading in the calendar quarter for which the royalty payable for oil shale is being worked out; and
- (b) averaged over the calendar quarter for which the royalty payable for oil shale is being worked out.

“**CPI**” means the ‘Consumer Price Index: All Groups Index Numbers—Weighted Average of 8 Capital Cities’ published by the Australian Bureau of Statistics.

Example for subsection (1)—

For a calendar quarter—

- the CPI is 134.2; and
- the WTI is \$A30.

The WTI%, worked out using the formula in subsection (2), is 1.10%. Therefore, the royalty rate for oil would be 1.10% of the oil’s value.

9 Silica

The royalty rate for silica is the higher of the following—

SCHEDULE 4 (continued)

- (a) 5% of the value of the silica;
- (b) 50c for each tonne of the silica.

10 Other minerals

The royalty rate for a mineral for which a royalty rate is not already stated in this schedule is 2% of the value of the mineral.
