- (2) This subdivision also applies to a worker who has sustained an injury that is pneumoconiosis if— 18
19
- (a) a settlement for damages has been agreed, or judgment for damages has been given, for the injury; and 20
21
22
- (b) the settlement or judgment does not include damages to compensate the worker for the future progression of the injury; and 23
24
25
- (c) at any time after the settlement is agreed, or the judgment is given, the worker's pneumoconiosis score for the injury increases (also the ***increased pneumoconiosis score***) and falls within a higher pneumoconiosis band. 26
27
28
29
30
31
- (3) For subsection (2)(b), if the settlement or judgment does not expressly state that it includes 32
33

damages to compensate the worker for the future 1
progression of the injury, the settlement or 2
judgment is taken not to include damages for that 3
purpose. 4

128J Further lump sum compensation 5

- (1) The worker is entitled to further lump sum 6
compensation under this subdivision for the 7
injury. 8
- (2) The amount of the further lump sum 9
compensation is the difference between— 10
- (a) the amount that would be payable according 11
to the graduated scale mentioned in section 12
128G(2), calculated on the basis of— 13
- (i) the worker's increased pneumoconiosis 14
score; and 15
- (ii) the worker's lodgement age; and 16
- (b) the amount that would be payable according 17
to the graduated scale mentioned in section 18
128G(2), calculated on the basis of— 19
- (i) the worker's relevant previous 20
pneumoconiosis score; and 21
- (ii) the worker's lodgement age. 22
- (3) For subsection (2)(b)(i), the worker's *relevant* 23
previous pneumoconiosis score is— 24
- (a) if the worker has received lump sum 25
compensation under subdivision 1, but not 26
further lump sum compensation under this 27
subdivision—the pneumoconiosis score that 28
was used to calculate the compensation 29
under subdivision 1; or 30
- (b) if the worker has received further lump sum 31
compensation under this subdivision—the 32
pneumoconiosis score that was used, or that 33

has most recently been used, to calculate the	1
further compensation under this	2
subdivision; or	3
(c) if the worker is a worker mentioned in	4
section 128I(2) and has not received further	5
lump sum compensation under this	6
subdivision—the pneumoconiosis score	7
worked out using the last chest x-ray of the	8
worker taken before the settlement for	9
damages was agreed or the judgment for	10
damages was given.	11
(4) Subject to section 140, the worker's entitlement to	12
further lump sum compensation under this	13
subdivision is in addition to any entitlement to	14
lump sum compensation under part 10.	15
(5) This section applies despite sections 119, 176 and	16
239.	17
128K When further lump sum compensation is	18
payable	19
(1) The further lump sum compensation is payable	20
only after the worker's injury has been further	21
assessed under section 179.	22
(2) However, it does not matter whether the notice of	23
assessment in relation to the injury states that the	24
worker has sustained permanent impairment from	25
the injury.	26
Subdivision 3 Miscellaneous	27
128L Advances on account	28
(1) This section applies if an insurer is satisfied a	29
worker—	30

-
- (a) is entitled to lump sum compensation under subdivision 1 or 2 for an injury; and 1
2
- (b) is experiencing financial hardship. 3
- (2) The insurer may, from time to time, advance to the worker amounts on account of any lump sum compensation as it considers appropriate in the circumstances. 4
5
6
7
- (3) Subsection (2) applies despite sections 128H and 128K. 8
9
- (4) Acceptance of the amount on account of lump sum compensation by the worker does not constitute an election by the worker not to seek damages for the injury. 10

128M Reduction of compensation for particular workers with more than 1 pneumoconiosis injury 16
17
18

- (1) This section applies if a worker who has sustained an injury that is pneumoconiosis (the *current injury*)— 19
20
21
- (a) is entitled to compensation under subdivision 1 or 2 for the current injury; and 22
23
- (b) has previously received compensation under subdivision 1 or 2 for another injury that was pneumoconiosis (a *previous injury*). 24
25
26
- (2) The compensation to which the worker would otherwise be entitled under subdivision 1 or 2 for the current injury must be reduced by an amount equal to the total of all amounts previously paid to the worker under subdivision 1 or 2 for the previous injury. 27

193C Further assessment under s 179 15

The insurer may decide, or the worker may ask the insurer, to have the worker's injury further assessed under section 179 to decide— 16
17
18

- (a) if a previous notice of assessment in relation to the injury stated that the worker had sustained permanent impairment from the injury—whether the degree of permanent impairment resulting from the injury has increased; or 19

23
24
- (b) otherwise—whether the injury has resulted in a degree of permanent impairment. 25

193D Entitlement of worker to lump sum compensation under s 180 and div 4 27 28

- (1) This section applies if the worker is assessed under section 179 as having sustained a DPI or an increased DPI from the injury (the *current DPI*). 29
30
31
- (2) The worker is entitled to lump sum compensation for the injury under the following provisions, 32
33

calculated on the basis of the worker's current DPI—	1 2
(a) section 180;	3
(b) division 4.	4
(3) However, the amount of compensation payable under section 180 and division 4 must be reduced by the total of—	5 6 7
(a) the amount of any compensation previously paid under those provisions for the injury; and	8 9 10
(b) the amount of any compensation paid under a law of Queensland (other than this Act), another State or the Commonwealth for the injury; and	11 12 13 14
(c) if a settlement for damages has been agreed, or judgment for damages has been given, for the injury—an amount equal to the compensation to which the worker would have been entitled under section 180 and division 4, calculated on the basis of the DPI stated in the first notice of assessment given to the worker in relation to the injury.	15 16 17 18 19 20 21 22

		9
		10
		11
	325A Application of chapter	12
	This chapter applies to a person (a <i>former coal worker</i>) who—	13
		14
	(a) was a worker employed in an industry that involved mining, loading, transporting or otherwise dealing with coal; and	15
		16
		17
	(b) permanently stopped working in the industry before 1 January 2017.	18
		19
	325B Applications for lung disease examinations	20
	(1) The former coal worker may apply (an <i>examination application</i>) to the insurer for approval to undergo a lung disease examination.	21
		22
		23
	(2) The application must—	24
	(a) be in the approved form; and	25
	(b) include information that shows the former coal worker was exposed to coal dust at the	26
		27

-
- worker's place of employment for a period, 1
whether or not continuous, of at least 6 2
months; and 3
- (c) be accompanied by a medical certificate 4
signed by a doctor stating that the former 5
coal worker suspects that the worker may 6
have sustained an injury that is a coal mine 7
dust lung disease. 8
- (3) However, an application may not be made under 9
this section— 10
- (a) on or after 1 January 2022; or 11
- (b) if the former coal worker has previously 12
made an application under this section that 13
was approved. 14

325C Deciding examination applications 15

- (1) Within 20 business days after receiving an 16
examination application, the insurer must— 17
- (a) approve or refuse the application; and 18
- (b) give the applicant written notice of the 19
decision. 20
- (2) The insurer must approve the examination 21
application unless satisfied— 22
- (a) the applicant was not exposed to coal dust at 23
the applicant's place of employment for a 24
period, whether or not continuous, of at least 25
6 months; or 26
- (b) the applicant was exposed to coal dust at the 27
applicant's place of employment for a 28
period, whether or not continuous, of at least 29
6 months, but the exposure did not happen 30
in Queensland. 31
- (3) If the insurer refuses the examination application, 32
the notice mentioned in subsection (1)(b) must— 33

- (a) state the reasons for the decision; and 1
- (b) include or be accompanied by information 2
about the rights of review under this Act for 3
the decision. 4

**325D Insurer must arrange and pay for lung 5
disease examinations 6**

- (1) If an examination application is approved, the 7
insurer must— 8
 - (a) arrange for a lung disease examination of 9
the applicant to be carried out by a doctor 10
who is qualified and competent to carry out 11
the examination; and 12
 - (b) within 10 business days after the approval is 13
given, give the applicant a written notice 14
stating— 15
 - (i) the day, time and place the lung disease 16
examination will be carried out; and 17
 - (ii) the name of the doctor; and 18
 - (c) pay for— 19
 - (i) the lung disease examination; and 20
 - (ii) the preparation of an examination 21
report by the doctor; and 22
 - (iii) the giving of a copy and explanation of 23
the examination report to the applicant. 24
- (2) In this section— 25
 - examination report* means a report about a lung 26
disease examination that states whether or not the 27
applicant is diagnosed as having a coal mine dust 28
lung disease. 29

<i>corresponding score</i> , for a category, means the score in section 2(1), table 1, column 2 that corresponds to the category.	3 4 5
<i>reading</i> , of a chest x-ray, see section 2.	6
2 Meaning of <i>reading</i> of chest x-ray	7
(1) A <i>reading</i> , of a chest x-ray, is a process in which a qualified reader—	8 9
(a) assesses the x-ray for the appearance of opacities; and	10 11
(b) decides, in accordance with the ILO classification guidelines, the category in table 1, column 1 (the <i>category</i>) that applies to the appearance of opacities in the x-ray; and	12 13 14 15 16
(c) records the category decided under paragraph (b).	17 18

- (2) In this section— 1
- opacity* means— 2
- (a) a small opacity within the meaning of the ILO classification guidelines; or 3
4
- (b) a large opacity within the meaning of the ILO classification guidelines. 5
6
- qualified reader* means a doctor who is qualified and competent to categorise, in accordance with the ILO classification guidelines, the appearance of opacities in a chest x-ray. 7
8
9
10
- Example*— 11
- a doctor approved as a B Reader by the National Institute for Occupational Safety and Health 12
13

- 3 Meaning of *consecutive categories*** 14
- Two categories are *consecutive categories* if the categories— 15
16
- (a) start with the same digit, other than 0; and 17
- (b) appear in consecutive rows in section 2(1), table 1. 18

• 3/3 and 3/+	3
<i>Examples of categories that are not consecutive categories—</i>	4
• 0/0 and 0/1	5
• 1/2 and 2/1	6
• category B and category C	7
4 Requirement for 2 readings	9
(1) A worker's pneumoconiosis score is worked out by using 2 readings of the same chest x-ray of the worker in the way provided under subsection (2) or (3).	10 11 12 13
(2) If each reading records the same category, the worker's pneumoconiosis score is the corresponding score for that category.	14 15 16
(3) If each reading records a different category, the worker's pneumoconiosis score is—	17 18
(a) if the 2 categories are any combination of 0/-, 0/0 or 0/1—0; or	19 20
(b) if the 2 categories are consecutive categories—the higher of the corresponding scores for the consecutive categories; or	21 22 23
<i>Example for paragraph (b)—</i>	24
One reading records the category as 2/2, which has a corresponding score of 55. The other reading records the category as 2/3, which has a corresponding score of 60. The worker's pneumoconiosis score is 60, being the higher of the corresponding scores for the consecutive categories.	25 26 27 28 29 30 31
(c) if the 2 categories are any combination of category A, category B or category C—the higher of the corresponding scores for the 2 categories.	32 33 34 35

Example for paragraph (c)—

One reading records the category as category A, which has a corresponding score of 90. The other reading records the category as category C, which has a corresponding score of 100. The worker's pneumoconiosis score is 100, being the higher of the corresponding scores for the 2 categories.

5 Requirement for third reading

- (1) This section applies if the worker's pneumoconiosis score can not be worked out under section 4.
- (2) The worker's pneumoconiosis score is worked out by—
 - (a) obtaining a third reading of the same chest x-ray; and
 - (b) using that reading, with the first 2 readings, in the way provided under subsection (3) or (4).
- (3) If the third reading records the same category as either of the first 2 readings, the worker's pneumoconiosis score is the corresponding score for that category.
- (4) If the third reading records a different category from both of the first 2 readings, the worker's pneumoconiosis score is—
 - (a) if 2 of the 3 categories are consecutive categories—the higher of the corresponding scores for the consecutive categories; or

Example for paragraph (a)—

The first 2 readings record the categories as 1/2 and 2/1. The third reading records the category as 2/2. Because the categories of 2/1 and 2/2 are consecutive categories, the worker's pneumoconiosis score is 55, being the higher of the corresponding scores for the consecutive categories.

- (b) if 2 of the 3 categories are any combination of category A, category B or category C—the higher of the corresponding scores for the 2 categories.

Example for paragraph (b)—

The first 2 readings record the categories as 3/+ and category A. The third reading records the category as category B. The worker's pneumoconiosis score is 95, being the higher of the corresponding scores for category A and category B.

6 Requirement for fourth and fifth readings

- (1) This section applies if the worker's pneumoconiosis score can not be worked out under section 4 or 5.
- (2) The worker's pneumoconiosis score is worked out by—
- (a) obtaining a fourth and fifth reading of the same chest x-ray; and
- (b) using those readings, with the other 3 readings, in the way provided under subsection (3).
- (3) The worker's pneumoconiosis score is the corresponding score for the median category of the categories recorded in each of the 5 readings.

Example—

The first 3 readings record the categories as 1/2, 2/1 and 2/3. The fourth and fifth readings record the categories as 1/2 and 2/1. The 5 categories, in ascending order, are 1/2, 1/2, 2/1, 2/1 and 2/3. The median category is 2/1, and the worker's pneumoconiosis score is 50.

Schedule 4C Lump sum compensation for workers with pneumoconiosis

section 112W

- 1 Graduated scale**
- (1) This schedule contains the graduated scale for lump sum compensation for a worker to whom chapter 3, part 3, division 5 of the Act applies.
- (2) The maximum amount of lump sum compensation payable under chapter 3, part 3, division 5 of the Act is \$120,000.
- 2 How to use the graduated scale**
- (1) A pneumoconiosis band shown in column 1 comprises the pneumoconiosis scores in the corresponding entry in column 2.
- (2) A worker who has a pneumoconiosis score shown in column 2 is entitled to lump sum compensation in the amount shown for the corresponding entry in column 3.
- (3) However, the amount of the lump sum compensation under subsection (2) is subject to any reduction required under section 3.

Graduated scale

Column 1 Pneumoconiosis band	Column 2 Pneumoconiosis scores	Column 3 Lump sum compensation
1	0	\$ 0

Graduated scale

Column 1 Pneumoconiosis band	Column 2 Pneumoconiosis scores	Column 3 Lump sum compensation
		\$
2	15	18,000
	20	24,000
	25	30,000
3	50	60,000
	55	66,000
	60	72,000
4	75	90,000
	80	96,000
5	85	102,000
6	90	108,000
7	95	114,000
8	100	120,000

3 Effect of worker's lodgement age

(1) This section applies if the worker's lodgement age is 71 years or more.

(2) For each whole year by which the worker's lodgement age is more than 70 years, the amount (the *prescribed amount*) to which the worker would otherwise be entitled under section 2(2) must be reduced by an amount equal to 5% of the prescribed amount.

Example—

A worker with a pneumoconiosis score of 100 has a lodgement age of 72 years. The worker is entitled under section 2(2) to the amount of \$120,000. However, that

	amount must be reduced under this subsection by	1
	\$6,000 for each of the 2 years by which the worker's	2
	lodgement age is more than 70 years. The amount of the	3
	worker's entitlement under this schedule is therefore	4
	\$108,000.	5
(3)	However, the maximum reduction that may be	6
	made under subsection (2) is an amount equal to	7
	50% of the prescribed amount.	8
