Information about this reprint

This Act is reprinted as at 1 January 2009. The reprint shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes. Also see list of legislation for any uncommenced amendments.

This page is specific to this reprint. See previous reprints for information about earlier changes made under the Reprints Act 1992. A table of reprints is included in the endnotes.

Also see endnotes for information about—

- **when provisions commenced**
- **editorial changes made in earlier reprints.**

Spelling

The spelling of certain words or phrases may be inconsistent in this reprint or with other reprints because of changes made in various editions of the Macquarie Dictionary (for example, in the dictionary, ‘lodgement’ has replaced ‘lodgment’). Variations of spelling will be updated in the next authorised reprint.

Dates shown on reprints

Reprints dated at last amendment All reprints produced on or after 1 July 2002, authorised (that is, hard copy) and unauthorised (that is, electronic), are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If an authorised reprint is dated earlier than an unauthorised version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of an authorised reprint is the same as the date shown for an unauthorised version previously published, it merely means that the unauthorised version was published before the authorised version. Also, any revised edition of the previously published unauthorised version will have the same date as that version.

Replacement reprint date If the date of an authorised reprint is the same as the date shown on another authorised reprint it means that one is the replacement of the other.

73 Management principles of protected wildlife

Protected wildlife is to be managed to—

- (a) conserve the wildlife and its values and, in particular to—
 - (i) ensure the survival and natural development of the wildlife in the wild; and
 - (ii) conserve the biological diversity of the wildlife to the greatest possible extent; and
 - (iii) identify, and reduce or remove, the effects of threatening processes relating to the wildlife; and
 - (iv) identify the wildlife's critical habitat and conserve it to the greatest possible extent; and
- (b) ensure that any use of the wildlife—
 - (i) for scientific study and monitoring; or
 - (ii) for educational, recreational, commercial and authorised purposes; or
 - (iii) by Aboriginal people under Aboriginal tradition or Torres Strait Islanders under Island custom;is ecologically sustainable.

74 Management principles of international wildlife

International wildlife is to be managed in accordance with the wildlife's international conservation significance and, in particular—

- (a) to ensure the protection of protected wildlife from any threatening process that may be posed by the wildlife; and
- (b) to prevent unlawful introduction of the wildlife into the State; and

- (c) prohibit the release of the wildlife into the wild except under a licence, permit or other authority issued or given under a regulation.

75 Management principles of prohibited wildlife

Prohibited wildlife is to be managed to—

- (d) encourage the humane taking and use of the wildlife.

Division 2 Classes of wildlife

76 Native wildlife may be prescribed as extinct in the wild wildlife

A regulation may prescribe native wildlife as extinct in the wild wildlife if—

- (a) there have been thorough searches conducted for the wildlife; and
- (b) the wildlife has not been seen in the wild over a period that is appropriate for the life cycle or form of the wildlife.

77 Native wildlife may be prescribed as endangered wildlife

A regulation may prescribe native wildlife as endangered wildlife if—

- (a) there have not been thorough searches conducted for the wildlife and the wildlife has not been seen in the wild over a period that is appropriate for the life cycle or form of the wildlife; or

- (b) the habitat or distribution of the wildlife has been reduced to an extent that the wildlife may be in danger of extinction; or
- (c) the population size of the wildlife has declined, or is likely to decline, to an extent that the wildlife may be in danger of extinction; or
- (d) the survival of the wildlife in the wild is unlikely if a threatening process continues.

78 Native wildlife may be prescribed as vulnerable wildlife

- (1) A regulation may prescribe native wildlife as vulnerable wildlife if—
 - (a) the population size or distribution of the wildlife has declined, or is likely to decline, to an extent that the wildlife may become endangered because of a threatening process; or
 - (b) the population size of the wildlife has been seriously depleted and the protection of the wildlife is not secured; or
 - (c) the population of the wildlife is—
 - (i) low or localised; and
 - (ii) dependent on habitat that has been, or is likely to be, adversely affected, in terms of quantity or quality, by a threatening process.
- (2) In this section—

endangered, in relation to wildlife, means the wildlife falls within a description mentioned in section 77.

78A Native wildlife may be prescribed as rare wildlife

- (1) A regulation may prescribe native wildlife as rare wildlife if the wildlife is not threatened wildlife and—
 - (a) the population of the wildlife is represented by—
 - (i) a relatively large population in a restricted range; or

- (ii) relatively small populations thinly spread over a wide range; or
 - (b) the survival of the wildlife in the wild is affected to an extent that the wildlife is in danger of becoming vulnerable.
- (2) Native wildlife may be prescribed as rare wildlife even if the wildlife is the subject of a threatening process.
- (3) This section expires 5 years after it commences.
- (4) In this section—
- vulnerable*, in relation to wildlife, means the wildlife falls within a description mentioned in section 78(1).

79 Native wildlife may be prescribed as near threatened wildlife

- (1) A regulation may prescribe native wildlife as near threatened wildlife if—
- (a) the population size or distribution of the wildlife is small and may become smaller; or
 - (b) the population size of the wildlife has declined, or is likely to decline, at a rate higher than the usual rate for population changes for the wildlife; or
 - (c) the survival of the wildlife in the wild is affected to an extent that the wildlife is in danger of becoming vulnerable.
- (2) Native wildlife may be prescribed as near threatened wildlife even if the wildlife is the subject of a threatening process.
- (3) In this section—
- vulnerable*, in relation to wildlife, means the wildlife falls within a description mentioned in section 78(1).

80 Native wildlife may be prescribed as least concern wildlife

- (1) A regulation may prescribe native wildlife as least concern wildlife if the wildlife is common or abundant and is likely to survive in the wild.

- (2) Native wildlife may be prescribed as least concern wildlife even if—
- (a) the wildlife is the subject of a threatening process; or
 - (b) the population size or distribution of the wildlife has declined; or
 - (c) there is insufficient information about the wildlife to conclude whether the wildlife is common or abundant or likely to survive in the wild.

81 Wildlife may be prescribed as international wildlife

If the Governor in Council is of the opinion that wildlife included in appendix I or II of CITES is not indigenous to Australia, the wildlife may be prescribed as international wildlife.

82 Wildlife may be prescribed as prohibited wildlife

If the Governor in Council is of the opinion that wildlife is—

- (a) an unnatural hybrid or not indigenous to Australia; and
- (b) likely to constitute a threatening process to protected wildlife;

the wildlife may be prescribed as prohibited wildlife.

- (5) If—
 - (a) a person is keeping an animal that is not a protected animal; and
 - (b) the animal becomes a protected animal because of the making of a regulation under this Act;the animal and its progeny do not become the property of the State merely because of the making of the regulation.

84 Property in protected plants

- (1) Subject to subsections (2) to (4), section 86 and the provisions of any captive breeding agreement, all protected plants (other than protected plants on private land) are the property of the State.
- (2) A protected plant ceases to be the property of the State if—
 - (a) the plant is taken under a licence, permit or other authority issued or given under a regulation; and
 - (b) under a conservation plan property in the plant passes from the State on that taking of the plant.
- (3) A protected plant to which subsection (2) applies becomes the property of the holder of the authority, subject to the rights in the plant of any other person (other than the rights of the State under subsection (1)).

86 Preservation of existing property rights

Sections 83 and 84 do not affect property rights a person (other than the State) has in native wildlife immediately before the wildlife becomes protected wildlife.

87 Liability of State

The State is not legally liable for an act or omission merely because protected animals and plants are the property of the State.

Division 4 Restrictions on activities relating to protected wildlife

Examples of when an offence is committed under subsection (1)—

A buys and keeps the native wildlife mentioned in item 1 or 2, under the circumstances mentioned in the item. A is not an authorised person. A did not buy the wildlife from the State. A reasonable person in A's circumstances ought to have suspected that the wildlife may have been unlawfully taken.

- 1 A buys protected wildlife from B at a market stall. Before buying the wildlife A asked B for evidence that it had been lawfully taken. In response, B replied that B did not have that evidence and that B bought the wildlife from someone else whom B did not know.
- 2 A holds a licence under this Act to keep particular protected wildlife. A buys protected wildlife of that type from B. Under this Act, to keep or deal with the wildlife, B must hold a particular type of licence. A regulation requires that B must, before the sale is completed, fill in a movement advice in the approved form for the movement of the wildlife because of the sale. The approved form requires a written acknowledgement by A as the person to whom the wildlife is being moved. B has not shown to A that B holds a licence to keep and deal with the wildlife. A did not give the acknowledgement.

⁴ See sections 171 (Disposal of cultural or natural resources and protected wildlife owned by State) and 172 (Disposal of wildlife etc. not owned by State).

Division 8 Captive breeding agreements and captive breeding for conservation

Subdivision 1 Preliminary

100A Main purpose of div 8 and its achievement

- (1) The main purpose of this division is to facilitate the conservation of native wildlife in the wild through captive breeding programs and the introduction of captive-bred wildlife into the wild.
- (2) The purpose is achieved by—
 - (a) providing for agreements between the State and other entities about captive breeding; and
 - (b) authorise the taking of protected wildlife in the wild for use in captive breeding programs.

Subdivision 2 Captive breeding agreements

100B Minister's power to enter into captive breeding agreement

- (1) The Minister may, for the State, enter into an agreement (a *captive breeding agreement*) with someone else about captive breeding of protected wildlife to—
 - (a) reintroduce it into the wild, in the State or elsewhere; or
 - (b) otherwise ensure the survival in the wild of the protected wildlife or another species of wildlife.
- (2) However, the agreement may provide for the reintroduction of the protected wildlife only if the Minister is satisfied—
 - (a) suitable habitat exists, or will exist, for the wildlife at the place where it is to be released; and
 - (b) threatening processes for the wildlife or its habitat will be minimised at the place.
- (3) The agreement may be made even though no conservation plan or recovery plan has been made for the wildlife.
- (4) In this section—

captive breeding, of protected wildlife, means doing, in the State or elsewhere, any of the following for a purpose mentioned in subsection (1)—

- (a) growing or propagating protected plants under controlled conditions;

protected wildlife includes wildlife that, under a law of another State, is an equivalent (however called) of protected wildlife as defined under this Act.

recovery plan, for wildlife, is a document stating what research and management is necessary to stop the decline,

support the recovery, or enhance the chance of long-term survival in the wild, of the wildlife.

Example—

a recovery plan made or adopted under the *Environment Protection and Biodiversity Act 1999* (Cwlth), section 269A

reproductive material, of protected wildlife, means any part of the wildlife that is capable of, or contributes to, asexual or sexual reproduction.

Examples of reproductive material of a plant—

all or part of a bulb, rhizome, root, seed, stolon or tuber

- (2) On the dedication—
- (a) the former permit ends; and
 - (b) the chief executive is taken to have granted the holder of the former permit a previous use authority under section 36.
