Coroners Act 2003

An Act to provide for a coronial system, and for other purposes

Part 1 Preliminary

1 Short title

This Act may be cited as the *Coroners Act 2003*.

2 Commencement

- (1) The amendment of the *District Court of Queensland Act 1967* in schedule 1 commences on 1 May 2003.
- (2) The remaining provisions commence on a day to be fixed by proclamation.

3 Object of Act

The object of this Act is to—

- (a) establish the position of the State Coroner; and
- (b) require the reporting of particular deaths; and
- (c) establish the procedures for investigations, including by holding inquests, by coroners into particular deaths; and
- (d) help to prevent deaths from similar causes happening in the future by allowing coroners at inquests to comment on matters connected with deaths, including matters related to—
 - (i) public health or safety; or
 - (ii) the administration of justice; and

- (e) establish the Domestic and Family Violence Death Review and Advisory Board to review deaths related to domestic and family violence to prevent or reduce the likelihood of those deaths.

4 Act binds all persons

This Act binds all persons, including the State and, so far as the legislative power of the Parliament permits, the Commonwealth and the other States.

5 Relationship with other Acts

- (1) This Act is subject to the *Commissions of Inquiry Act 1950*, section 4A.
- (2) This Act does not limit or otherwise affect the functions or powers of—
 - (a) a police officer or other person to investigate a death under another Act; or
 - (b) a police officer to do something other than an investigation under this Act.

Example—

A police officer helping a coroner to investigate a death may at the same time investigate whether the death was a homicide.

6 Definitions

The dictionary in schedule 2 defines particular words used in this Act.

Part 2 Reporting deaths

7 Duty to report deaths

- (1) This section applies if—

-
- (a) a person becomes aware of a death that appears to be a reportable death; and
 - (b) the person does not reasonably believe that someone else has already reported, or is reporting, the death under subsection (3).
- (2) Despite subsection (1)(b), a relevant service provider who becomes aware of a death in care as mentioned in section 9(1)(a) or (e) must report the death under subsection (3), regardless of whether someone else has reported or may report the death.

Note—

Under section 9(3), a person's death is a death in care even if the deceased person died somewhere other than the place where the deceased person ordinarily lived for the purposes of being in care.

- (3) The person must immediately report the death to—
- (a) if the death happened in the course of or as a result of police operations—the State Coroner or the Deputy State Coroner; or
 - (b) if the death is a death in custody—the State Coroner or Deputy State Coroner; or
 - (c) otherwise—a police officer or coroner.

Maximum penalty—25 penalty units.

- (4) A police officer to whom a death is reported under this section must report the death to a coroner in writing.
- (5) However, if a death is reported to a police officer because a cause of death certificate has not been issued and is not likely to be issued, the officer need not report the death to a coroner until satisfied that the cause of death certificate is not likely to be issued.
- (6) A coroner to whom a death is reported must report the death to the State Coroner in writing.
- (7) Nothing in this section prevents a person from reporting a death in the way mentioned in subsection (3) if the person considers the death may be a reportable death.

(8) In this section—

relevant service provider means—

- (a) in relation to the death in care of a person mentioned in section 9(1)(a)—the provider of the residential service, or accommodation, mentioned in that section in which the person ordinarily lived for the purposes of being in care; or
- (b) in relation to the death in care of a person mentioned in section 9(1)(e)—the registered NDIS provider that was providing the services or supports mentioned in that section.

report includes report by email or fax.

8 Reportable death defined

- (1) A person's death is a ***reportable death*** only if the death is a death to which subsection (2) and subsection (3) both apply.
- (2) A death is a ***reportable death*** if—
 - (a) the death happened in Queensland; or
 - (b) although the death happened outside Queensland—
 - (i) the person's body is in Queensland; or
 - (ii) at the time of death, the person ordinarily lived in Queensland; or
 - (iii) the person, at the time of death, was on a journey to or from somewhere in Queensland; or
 - (iv) the death was caused by an event that happened in Queensland.
- (3) A death is a ***reportable death*** if—
 - (a) it is not known who the person is; or
 - (b) the death was a violent or otherwise unnatural death; or
 - (c) the death happened in suspicious circumstances; or
 - (d) the death was a health care related death; or

-
- (e) a cause of death certificate has not been issued, and is not likely to be issued, for the person; or
 - (f) the death was a death in care; or
 - (g) the death was a death in custody; or
 - (h) the death happened in the course of or as a result of police operations.

Examples of police operations—

- a police motor vehicle pursuit for the purpose of apprehending a person
 - an evacuation
- (4) However, a death that happened outside Queensland is not a reportable death if the death has been reported to a non-Queensland coroner.
 - (5) For subsection (3)(b), an unnatural death includes the death of a person who dies at any time after receiving an injury that—
 - (a) caused the death; or
 - (b) contributed to the death and without which the person would not have died.

Examples—

- a person's death resulting from injuries sustained by the person in a motor vehicle accident many months before the death
- a person's death from pneumonia suffered after fracturing the person's neck or femur
- a person's death caused by a subdural haematoma not resulting from a bleeding disorder

9 **Death in care defined**

- (ii) contributed to or is likely to have contributed to the death; and
 - (b) immediately before receiving the health care, an independent person would not have reasonably expected that the health care would cause or contribute to the person's death.
- (2) A person's death is also a *health care related death* if, after the commencement, the person dies at any time after health care was sought for the person and the health care, or a particular type of health care, failed to be provided to the person and—
- (a) the failure either—
 - (i) caused or is likely to have caused the death; or
 - (ii) contributed or is likely to have contributed to the death; and
 - (b) when health care was sought, an independent person would not have reasonably expected that there would be a failure to provide health care, or the particular type of health care, that would cause or contribute to the person's death.
- (3) For this section—
- (a) health care contributes to a person's death if the person would not have died at the time of the person's death if the health care had not been provided; and
 - (b) a failure to provide health care contributes to a person's death if the person would not have died at the time of the person's death if the health care had been provided.
- (4) For this section, a reference to an independent person is a reference to an independent person appropriately qualified in the relevant area or areas of health care who has had regard to all relevant matters including, for example, the following—

 - (a) notify the family and child commissioner of the death; and
 - (b) if a report about the death was given under section 7(4) by a police officer to a coroner—give the family and child commissioner a copy of the report unless the State Coroner considers that giving the report is likely to prejudice an investigation by a coroner or police officer.
- (2) Before giving the family and child commissioner a copy of a report under subsection (1)(b), the State Coroner must ensure that all information in the report that identifies anyone is obliterated.

- (3) However, the State Coroner need not obliterate information if the State Coroner reasonably believes the person's identity is necessary for the family and child commissioner's child death research functions.

Part 3 Coroner's investigation, including by inquest, of deaths

Division 1 Investigations generally

11 Deaths to be investigated

- (1) This section outlines—
 - (a) the type of deaths that may be investigated under this Act; and
 - (b) the type of coroner who conducts the investigations.
- (2) A coroner must, and may only, investigate a death if the coroner—
 - (a) considers the death is a reportable death, whether or not the death was reported under section 7; and
 - (b) is not aware that any other coroner is investigating the death.
- (3) Also, a coroner must investigate a death if the State Coroner directs the coroner to investigate the death.
- (4) The State Coroner may direct a coroner to investigate a death if—
 - (a) the State Coroner considers the death is a reportable death; or
 - (b) the State Coroner has been directed by the Minister to have the death investigated, whether or not the death is a reportable death.

Example—

The Minister might direct the State Coroner to investigate the death of a Queensland person that happened overseas, even though the death was investigated by a coroner overseas, if the Minister is concerned that the overseas investigation was not comprehensive enough.

- (5) Also, a coroner must investigate the suspected death of a person if the State Coroner directs the coroner to investigate the suspected death.
- (6) The State Coroner may direct a coroner to investigate a suspected death if—
 - (a) the State Coroner—
 - (i) suspects that the person is dead; and
 - (ii) considers the death is a reportable death; or

12 Not investigating or stopping investigation of particular deaths

- (1) A coroner must not investigate a death, unless directed to do so by the Minister or by the State Coroner under section 11(4)(b), if—

 - (c) a reference to a party is a reference to—
 - (i) a police officer, lawyer or other person helping the coroner; or

-
- (ii) a person who is to appear or is appearing at an inquest.

- (4) The coroner must state in the order the type of examination to be conducted.

-
- (5) Before ordering an internal examination of the body, the coroner must, whenever practicable, consider at least the following—

- (6) The order authorises a police officer to enter the place stated in the order and stay there for as long as reasonably necessary to exhume the body or recover the cremated remains.
- (7) The officer must arrange for the body or cremated remains to be taken, in accordance with the directions in the order, to a place stated in the order.

 - (3) The person may send a written report or medical records to the doctor by fax or other electronic means, unless the notice requires the original copy of the written report or medical records to be given.
 - (4) The person to whom the notice is directed must comply with the notice, unless the person has a reasonable excuse.

Maximum penalty—40 penalty units.

Example—

An attending doctor may refuse to give the coroner a written report if the information in the report would tend to incriminate the attending doctor.

- (5) The doctor who conducts the autopsy must return the medical records or tissue samples as soon as reasonably practicable after the autopsy, unless the coroner orders otherwise.

Maximum penalty—40 penalty units.

23 Autopsy testing

-
- (2) If prescribed tissue is removed, the doctor must inform the coroner before the coroner orders the body's release.
 - (3) The coroner, knowing that the tissue has been removed, may nevertheless order the release of the body.
 - (4) However, if prescribed tissue has been removed, the coroner must not order the release of the body unless satisfied that—
