- (1) This section applies if an analyst is engaged or employed to analyse a substance to determine its THC concentration.
- (2) The analyst must analyse the substance in a laboratory whose functions and operations are accredited by NATA for competence to undertake drug analysis.
- (3) The analyst must keep standard THC material in a securely locked place other than when the analyst is using the material in analysing the substance to determine its THC concentration.
- (4) The analyst must keep the substance in a securely locked place other than when the analyst is analysing the substance.
- (5) In this section—

NATA means the National Association of Testing Authorities, Australia ABN 59 004 379 748.

substance means a substance the analyst reasonably believes to be any of the following—

- (a) industrial cannabis plants;
- (b) class A or class B research cannabis plants;

Schedule 8 Licence conditions

section 29(1)

- 1 A licensee who is authorised to produce class A research cannabis must—
 - (a) grow the cannabis in a glasshouse that is capable of being securely locked; and
 - (b) keep the glasshouse securely locked other than when the licensee or a person authorised by the licensee is performing functions directly associated with growing cannabis in the glasshouse.
- 2 A licensee who is authorised to produce class B research cannabis must—
 - (a) grow the cannabis in an area that is fenced to delineate the area under production; and
 - (b) if the chief executive requires the licensee to erect signs indicating the presence of class B research cannabis at a fenced area, ensure the signs are erected as required by the chief executive.
- 3 A licensee must keep cannabis seed in the licensee's possession in a securely locked place, other than when the licensee uses the seed for a purpose that is authorised under the licensee's licence.
- 4 A licensee must keep a register of the following—
 - (a) the strains or varieties of cannabis seed in the licensee's possession;
 - (b) the strains or varieties of cannabis plants the licensee is growing.
- 6 As soon as reasonably practicable after a licensee receives a package containing cannabis plants or seed that appears to have been tampered with, the licensee must inform an inspector or a police officer that the package appears to have been tampered with.

- 7 A licensee must pay the chief executive's reasonable costs of monitoring activities performed under the licence, including any costs of an analyst conducting a laboratory analysis necessary to determine the concentration of THC in the leaves and flowering heads of cannabis plants in the licensee's possession.
- 8 A category 2 researcher must allow an inspector to destroy, or supervise the destruction of, cannabis plants in the possession of the licensee that have been found, by an analyst conducting a laboratory analysis of a random sample of the leaves and flowering heads of the plants, to have a concentration of THC in their leaves and flowering heads of 3% or more.
- 9 A grower must allow an inspector to destroy, or supervise the destruction of, cannabis plants in the possession of the licensee that have been found, by an analyst conducting a laboratory analysis of a random sample of the leaves and flowering heads of the plants, to have a THC concentration in their leaves and flowering heads of more than 1%.
- 10 A licensee who proposes to supply industrial cannabis seed for sale by wholesale or retail must ensure—
 - (a) if the seed is cannabis seed harvested from an industrial cannabis plant—the package containing the seed has a label on it or attached to it that describes the contents of the package as cannabis seed harvested from an industrial cannabis plant; or
 - (b) if the seed is certified cannabis seed—the package containing the seed has a label on it, or attached to it, that describes the contents of the package as certified cannabis seed.
